PROFESSIONAL SUMMARY

Junior Data Analyst with 4 years of experience collecting, cleaning, validating, and analyzing large datasets from multiple sources. Strong proficiency in SQL, with hands-on experience developing and maintaining dashboards, reports, and visualizations using BI tools to communicate business insights.

Skilled performing statistical analysis to identify trends and opportunities, automating recurring reports, and monitoring KPIs to provide actionable insights. Holds an MS in Business Intelligence and Analytics from Stevens Institute of Technology and a Microsoft PL-300 Power BI Data Analyst certification.

SKILLS

Programming:

SQL, Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), DAX, R

Analysis & Reporting:

Statistical Analysis, Trend & Pattern Identification, KPI Monitoring, Ad Hoc Analysis, Data Definition & Methodology Documentation

BI & Tools:

Power BI, Tableau, Advanced Microsoft Excel, SQL Server, Star Schema Modeling

Quality & Collaboration:

Data Accuracy & Consistency, Report Automation, Cross-functional Collaboration (Finance, Sales, Marketing, Operations), Priority & Deadline Management

PROFESSIONAL EXPERIENCE

Junior Data Analyst

06/2024 – Present

Harrisonville, MO (Remote)

- Collected, cleaned, and validated large transaction datasets from multiple sources, partnering with sales, finance, and operations stakeholders to define reporting requirements.
- Developed and maintained Power BI dashboards using star schema data models, creating reports and visualizations to communicate insights across the organization.
- Performed statistical analysis using SQL and Python to identify trends, patterns, and business opportunities within regional performance and cost data.
- Created and automated recurring reports on forecast vs. actual and variance analysis using Python, improving operational efficiency of reporting workflows.
- Analyzed large-scale transaction data using Python (pandas, NumPy) and Excel, monitoring KPIs and providing actionable insights to leadership.
- Built regression-based models using scikit-learn to evaluate factors influencing self-checkout adoption, documenting data definitions and methodologies.
- Conducted ad hoc analyses on supply chain and inventory data, ensuring data accuracy and consistency across systems.

Business Data Analyst, Studio Labs (Industry Capstone Program)

01/2024 – 05/2024 — New York, NY

- Collected and validated multi-source project data from Jira, Tempo, EazyBI, and Excel using Python and APIs to support reporting analysis.
- Built and evaluated CART and Random Forest models to identify key cost overrun predictors, achieving 80% classification accuracy with documented precision/recall and feature importance analysis.
- Performed statistical analysis and feature engineering — handling missing values, encoding target variables, and correlation analysis — to prepare accurate reporting inputs.
- Analyzed 32 fixed-scope projects to quantify budget-to-actual discrepancies, identifying trends and opportunities for company leadership.
- Developed BI reports and cluster-based visualizations comparing estimated vs. actual time by category, monitoring KPIs for resource allocation.
- Collaborated with COO, CTO, and Technical Operations stakeholders in an agile environment, supporting ad hoc analysis requests throughout delivery.

Business Analyst Trainee, Anira Solutions

05/2021 – 11/2022 — Hyderabad, India

- Partnered with business users and senior analysts to translate operational needs into structured reporting solutions tracking key business metrics.

- Reviewed data collection workflows to identify gaps and redundancies, recommending standardization improvements that reduced inconsistencies across datasets.
- Wrote and optimized SQL queries to extract, clean, and validate large datasets, ensuring accuracy and consistency across reporting pipelines.
- Designed and maintained Power BI and Excel dashboards to monitor operational KPIs, surfacing actionable insights for business stakeholders.
- Developed process documentation and reporting handoff materials to ensure continuity across reporting cycles and support team onboarding.
- Participated in QA and UAT testing, validating report outputs against source data and resolving discrepancies with cross-functional teams prior to deployment.

PROJECTS

Data Classification and Feature Optimization

05/2023

- Applied Genetic Algorithm-based feature selection (GeneticSelectionCV) to identify the most predictive features from a 30-variable tumor dataset, reducing model complexity and improving classification efficiency.
- Applied Linear Discriminant Analysis in Excel Solver using evolutionary optimization, maximizing a custom punishment function to prioritize minimizing critical misclassification errors over raw accuracy.
- Evaluated model performance using Python (scikit-learn), achieving 92% classification accuracy and demonstrating business-context-driven objective function design.

Autonomous PPT Generator

08/2021 – 05/2022

- Leveraged pre-trained BART and XLNet transformer models for abstractive text summarization, scraping Wikipedia content using BeautifulSoup to generate slide-ready bullet points from raw web data.
- Developed an end-to-end NLP pipeline integrating web scraping, text classification, and pre-trained summarization models (BART, BERT, XLNet), comparing ROUGE scores to select the highest-performing one.
- Automated PowerPoint generation using python-pptx, combining NLP-summarized content with scraped images into structured slide decks demonstrating applied AI-driven document automation.

EDUCATION

Stevens Institute of Technology

Master's in Business Intelligence and Analytics

01/2023 – 05/2024

GPA: 3.83/4

Hoboken, United States

Minor: Financial Decision Making

Visvesvaraya National Institute of Technology

Bachelor of Technology in Electronics and Communications Engineering

08/2018 – 05/2022 — Nagpur, India

CERTIFICATIONS

PL-300 Power BI Data Analyst Associate

Six Sigma Green Belt

Microsoft

Kennesaw State University
