

Sai Poojitha Anuvala Setty

DATA ANALYST

VA, USA | (970) 292-1787 | saipoojitha432@gmail.com | [LinkedIn](#)

SUMMARY

- **Data Analyst with 3+ years of experience** in healthcare and financial domains, specializing in data integration, pipeline optimization & analytical reporting using **Apache Airflow, AWS, PostgreSQL & Power BI** to drive compliance and business efficiency.
- Expert in developing end-to-end ETL and data quality frameworks leveraging **Python (Pandas, NumPy), Scikit-learn, and JIRA**, ensuring accurate CMS submissions and predictive insights for fraud detection and claim adjudication.
- Skilled in regulatory and risk analytics, building dynamic reporting systems with **Informatica, Microsoft Azure, Snowflake, and Tableau**, enabling leadership to monitor AML/KYC compliance and optimize decision-making.
- Proficient in data automation, visualization, and model deployment through **MySQL, Alteryx, Salesforce CRM, TensorFlow, and Advanced Excel**, delivering audit-ready intelligence and accelerating enterprise data operations.

SKILLS

Languages:	Python (Pandas, NumPy), SQL (JOINS, CTEs), Scala
Databases & Warehousing:	PostgreSQL, SQL Server, MySQL, MongoDB, Oracle, Snowflake
ETL & Data Integration:	Apache Airflow, Informatica, Alteryx, SSIS, Data Transformation, Data Wrangling
Data Visualization & Reporting:	Tableau, Power BI, Excel (Pivot Tables, Macros, VLOOKUP), BI-calculated fields
Cloud & Big Data Technologies:	AWS (EC2, S3, Redshift)
Business & CRM Tools:	Salesforce CRM, ServiceNow, Data Storytelling, Business Analysis
Project Management & Workflow:	JIRA, SDLC, Agile, Waterfall, UAT, JAD, Git, GitHub
Healthcare Domain Knowledge:	EHR Datasets, HIPAA Compliance, Data Governance, Root Cause Analysis
Certifications:	AWS Cloud Practitioner

WORK EXPERIENCE

Blue Cross Blue Shield, VA, USA | Data Analyst

Aug 2024 – Present

- Developed ETL pipelines with Apache Airflow on **AWS**, integrating over 5M+ **EHR** and claims records from PostgreSQL, reducing pipeline runtime by 38 minutes and improving adjudication efficiency across regional workflows.
- Created **Power BI** dashboards with secure role-based access, supporting 20+ pharmacy executives in denial trend monitoring and reimbursement optimization, improving visibility and collaboration across payer-provider networks.
- Standardized healthcare claims data using **Python (Pandas, NumPy)**, applying schema harmonization techniques that enhanced CMS compliance reporting accuracy by **17%** and streamlined HIPAA-audited submissions.
- Designed predictive fraud detection models with **Scikit-learn**, proactively identifying suspicious claims and reducing Medicare/Medicaid investigation turnaround for compliance oversight teams by 23%.
- Applied **statistical outlier detection** and BI-driven anomaly rules, delivering actionable exception reports that cut manual review efforts by 21% while strengthening pharmacy transaction oversight across high-volume systems.
- Managed analytics deliverables in **JIRA**, coordinating Agile sprints and backlog priorities with strong communication and organizational skills to ensure on-time delivery of compliance dashboards and patient safety enhancements.

Deloitte, India | Data Analyst

Aug 2021 - Jun 2023

- Developed **AML** and **KYC** compliance workflows in Informatica on **Microsoft Azure**, implementing schema validation and Snowflake data loads that reduced monthly reporting preparation time by 29% across 3 audit cycles.
- Built **Tableau** dashboards with geospatial analytics, empowering risk leaders in 15 regional branches to assess credit exposure and prioritize high-risk portfolios, fostering data-driven decision-making and analytical insight.
- Enhanced reconciliation queries in **MySQL** through indexing and performance tuning, optimizing data retrieval for 42 portfolio datasets and ensuring consistency in cross-divisional financial reporting.
- Utilized **Salesforce CRM analytics** to automate onboarding oversight, configuring triggers that detected 120 high-risk accounts early and streamlined compliance investigation workflows.
- Delivered KPI dashboards in **Advanced Excel** using Pivot Tables and Macros, presenting executive summaries on liquidity and loan trends with strong attention to detail and presentation skills.
- Designed **Alteryx workflows** to automate risk data preparation and improve validation speed, empowering analysts to make faster regulatory decisions and improving stakeholder engagement during audits.
- Collaborated cross-functionally on **A/B testing** using Python and SQL to evaluate process variations, identifying statistically significant workflow improvements and promoting a culture of analytical experimentation.
- Trained **TensorFlow** classification models for fraud detection, improving compliance prediction accuracy by 18% and enhancing audit readiness across 200+ enterprise portfolios.

EDUCATION

Master of Science in Data Analytics Engineering

Aug 2023 – May 2025

- George Mason University, Fairfax, USA

Bachelor of Technology in Electronics and Communication Engineering

Aug 2019 - May 2023

- B V Raju Institute of Technology, Hyderabad, India
