SUMMARY

Data Analyst with hands-on experience in SQL, Python, and Power BI/Tableau, seeking an entry-level Data Analyst role. Built Snowflake data warehouses, SQL/Python ETL pipelines, and BI dashboards that cut manual reporting effort 40%, improved data quality 35%, and delivered \$20K+ in savings and revenue growth. MS in Business Analytics and Artificial Intelligence candidate at UT Dallas, with a track record of turning large, messy datasets into decision-ready insights for finance, sales, and operations stakeholders.

SKILLS

Programming & Querying: SQL (Joins, Window Functions, CTEs, Query Optimization), Python (Pandas, NumPy, Scikit-learn), R, Git

BI & Visualization: Power BI (DAX, Power Query), Tableau, Excel (XLOOKUP, Pivot Tables, VBA), Salesforce, KPI Design

Data Engineering: Snowflake, PostgreSQL, MySQL, ETL/ELT Pipelines, Data Modeling, Data Cleaning & Validation

Analytics Methods: A/B Testing, Hypothesis Testing, Time Series Forecasting, Cohort Analysis, Predictive Modeling

WORK EXPERIENCE

Data Analyst | Infinite Computer Solutions

Jun 2025 – Aug 2025

- Delivered \$15K in annual cost savings by diagnosing payment reporting anomalies and automating remediation workflows in Python for finance stakeholders
- Built a centralized Snowflake analytics environment integrating 150,000+ customer and sales records into a single source of truth
- Improved reporting accuracy 25% by implementing SQL-driven data quality checks with automated exception monitoring
- Reduced stakeholder reporting workload 40% by building Power BI and Excel dashboards with reusable DAX measures

Data Analyst | AUM Tradewell Private Limited

Jun 2021 – Jun 2024

- Generated \$8K in client revenue growth by translating customer and sales analysis into pricing and marketing recommendations
- Reduced reporting errors 35% by standardizing 90,000+ customer and sales records across 4 business units through SQL-based ETL pipelines
- Cut manual review time 20% by launching self-service Tableau dashboards with 20+ visualizations for independent stakeholder use
- Improved data accuracy 30% by performing root-cause analysis on reporting discrepancies and implementing upstream validation workflows

ACADEMIC PROJECTS — UT DALLAS

- Mutual Fund Analysis Dashboard: Ranked 2,500+ mutual fund schemes on risk/return using Python (Pandas, Scikit-learn) and built an interactive Power BI dashboard narrowing selections to the top 30 data-backed picks
- Practical SQL App Store Analysis: Analyzed 7,197 App Store apps with SQL/SQLite (joins, CTEs, window functions) to surface how pricing, genre, and language support drive user ratings
- Safety Intelligence Dashboard: Built an NLP pipeline (spaCy) to parse 40,000+ OSHA injury narratives and developed Power BI dashboards enabling an estimated \$10K reduction in incident costs
- Smart Lending — Credit Risk Modeling: Trained and benchmarked XGBoost and Neural Network models on 80,000+ financial records, evaluated via precision, recall, and F1-score, reducing projected loan defaults by 10%

EDUCATION

Master of Science, Business Analytics and Artificial Intelligence

Aug 2024 – May 2026

The University of Texas at Dallas | Dallas, TX — GPA: 3.76 | Dean's Excellence Scholar

LEADERSHIP

Teaching Assistant – Physics | The University of Texas at Dallas

Jan 2026 – May 2026

- Analyzed performance trends across 120 students, flagging misconceptions and enabling early intervention
- Communicated complex quantitative concepts to a large student cohort, strengthening data storytelling and stakeholder-facing communication skills
