

ROHITH REDDY

Atlanta, GA | 707-276-6612 | rohith_reddy@outlook.com | LinkedIn

SUMMARY

Data Analyst & Engineer specializing in designing cloud-native data solutions that drive efficiency and actionable insights. Expertise spans **financial services, HCM, and pharmaceuticals**, with a proven track record of building **scalable data pipelines (AWS/Azure, Python, SQL)**, deploying **predictive models (XGBoost, SageMaker)**, and developing **executive dashboards (Tableau, Power BI)**. Consistently delivers measurable results, including a **40% improvement in reporting timeliness**, **25+ hours of weekly process automation**, and robust **data governance for SEC/SOX compliance**.

PROFESSIONAL EXPERIENCE

BNY Mellon | New York, NY

Data Analyst | Aug2025-Present

- Engineered automated data pipelines in **Python, PySpark, and AWS Glue** to consolidate daily transactional holdings, and securities reference data from custodial systems into **Snowflake**, improving timeliness of client investment reporting by 40%.
- Designed and deployed interactive, executive-grade dashboards in **AWS QuickSight** using calculated fields and embedded analytics to visualize portfolio performance and counterparty exposure, reducing ad-hoc data requests by 15% and enabling data-driven client reviews.
- Developed and deployed an **XGBoost model using SageMaker and MLflow** on historical transaction data to predict short-term cash flow needs, reducing manual forecasting effort by 25 hours per week and minimizing liquidity risk.
- Partnered with compliance teams to implement **data quality rules and dynamic masking in Snowflake**, automating detection of trade vs. settlement breaks and ensuring adherence to **SEC and MiFID II** requirements.
- Optimized **Snowflake performance** through clustering keys and warehouse automation, cutting cloud costs by 25% while improving query speeds by 35%.

Honeywell | Atlanta, GA

Data Engineer | Mar2025-Jul2025

- Architected Python and SQL ETL pipelines on **Microsoft Fabric** to process 10M+ daily payroll and HR records from **Workday and SAP**, improving data integrity by 30% and reducing pipeline runtime by 25%.
- Developed **Tableau** dashboards integrated with **Azure Machine Learning** models for real-time labor forecasting, enabling proactive management and contributing to a **5-7% reduction in overtime expenses**.
- Optimized transformation of multi-terabyte datasets using **PySpark in Fabric Spark pools**, accelerating data preparation for financial reporting cycles by **40%**.
- Built automated ML pipelines with **XGBoost and Scikit-learn**, deploying models as **APIs via Azure Functions** and improving precision/recall by 15% through systematic A/B testing.
- Orchestrated and monitored 50+ daily workflows using **Apache Airflow and Azure Monitor**, implementing CI/CD with **GitHub Actions** to reduce production incidents by 20%.
- Established a **self-service analytics** framework by publishing certified datasets in **Fabric's OneLake** to the **Power BI service**, enabling over **200 business users** with trusted data.

Paychex | New York, NY

Data Analyst | Mar2024-Feb2025

- Engineered ETL frameworks using **AWS Glue and Python** to process 10M+ daily payroll and tax records into **Snowflake**, improving data reliability by 35% and reducing pay-cycle processing time by 40%.
- Developed interactive **Tableau dashboards** embedded in the client portal for real-time insights into labor costs and **941 filing status**, accelerating executive reporting cycles by 50%.
- Built anomaly detection pipelines on **AWS SageMaker (Scikit-learn, PyTorch)** to identify wage-hour compliance violations across 200M+ records (AUC 0.89), reducing manual audit effort by 25 hours/week.
- Deployed predictive models (**XGBoost, Prophet**) for client payroll forecasting and **401(k) contribution** prediction, improving cash flow planning accuracy (RMSE 0.31).
- Orchestrated 50+ multi-tenant data pipelines with **Apache Airflow and CloudWatch**, ensuring 99.9% SLA data availability for HR and financial analytics.
- Automated generation of key annual tax reports (**W-2, 1099**) with integrated validation, reducing filing errors by 15% and strengthening **SOX compliance**.

