Edison, New Jersey 08820 | 816-609-2965 | krushika100@gmail.com | <https://www.linkedin.com/in/rushika-karnati-74399833b/>

PROFESSIONAL SUMMARY

Software Engineer **with 3+ years of experience in** full-stack development, **specializing in** Java, JavaScript, ReactJS, Angular, and Spring Boot. **Proven ability to** optimize system efficiency by 40% **and** reduce deployment time by 50% **using CI/CD automation. Skilled in** AWS cloud computing, microservices, and RESTful APIs **for seamless integration. Experienced in** Agile development, debugging, and performance optimization, **delivering** secure, user-friendly solutions. Dedicated to leveraging emerging technologies **to drive innovation and enhance business operations.**

TECHNICAL SKILLS:

Programming Languages:	Java 17/11/8/7, JavaScript, .Net C#, Python, C++, TypeScript
J2EE Technologies:	Servlets, JSP, JSTL, JDBC, Strings, Multi-Threading, Arrays, Java Networking
Frameworks:	Spring Boot, Spring Security, Spring Cloud, Spring Data, Spring MVC, Hibernate, Struts, JSF
Amazon Web Services:	EC2, S3, Lambda, RDS, ELB, SQS, SNS, AWS IAM, CloudWatch, Elastic Beanstalk, CloudFront
Application/Web Server:	Apache Tomcat, Apache HTTP Server
Web Services:	Restful, SOAP
Messaging Queues:	ActiveMQ, Apache Kafka, JMS
Version Control:	Git, GitHub, Bitbucket
Agile Tools:	Jira
Web Technologies:	HTML, CSS, ReactJS, React Native, AngularJS, NodeJS, JavaScript, jQuery, AJAX
Build Tools & CI/CD Tools:	Jenkins, Docker, Kubernetes, Maven
Database Management:	MySQL, PostgreSQL, MongoDB, Oracle SQL,
Testing & Monitoring Tools:	JUnit, Mockito, Selenium, Postman
IDE Tools:	Spring Tool Suite (STS), Eclipse, NetBeans and IntelliJ
Architectures & Patterns:	Microservices, Monolith to Microservices Migration, Design Patterns (Singleton, Factory, DAO)

EXPERIENCE

Software Engineer | Caltech Solutions LLC, San Jose, California | August 2024 – Current

- Make use of J2EE technologies (JSP, JSTL, JDBC, and Servlets) to create and manage reliable online applications.
- Designed and developed **10+** responsive web pages using Bootstrap, improving user engagement by **30%**.
- Integrated and consumed **15+** RESTful APIs, enhancing data retrieval efficiency by **40%**.
- Optimized web performance, reducing page load time by **25%** through lazy loading and caching strategies.
- Debugged and resolved **95%** of front-end issues using Chrome DevTools, Jest, and Cypress.
- Automated build, test, and deployment pipelines with Jenkins, decreasing deployment time by **50%**.
- Spearheaded the development of 12 responsive web applications utilizing React and Node.js, resulting in a 30% increase in user engagement based on user surveys completed at the end of each session.
- **Orchestrated** seamless **RESTful API integration**, improving data interactions by **40%**.
- **Boosted system efficiency** by implementing **lazy loading, caching strategies, and microservices architecture.**

Software Engineer | Pataak Pvt Ltd, India | July 2021 – December 2022

- Developed and maintained Java 11+ code, improving application performance by **35%**.
- Led Agile sprints with cross-functional teams, increasing sprint completion rate by **20%**.
- Conducted **100+** software tests and debugging sessions, reducing production issues by **40%**.
- Migrated applications to AWS, cutting operational costs by **30%** through efficient resource utilization.
- Implemented microservices architecture, increasing system scalability by **50%**.
- Hardened application security by configuring Spring Security with OAuth 2.0 and JWT, ensuring secure communication between microservices and external APIs; now used by 12 teams.
- **Revolutionized cloud migration** by implementing **AWS Lambda**, reducing operational costs by **30%**.

Intern as Solution Engineer | Jaitra Technologies, India | January 2021 – June 2021

- Assisted in developing **BIPOLAR ION DISINFECTING TECHNOLOGY**, contributing to a **20%** reduction in airborne contaminants.
- Streamlined project management tasks, improving sprint planning efficiency by **15%**.
- Designed and delivered product demos, enhancing client satisfaction by **25%**.

CERTIFICATIONS

- Certified in Mobile making and IOT, ITC-IIT, Mumbai
- Designed Ornithopter, AMZ, India.
- Certified in AI For Everyone, deeplearning.AI.
- Certified in Cisco (CCNA)- Routing and Switching, Cisco Network Academy
- Certified in Google Cloud Readiness Program.

EDUCATION

University of Central Missouri, Warrensburg, MO

January 2023 – May 2024

Master's in Computer Science

ACADEMIC PROJECT

- A team of 4 Participated in KPIT SPARKLE and recognized as “Emerging Innovator” for inventing Smart Helmet using IOT. the main aim of this project is to reduce accidents we use Sensors embedded in the helmet track vital signs (e.g., heart rate, smell, temperature, and brain activity).
- **Database Project:** Created a student activity website where students have to login and register for the events happening in the college. Here we used Figma which is a cloud-based design tool that is widely used for user interface (UI) and user experience (UX) design, as well as prototyping and collaboration.
- Project on Creating a Smart Irrigation System using Java involves developing an application that allows farmers and clients (or stakeholders) to monitor, control, and optimize irrigation processes while tracking various stages of crop cultivation, investment, and transportation.
