Pittsburgh, USA | +1 878-666-5882 | saikrishna.nallamothu@outlook.com | [LinkedIn](#)

SUMMARY

Software Developer with 3+ years of experience building **scalable applications** in **finance, consulting, and energy** sectors. Proficient in **Java, Spring Boot, REST APIs, and microservices**, delivering solutions that process **50,000+ daily events**. Experienced in **cloud deployment** using **AWS, Docker, and Kubernetes**, and in writing **automated tests** with **JUnit, Mockito, and Selenium**. Skilled in designing efficient **algorithms**, implementing **data structures**, and developing **high-performance software** across **multi-platform environments**.

EXPERIENCE

Java Full Stack Developer | Uber | TX, USA

August 2024 – Present

- Designed **RESTful APIs** using **Java Spring Boot** and rolled out over 15 **microservices** in **Kubernetes** clusters to handle user transactions across 5+ enterprise modules, leveraging **MySQL** and **MongoDB** for data persistence.
- Streamlined builds and deployments using **Jenkins** pipelines and **Terraform**, improving delivery across 3 staging environments and reducing manual intervention by 10 hours weekly.
- Integrated **Kafka** event streams to process over 50,000 daily messages, enabling real-time service communication and enhancing system responsiveness for core business workflows.
- Developed 25+ reusable UI components using **Angular 14** and secured API access via **OAuth2** and **JWT**, improving session control and reducing unauthorized access incidents across 2 platforms.
- Monitored 100+ hosted services using **AWS CloudWatch** and performed log tracing through the **ELK stack**, identifying and resolving 12 recurring production issues per month.

Java Full Stack Developer | BNY Mellon | TX, USA

February 2024 – August 2024

- Migrated monolithic **Java** services to **Spring Boot** microservices provisioned on **AWS**, reducing system downtime across 3 critical applications and improving scalability for over 500 concurrent users, with **MySQL** and **MongoDB** for persistent data.
- Created responsive frontends using **Angular**, integrating **REST APIs** to deliver 15+ data-driven UI components, enhancing user interaction across multiple user-facing modules.
- Implemented **CI/CD workflows** using **GitLab pipelines** and containerized services with **Docker**, expediting deployment cycles by 4 hours per iteration across 2 production environments.
- Enhanced system security by incorporating **token-based authentication** and **TLS encryption**, and collaborated with QA teams to automate test cases using **JUnit** and **Selenium**, reducing manual validation effort for 120+ test scenarios.

Software Developer | Airbnb | India

June 2021 – July 2022

- Engineered scalable modules using **Java 11, Spring MVC**, and **REST APIs** to support listing and booking features accessed by over **10,000 users** monthly.
- Built responsive UI components with **React 17**, applying **virtual DOM optimization** and **lazy loading**, which reduced workflow execution time by **3.2 seconds** across **7 major user journeys**.
- Executed CRUD operations and structured data models using **MongoDB** and **PostgreSQL**, enabling seamless transactions across **4 core service layers**.
- Orchestrated asynchronous communication by integrating **Kafka** and **RabbitMQ**, ensuring reliable message delivery across **3 microservices** handling more than **20,000 events** daily.
- Deployed backend services on **AWS EC2** with **Docker containers** and configured **Elastic Load Balancer (ELB)** to manage traffic across multiple instances, sustaining peak traffic of **1,200 concurrent sessions**.

TECHNICAL SKILLS

- Languages & Programming:** Java , JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- Frameworks & Libraries:** Spring Boot, Hibernate, JPA, React.js, Angular, Bootstrap, SASS, jQuery
- Backend & APIs:** RESTful APIs, Spring MVC, Node.js (secondary), Express.js, Swagger UI, Postman
- Databases:** PostgreSQL, MongoDB
- Cloud & DevOps Tools:** AWS (EC2, Lambda, S3), Azure DevOps, Google Cloud Run, Docker, Git, GitHub, Jenkins
- Testing & Debugging:** JUnit, Mockito, Selenium, Postman, Unit Testing, Form Validation
- CI/CD & Deployment:** GitHub Actions, Jenkins, Docker, Azure Pipelines
- Design & Prototyping:** Figma, Responsive Web Design
- Development Practices:** Agile (Scrum), Git, Jira, Version Control

PROJECTS

E-Commerce Order Management System: Architected a full-stack e-commerce platform using **Java, Spring Boot, MySQL, and Angular** with 10+ **RESTful APIs, JWT authentication**, and **role-based access control**, deployed via **Docker** on **AWS EC2** to support 500+ concurrent users across 3 user tiers.

Healthcare Appointment Scheduling Platform: Constructed backend logic with **Java, Spring MVC, and JSP** for 50+ doctor schedules, integrated **Oracle** on **AWS RDS**, and implemented **CI/CD with Jenkins, JavaMail, Spring Scheduler**, and 30+ **JUnit tests** to ensure system reliability.

Real-Time Vehicle Tracking Dashboard: Developed an interactive **React** dashboard with **Google Maps API** to track 25+ delivery vehicles, using **Kafka, MongoDB, and AWS Lambda** for alerts, and integrated **Spring Boot** and **Node.js REST APIs** to handle 10+ daily route deviations.

EDUCATION

Master of Science in Computer Technology | Eastern Illinois University | USA

August 2022 – December 2023

Bachelor of Engineering in Mechanical Engineering | Jawaharlal Nehru Technological University | India

August 2016 – December 2020

CERTIFICATIONS

AWS Certified Developer – Associate

Oracle Database SQL Certified Associate
