

SALONI KHADELWAL

Chicago, IL | (312) 774-5853 | [Mail](#) | [LinkedIn](#) | [Website](#)

Analytics professional with expertise in healthcare, finance, and operations. Skilled at bridging business needs and data solutions through actionable insights, stakeholder discovery sessions, and modern data pipelines (dbt + Snowflake), enabling faster, data-driven decisions.

EDUCATION

Master of Science, Applied Data Science, University of Chicago

Coursework: Big Data, Data Engineering, Data Mining, Data Visualization, Health-Care Analytics, Linear and Non-Linear Models, Machine Learning, NLP, Python, Statistical Analysis, Time Series & Forecasting

Bachelor of Technology, Computer Science, Indore Institute of Science & Technology

WORK EXPERIENCE

Senior Data Analyst | Cigna Healthcare, Chicago

(Mar '24 – Present)

- Led discovery sessions with finance stakeholders to frame budget accuracy challenges, then identified \$100K+ in redundant spend across 40K+ reports by building dbt models in Snowflake, improving budget accuracy by 15% and optimizing resource allocation.
- Accelerated claim approvals by 20% by automating high-cost triage processes with Python and SAS, leveraging Snowflake pipelines for scalable data validation and reducing manual intervention.
- Partnered with operations leaders to scope denial bottleneck issues, then designed automated Power BI dashboards on dbt-transformed Snowflake data, cutting denial processing time by 30% and improving real-time decision-making.
- Enhanced billing accuracy by 25% by auditing and validating clinical datasets across Oracle, Snowflake, and NoSQL systems, improving ETL pipeline reliability and ensuring accurate financial reporting.

Data Scientist | Capstone Project | UChicago Medicine, Chicago

(Mar '23 – Dec '23)

- Designed an AI-powered radiology assistant to reduce documentation workload by 40%, enabling faster report turnaround and improving clinician efficiency.
- Partnered with clinical stakeholders to curate and label 40K+ imaging records, enhancing data quality for supervised LLM fine-tuning.
- Fine-tuned clinical LLMs (Mistral, MedAlpaca, BioGPT) using QLoRA and PEFT, reducing inference costs by 30% while improving output accuracy and coherence.
- Built dashboards and automated reporting pipelines for clinical workflows, reducing manual reporting effort by 50% and improving visibility into turnaround times by 20%.

Data Science Research Assistant | University of Chicago, Chicago

(Oct '22 – Jan '23)

- Engineered a real-time audio classification tool to detect ICU-critical alarms amid ambient noise, improving clinician responsiveness and patient safety in high-acuity settings.
- Achieved 90%+ detection accuracy by leveraging VGGish CNNs and log-mel spectrogram features, and enhanced overall performance (F1 = 0.85) through XGBoost ensemble integration.
- Reduced model latency by 50% through optimization and edge deployment strategies, enabling low-lag inference for continuous monitoring systems.

Data Scientist | SpidyTech, India

(Mar '20 – Mar '22)

- Saved 800+ analyst hours annually by automating reporting workflows with SQL, Python, and **dbt models deployed in Snowflake**, improving data pipeline transparency and team productivity by 35%.
 - Reduced operational overhead by 15% by building Power BI dashboards on top of **Snowflake tables**, forecasting demand and optimizing workforce planning.
 - Improved cross-department visibility by integrating multiple datasets into Snowflake, creating standardized dbt models that accelerated business decisions.
-

PROJECTS

AI-Driven Workforce Transformation:

Goal: Built NLP-based analysis pipelines and dashboards to identify high-risk roles for AI automation, guiding reskilling strategies, prioritizing workforce allocation, and enabling self-service analytics for cross-functional teams.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** SQL, Excel (pivot tables, macros), Power BI, Tableau, Looker, QuickSight, Matplotlib, Seaborn
- **Data Engineering:** DBT, ETL Pipelines, Data Warehousing, Data Modeling, Feature Engineering
- **Programming & Scripting:** Python, SAS, R, Excel
- **Collaboration & Reporting:** Agile, Executive Reporting, Stakeholder Communication
- **Cloud & Tools:** AWS (Redshift, Athena, S3, DynamoDB), GCP, Azure