Cipla | India

Data Analyst | Jan 2021 – Dec 2021

- Developed interactive **Tableau dashboards** tracking **sales force effectiveness and therapy-area performance** across 10+ regions, enhancing commercial visibility and improving target coverage by **15%**.
- Cleansed and validated **pharma datasets from IQVIA and SAP** using **Python and Great Expectations**, correcting 15,000+ records to ensure adherence to **GxP compliance and audit standards**.
- Analyzed **prescription and customer data** using **SQL and R** to generate insights on **HCP segmentation**, influencing campaigns that impacted **50,000+ healthcare professionals and patients**.

- Built **demand forecasting models (Prophet)** for 20+ product lines, reducing report turnaround by **3 days** and improving production planning to **decrease stock-outs by 12%**.
- Automated **50+ monthly reports** for the **Monthly Business Review** using **Python and Tableau Server**, freeing up **20+ analyst-hours per month** for strategic initiatives.
- Supported **Market Access** strategies by analyzing Real-World Evidence (RWE) data, contributing to insights for **Health Economics and Outcomes Research (HEOR)** projects.

Trigent Software | India

Data Analyst | Aug 2019 – Dec 2020

- Analyzed multi-source **client sales datasets** using **advanced SQL and Python (Pandas)**, delivering segmentation insights for campaigns that reached **50,000+ customers** and supported retention strategies.
- Developed **interactive Power BI dashboards with DAX** for **12+ client regional operations**, standardizing KPI tracking and reducing time-to-insight for weekly reviews by **40%**.
- Executed data cleansing for **system integration projects** using **Python and SQL**, standardizing 15,000+ legacy records to ensure **audit readiness** and build reusable data quality frameworks.
- Performed **demand forecasting using Python (statsmodels)** for **25+ IT service lines**, optimizing resource planning and reducing internal reporting cycles by **3 days**.
- Partnered with **client stakeholders** to define metrics and automate **50+ monthly reports** via **Python and Power BI Dataflows**, saving **15+ hours of manual effort monthly**.
- Supported the development of a **client reporting platform on Microsoft Azure (SQL DB, Blob Storage)**, assisting in pipeline construction to consolidate disparate data sources.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, PySpark, Scikit-learn, XGBoost, TensorFlow, PyTorch), SQL (Advanced Joins, Window Functions, Query Optimization), R, SAS, DAX

Cloud Platforms & Data Engineering: AWS (Glue, SageMaker, QuickSight, Lambda, Step Functions, S3, CloudWatch, Redshift) Microsoft Azure (Fabric, Data Factory, Synapse, ML Studio, Functions, Monitor, SQL DB)

Google Cloud Platform, Snowflake, Databricks, Delta Lake

BI & Visualization: Tableau (Server, Embedded Analytics), Power BI (DAX, Power Query, Dataflows), AWS QuickSight, QlikView, Data Storytelling

Data Orchestration & DevOps: Apache Airflow, Apache Spark, Prefect, Git, GitHub Actions, Docker, MLflow, CI/CD, OpenLineage

Databases & Data Warehousing

Snowflake, AWS Redshift, Microsoft SQL Server, PostgreSQL, Oracle, SAP HANA, Azure SQL Database

Machine Learning & AI: Scikit-learn, XGBoost, TensorFlow, PyTorch, MLflow, Time-Series Forecasting (Prophet, ARIMA), Feature Engineering, A/B Testing, Anomaly Detection, Model Deployment (SageMaker, Azure ML)

Data Governance & Compliance: Data Quality Frameworks (Great Expectations), Role-Based Access Control (RBAC), Dynamic Data Masking, Data Lineage, SOC 1/2, GDPR, GxP, SEC Compliance, SOX

Domain-Specific Systems

- **Financial:** Bloomberg Data, Custodial Systems, Avalara, Vertex
- **Payroll/HCM:** Workday, SAP SuccessFactors, ADP, QuickBooks, EDI 820
- **Pharma/Life Sciences:** IQVIA, Veeva CRM, SAP ERP, Real-World Evidence (RWE)
- **Industrial:** Microsoft Power Platform (Automate), SAP ERP

EDUCATION

Montclair State University | Montclair, NJ

Master of Science in Computer Science | Jan 2022 – Jan 2024
