

RITHANYA CHANDRAN

DATA ANALYST / BUSINESS INTELLIGENCE ANALYST

New York, NY — (857) 340-3328 — rithanya.chan@gmail.com — [linkedin.com/in/rithanya-chandran](https://www.linkedin.com/in/rithanya-chandran)

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Data Analyst with 4+ years of combined experience across analytics, database validation, reporting automation, and software engineering. Highly proficient in SQL (complex joins, subqueries, aggregations), Advanced Excel (XLOOKUP, PivotTables, formulas), Python (Pandas, NumPy), and BI dashboarding tools including Tableau and Power BI. Proven success in extracting and cleaning multi-source datasets, identifying data quality issues, building interactive executive dashboards, and automating repetitive business reporting tasks. Strong background in statistical analysis, trend identification, and communicating actionable analytical insights to both technical and non-technical business stakeholders. Authorized to work in the USA for any employer.

TECHNICAL SKILLS

Data Analytics & Reporting:	Data Analysis, Exploratory Data Analysis (EDA), KPI Dashboards, Ad-Hoc Reporting, Trend Analysis, Statistical Analysis, Data Dictionaries, Documentation
SQL & Database Systems:	SQL (PostgreSQL, SQL Server, Snowflake), Complex Queries, Aggregations, Subqueries, Joins, Relational Database Design, Data Integrity
BI & Visualization Tools:	Tableau, Power BI, DAX, Advanced Excel (PivotTables, XLOOKUP, VLOOKUP, Advanced Formulas, Charting), Power Automate
Programming & ETL:	Python (Pandas, NumPy, Selenium), Data Cleaning, Data Transformation, ETL Pipelines, REST APIs, JavaScript, C#
Cloud & Infrastructure:	Google Cloud Platform (GCP), AWS, Snowflake Cloud Platform, Docker, Kubernetes, Linux
Collaboration & Methodologies:	Git, Jira, Postman, ServiceNow, Confluence, Agile/Scrum, Root Cause Analysis, Cross-Functional Communication

PROFESSIONAL EXPERIENCE

Aprio, LLP

CAS Strategy & Technology Intern

New York, NY

June 2026 – July 2026

- Collected, transformed, and analyzed financial and operational data across 15+ advisory initiatives to construct interactive dashboards and executive reports.
- Developed workforce-planning reports and utilization dashboards using Advanced Excel and BI tools, analyzing capacity across 179+ client accounts and 120+ team members.
- Conducted data validation and quality audits across heterogeneous accounting datasets (QuickBooks Online, BASIS), eliminating reporting discrepancies and data anomalies.
- Automated repetitive reconciliation and data compilation processes, decreasing manual reporting effort by 25% while improving reporting consistency for senior advisory leaders.
- Documented data schemas, calculation procedures, and KPI metrics to establish standard operating procedures for client reporting deliverables.

Humanitarians AI Inc.

Analyst - Financial Risk & Revenue Analytics (Part-time)

Boston, MA

February 2026 – June 2026

- Executed exploratory data analysis and statistical evaluations on multi-year corporate financial records using Python (Pandas, NumPy) and SQL.
- Formulated quantitative risk assessment models and automated forensic audit reporting across five public enterprises to detect data manipulation trends.
- Cleaned, structured, and parsed unstructured textual transcripts using Python NLP routines, converting qualitative findings into structured data tables for quantitative analysis.
- Designed and prepared monthly risk summary reports and visual summaries, delivering analytical conclusions to cross-functional governance teams.

Spinabot

Data Science & Analytics Intern

Boston, MA

June 2025 – August 2025

- Extracted, cleaned, and integrated disparate CRM and operational data streams from 7+ sources into a centralized PostgreSQL database on GCP.
- Wrote complex SQL queries involving aggregations, CTEs, and joins to perform cohort analysis and evaluate operational system performance.

- Developed predictive regression and time-series forecasting models using Python, enhancing operational planning accuracy by 15% with a MAPE of 12%.
- Automated weekly business performance reports and KPI summaries, reducing stakeholder review cycles by 30% while ensuring rigorous data governance.
- Collaborated with cross-functional product and engineering teams to handle ad-hoc data queries and translate raw analytical findings into business insights.

GAVS Technologies
Software Developer / Data & Systems Engineer

Chennai, TN
Jan 2021 – Jul 2024

- Wrote comprehensive SQL validation scripts to audit, clean, and verify records during large-scale database migrations to Microsoft Dynamics 365, achieving 100% data accuracy.
- Built interactive Power BI reporting dashboards and automated workflows with Power Automate, eliminating 20 hours of manual data entry and monthly report generation.
- Diagnosed cross-system data synchronization gaps and inventory data quality issues across e-commerce product catalogs, raising inventory data accuracy by 15%.
- Validated REST API data feeds and investigated system response codes using Postman, resolving transmission errors to ensure uninterrupted data pipeline availability.
- Created automated Python Selenium scripts for catalog data quality assurance, reducing manual verification overhead by 20% across high-volume release cycles.
- Partnered with business stakeholders to gather requirements, document data workflows, and deliver recurring technical performance summaries.

PROJECTS & TECHNICAL CONTRIBUTIONS

Watertown Transit Flow Analytics & Operational Reporting Dashboard
Lead Analytics Contributor (Featured by City of Watertown)

Watertown, MA

- Ingested, cleaned, and processed over 40,000 trip and geospatial records using SQL, Advanced Excel, and Tableau across 24 hourly time bands.
- Performed exploratory data analysis and hypothesis testing to identify station imbalances, peak-demand bottlenecks, and rider travel patterns.
- Designed an interactive Tableau dashboard with dynamic filters and KPI scorecards, delivering 3 data-backed recommendations on station siting and dock capacity adopted by municipal stakeholders.

EDUCATION

Suffolk University
Master of Science in Business Analytics (STEM) – Summa Cum Laude — GPA: 3.9/4.0

Boston, MA

Anna University
Bachelor of Engineering in Electronics and Communication Engineering

Chennai, TN
