

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 4+ years of experience delivering high-quality analytics, reporting, and AI/ML-driven insights in fast-paced environments. Proven expertise in Python, SQL, Power BI, BigQuery, Tableau, Excel, and machine learning frameworks to analyze large datasets, build interactive dashboards, and support business decision-making. Strong track record in data cleaning, validation, coding quality assurance, workflow management, and mentoring junior analysts while meeting strict delivery timelines.

CORE SKILLS

- **Data Analysis & Reporting:** Data Cleaning & Transformation, Exploratory Data Analysis (EDA), Data Validation, Data Quality Checks, KPI Tracking, Performance Analysis
- **Programming & Tools:** Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), BigQuery, R (Basic), SQL, Excel (Advanced), Git/GitHub
- **AI / Machine Learning:** Model Development & Deployment, Model Evaluation, Feature Engineering, TensorFlow, PyTorch (Foundational), Business ML Applications
- **Visualization & BI:** Power BI, Tableau, Interactive Dashboards, Charts & Reports
- **Collaboration & Communication:** Stakeholder Reporting, Cross-functional Collaboration, Mentorship, Documentation, Code Reviews

PROFESSIONAL EXPERIENCE

MD Anderson Cancer Center, Houston, TX

Data Analyst

Feb 2025 – Present

- Ensured high-quality coding analysis production by enforcing standards, tracking analyst performance, and meeting strict delivery timelines.
- Designed and developed SSIS (SQL Server Integration Services) packages to extract, transform, and load (ETL) data from SQL Server into downstream systems.
- Deployed SSIS packages and configured SQL Server Agent jobs, including scheduling, dependency management, and performance monitoring.
- Built and optimized BigQuery data warehouses, applying partitioning and clustering to improve query performance and reduce costs.
- Managed content searches, data uploads, and task prioritization, performing routine data checks aligned with project coding structures.
- Conducted data cleaning, transformation, and validation to prepare datasets for advanced analysis and reporting.
- Built interactive dashboards using Power BI, Tableau, and Python visualization libraries, enabling data-driven decision-making.
- Took ownership of initial data exports, chart creation, and report production with robust qualitative and quantitative insights.
- Developed Python-based data transformation logic using notebooks and scripts integrated with Azure services.
- Prepared model evaluation reports, presented findings to stakeholders, and supported AI/ML initiatives across client projects.
- Collaborated using Git-based workflows, contributing to documentation and participating in code reviews.

Accenture, Hyderabad, India

Data Analyst

Jan 2021- Dec 2023

- Analyzed large datasets to identify trends, patterns, and actionable insights supporting business strategy.
- Conducted Exploratory Data Analysis (EDA) using Python and Excel to uncover anomalies and opportunities.
- Designed and implemented end-to-end ETL/ELT pipelines on Google Cloud Platform using SQL, BigQuery, and Cloud Storage.

- Improved performance of SQL queries and Tableau extracts by optimizing table structures and indexing
- Generated standardized reports and visualizations using established templates and BI tools.
- Supported Senior Analysts and Team Leads with daily tasks, including data verification, contact management, and report preparation.
- Designed scalable data models and schemas (fact/dimension tables) to support BI tools such as Looker.
- Implemented Python-based visualizations (Matplotlib, Seaborn, Plotly) to enhance analytical storytelling.
- Assisted in AI/ML projects, supporting model testing, evaluation, and deployment in business use cases.
- Maintained clear communication with managers to prioritize tasks and manage workflow efficiently.

Versatile IT Solutions, Hyderabad, India

Jun 2020- Jan 2021

Junior Data Analyst

- Performed data extraction, cleaning, and validation to support analytics and reporting needs.
- Built Excel-based dashboards and assisted in Power BI report development.
- Supported SQL queries for data retrieval and basic transformations.
- Participated in team stand-ups, skill-building workshops, and mentorship sessions.
- Assisted with documentation, data audits, and quality assurance checks.

EDUCATION:

- MS in Information Science, University of North Texas, Denton, TX, USA
- Bachelor of Technology in Mechanical Engineering, Vignan's Institute of Information Technology, Duvvada, India

CERTIFICATIONS:

- Google Cloud Platform Fundamentals
- Programming Essentials in Python
- SQL for Data Science
- Deloitte Data Analytics Job Simulation
