

SAI SUJITH KANDATI

Certified AWS Associate Solution Architect & AWS Developer Associate

+17032967287 | sujithkandati@gmail.com | [LinkedIn](#) |

SUMMARY

- Versatile **Software Engineer** with expertise in **backend and full-stack development**, building scalable applications using **Python, Django, Flask, and React.js**.
- Proficient in **cloud computing, microservices, containerization (Docker, Kubernetes)**, and **CI/CD automation** for efficient software delivery.

EDUCATION

Masters in Computer Science, GPA: 3.93/4 , Arizona State University ,Tempe, AZ	Aug 2022 – May 2024
Bachelors in Computer Science and Engineering , Amrita School of Engineering, Bangalore	Aug 2018 – May 2022

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (Node.js), TypeScript, Java, C++

Web Frameworks: Django, Flask, FastAPI, Express.js, Next.js, React.js, Angular

API Development: RESTful APIs, GraphQL, gRPC, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Firebase

Cloud DevOps: AWS (EC2, S3, Lambda, API Gateway, DynamoDB, ECS), Azure (Functions, App Services, CosmosDB)

Infrastructure CI/CD: Docker, Kubernetes, Terraform, AWS CDK, GitHub Actions, Jenkins, GitLab CI/CD

Microservices Serverless: AWS Lambda, Kubernetes, RabbitMQ, Kafka, Event-Driven Architecture

Authentication Security: OAuth2, JWT, RBAC, SSO, OpenID Connect, HTTPS, TLS

Testing Debugging: PyTest, Jest, Mocha, Cypress, Postman, Selenium

Monitoring Logging: Prometheus, Grafana, AWS CloudWatch, Datadog, ELK Stack (Elasticsearch, Logstash, Kibana)

Version Control Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Agile, Scrum

PROFESSIONAL EXPERIENCE

- | | |
|---|---------------------|
| Software Engineer, Epics at ASU | July 2024 - Present |
| <ul style="list-style-type: none">Developed a real-time search feature with intelligent query suggestions and related links, boosting user engagement by 25%. Built using Python (Flask) and PostgreSQL.Designed and implemented RESTful APIs with python and flask, enabling seamless business logic execution.Built an interactive task management dashboard with automated deadline tracking and reminders, increasing task completion by 30%.Developed a responsive web UI using React.js, Bootstrap, and JavaScript, ensuring high-performance frontend experiences.Implemented CI/CD pipelines using Jenkins, automating deployment workflows and improving system reliability.Engineered and deployed scalable full-stack applications using Flask/Django, React.js, and AWS, leading to a 30% increase in engagement. | |
| Cloud Gen AI Developer, ASU Cloud Innovation Center | Jul 2023 - May 2024 |
| <ul style="list-style-type: none">Designed and deployed a Full Stack AI-powered chatbot using Python on AWS, automating workflows and reducing manual tasks by 80 hours per week.Implemented API Gateway and AWS Lambda for serverless deployment, leveraging the Langchain framework and Retrieval-Augmented Generation (RAG) for efficient real-time query response.Integrated Claude-2 LLM through AWS Bedrock for intelligent response generation, optimizing client operations such as insurance policy checks and interactive training programs.Streamlined infrastructure provisioning and deployment using Infrastructure as Code (IaC) with AWS CDK in TypeScript, reducing deployment time by 70%. | |
| Software Engineer, Amrita School of Engineering | Jan 2022 – May 2022 |
| <ul style="list-style-type: none">Developed a data visualization platform integrating Parquet data from the Data Engineering team and interactive reports from the Data Analytics team for seamless user access.Built a full-stack web app using Django, React.js, and REST APIs with dynamic filters and real-time updates.Optimized data retrieval and filtering using PostgreSQL, Parquet, and AWS S3 for scalable storage.Containerized and deployed with Docker and Kubernetes for high availability and fault tolerance.Implemented CI/CD pipelines with Jenkins, GitHub Actions, and Terraform for automated deployments.Integrated AWS Lambda and API Gateway for serverless processing and scalability.Implemented RBAC for secure user authentication and access control.Enhanced frontend performance with React.js Suspense, Redux, and Lazy Loading, improving UX and reducing load times. | |
