

SAILEELA JOSYULA

Cincinnati, Ohio 45220 | +15134625203 | saileelajosyula@gmail.com | [LinkedIn URL](#)

SKILLS & CERTIFICATIONS

- **Programming Languages:** Java, Python, C++, SQL, JavaScript, TypeScript
- **Frontend Development:** React.js, Angular, HTML, CSS
- **Backend Development:** Spring Boot, Node.js, Django, RESTful APIs, SOAP
- **Cloud & DevOps:** GCP, AWS (Lambda, S3, EC2, CloudWatch), Docker, Kubernetes, Terraform, CI/CD (Jenkins, GitLab)
- **Database Management:** PostgreSQL, MySQL, MongoDB, Oracle SQL
- **Monitoring & Automation:** Splunk, Kibana, Dynatrace, CloudWatch, ServiceNow, Selenium
- **Software Development:** Data Structures & Algorithms, Distributed Systems, OOP, Multithreading
- **Testing & Software Development Methodologies:** JUnit, Postman, API Testing, Agile, Scrum
- **Certifications:** AWS Cloud Essentials, Microsoft Certified: Azure Data Scientist Associate

WORK EXPERIENCE

Senior Software Engineer | Capgemini (Client: Statefarm), Hybrid

Jul 2021 – Jul 2023

- Engineered scalable microservices using Java, Spring Boot, and REST APIs, improving system modularity, and reducing response times by 30%. Developed Selenium automation scripts, reducing manual effort by 40% and accelerating report generation.
- Implemented distributed caching and optimized data structures & algorithms, enhancing system efficiency, and reducing compute latency by 25%.
- Automated CI/CD pipelines using Jenkins and GitLab, cutting deployment times by 35% while ensuring zero-downtime releases.
- Led system debugging and performance tuning, identifying, and resolving 90% of production issues using Splunk, Kibana, and Dynatrace.
- Designed and optimized SQL & NoSQL databases (PostgreSQL, MongoDB), reducing query execution times by 25% through indexing and partitioning strategies.
- Reviewed and optimized codebase, ensuring adherence to best practices and improving maintainability by 40%.

Full Stack Development Intern | Capgemini, Hybrid

Nov 2020 – Apr 2021

- Built an Online Courier Management System using Java, Spring Boot, and Angular, automating deliveries and reducing manual handling time by 50%. Integrated real-time tracking features with RESTful APIs and Web Sockets, improving tracking accuracy by 30%.
- Enhanced database performance in Oracle SQL, reducing query response times by 20% through indexing and query optimization. Strengthened authentication & security best practices, ensuring 100% compliance with data protection regulations.

PROJECTS

Scalable Vegan Restaurant Finder App

Technologies: AWS (EC2, S3, RDS), Docker, Kubernetes, Java, Spring Boot, React Native, PostgreSQL.

- Built a cloud-native platform capable of handling 50,000+ daily transactions, ensuring high availability and low-latency services. Integrated AI-powered recommendation systems with OpenAI APIs, driving a 35% increase in user engagement and personalized suggestions.
- Optimized system architecture with AWS auto-scaling and fault-tolerant designs, reducing operational costs and ensuring 99.9% uptime.

Real-Time Fraud Detection System

Technologies: Python, Java, Kafka, AWS Lambda, PostgreSQL, Spark, TensorFlow

- Developed an AI-powered fraud detection system that identifies fraudulent transactions in real time, reducing false positives by 40%. Integrated streaming data pipelines using Kafka and Spark, enabling real-time anomaly detection, and minimizing transaction processing delays by 35%.
- Trained machine learning models with TensorFlow and Scikit-learn, achieving a 90% accuracy rate in detecting fraudulent activities. Deployed scalable microservices on AWS Lambda, ensuring 99.9% system availability and reducing operational costs by 25%.

EDUCATION

Master of Science, Information Technology

Aug 2023 – Dec 2024

University of Cincinnati, Cincinnati, OH

- Cumulative GPA: 4.0/4.0
