Data Analyst

PROFESSIONAL SUMMARY:

Data Analyst with **5+ years of experience** delivering data-driven insights across **healthcare payer analytics and financial services**. Strong expertise in **SQL-based data analysis, Power BI and Tableau dashboarding, and advanced Excel reporting** to support executive decision-making. Proven ability to analyze **medical and pharmacy claims, financial performance, and operational KPIs**, ensuring data accuracy, automation, and actionable insights. Adept at collaborating with **clinical, finance, and business stakeholders** to translate complex data into clear, business-ready intelligence. Experienced in **source-to-target mapping, information-model specification documentation, and data acquisition and integration logic** to support scalable analytics solutions. Strong background in **statistical analysis using Excel, SAS, and SPSS**, with a proven ability to translate complex datasets into executive-ready insights.

TECHNICAL SKILLS:

Analytics & BI: SQL (MySQL, SQL Server), Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Power Query), KPI Development, Dashboarding, Data Storytelling

Programming: Python, R

Healthcare & Finance Analytics: Medical & Pharmacy Claims Analysis, Cost of Care, Utilization Trends, Provider Performance, Financial & Operational Reporting

Data Engineering & Quality: Data Validation, Data Cleansing, ETL Concepts, Data Modeling, Data Reconciliation, Data Quality Assurance

Data Architecture & Integration: Source-to-Target Mapping, Information Model Specification Documents, Data Acquisition & Integration Logic, ETL Workflows, Data Segmentation Techniques

Statistical & Analytical Tools: Excel, **SAS, SPSS**, Regression Analysis, Classification, Clustering, Hypothesis Testing

Tools & Platforms: Apache Spark, MLlib, Streamlit, MySQL, SQL Server

PROFESSIONAL EXPERIENCE:

Client: Elevance Health, USA

March 2025 to till date

Role: Data Analyst

Roles & Responsibilities:

- Analyzed large-scale **medical and pharmacy claims data** to identify utilization trends, cost drivers, and care gaps.
- Created **source-to-target mapping documents and information-model specifications** to support multi-source healthcare analytics and KPI reporting.
- Applied **statistical analysis using Excel and SAS** to evaluate utilization trends, cost drivers, and operational efficiency.
- Developed and maintained **Power BI dashboards** tracking KPIs such as cost of care, claims volume, denial rates, and provider performance.
- Performed **SQL-based data extraction, validation, and reconciliation** from enterprise data warehouses to ensure reporting accuracy.
- Partnered with **clinical, finance, and operations stakeholders** to translate business requirements into standardized analytical reports.
- Conducted **trend, variance, and root-cause analysis** to support cost containment and operational efficiency initiatives.
- Automated recurring reports, reducing **manual reporting effort by 30%+** and improving data timeliness.
- Supported **UAT and data quality checks** for new dashboards and reporting enhancements prior to production release.

Client: Edward Jones - St. Louis, Missouri

October 2023 to Feb 2025

Role: Data Analyst

Roles & Responsibilities:

- Performed **SQL-driven analysis** on portfolio, transaction, and advisory data to support investment and performance reporting.
- Developed **data acquisition and integration logic** to consolidate portfolio, transaction, and advisory datasets into scalable reporting frameworks.
- Performed **segmentation and statistical analysis using Excel and SAS** to identify performance trends and productivity gaps.
- Built **Power BI and Excel dashboards** to track asset allocation, account performance, advisor productivity, and client service KPIs.
- Analyzed financial and operational data to identify **trends, risks, and improvement opportunities** for leadership decision-making.
- Gathered and documented **business requirements** from advisors, operations, and compliance teams.
- Translated requirements into **functional specifications, process flows, and data mapping documents** for technical teams.
- Conducted **gap analysis and root-cause analysis** to improve reporting workflows and data quality.
- Supported **UAT activities** by validating reports and dashboards before production releases.

Client: IDFC First Bank, India

July 2021 to May 2023

Role: Data Analyst

Roles & Responsibilities:

- Utilized **SQL and Excel** to analyze large financial datasets and generate business reports.
- Created and optimized **MySQL stored procedures and views** for automated data preparation and reporting.
- Developed **Power BI dashboards** to visualize KPIs and support data-driven decision-making across departments.
- Conducted **exploratory data analysis (EDA)** to identify trends, patterns, and anomalies.
- Collaborated with business teams to deliver **actionable insights** supporting cost optimization initiatives.
- Ensured **data accuracy and consistency** through validation and reconciliation processes.
- Streamlined reporting workflows to improve efficiency and turnaround time.

Client: Cognizant Technology Solutions, India

Feb 2021 to Jun 2021

Role: Data Analyst (Internship)

Roles & Responsibilities:

- Supported data analysis initiatives using **SQL, Python, Power BI, and Excel**.
- Assisted in building dashboards and reports for internal business teams.
- Cleaned, transformed, and visualized datasets to support analytical use cases.
- Collaborated with senior analysts to resolve data issues and improve reporting workflows.

PROJECTS:

Heart Disease Prediction (Capstone Project)

- Built a machine learning model using clinical datasets, achieving **92% prediction accuracy**.
- Developed a **Streamlit web application** for real-time prediction and visualization.

E-commerce Recommendation System – Apache Spark

- Developed a scalable recommendation engine using **Spark MLlib**, increasing sales by **10%**.

Interactive Sales Dashboard – Power BI

- Designed dynamic Power BI dashboards to track revenue, regional performance, and customer behavior.
- Enabled data-driven sales optimization and strategic planning.

Business Performance Dashboard – Tableau

- Created executive dashboards analyzing sales trends, customer segmentation, and performance KPIs.
- Improved reporting efficiency by **30%** through automated data integration.

Credit Card Fraud Detection

- Engineered predictive models achieving **99% accuracy** through advanced preprocessing and feature engineering.

EDUCATION:

Master of Science in Data Science — Saint Peter's University, Jersey City, NJ

May 2023 – February 2025

Bachelor of Biotechnology Engineering — Vignan University, India

July 2018 – June 2022
