

Sanjay Reddy

Data Analyst

USA | +1 (571)-530-8767 | sanjayreddy0728@gmail.com [Linkedin](#)

SUMMARY

- Data Analyst with 4.5+ years of experience delivering data-driven insights across BFSI and healthcare domains using SQL, Python, and BI tools.
- Specialized in analyzing large-scale transactional and healthcare datasets to support fraud analytics, risk monitoring, regulatory reporting, and operational decision-making.
- Strong expertise in advanced SQL, Python (Pandas, NumPy), Power BI (DAX), and Snowflake to build scalable analytical datasets and executive dashboards.
- Proven experience in A/B testing, statistical analysis, KPI development, and stakeholder reporting to drive measurable improvements in revenue, risk reduction, and customer experience.
- Hands-on contributor across Agile SDLC environments, partnering with business, risk, and data engineering teams to translate requirements into actionable insights.

TECHNICAL SKILLS

Data Analytics & BI: SQL (T-SQL, PL/SQL, PostgreSQL), Python (Pandas, NumPy, Scikit-Learn, Statsmodels), Power BI (DAX, Power Query), Tableau Cloud, Excel (Advanced, Pivot Tables, Power Pivot, VBA/Macros), SSRS, KPI Development, Data Visualization, Dashboarding, Ad-hoc Analysis, Exploratory Data Analysis (EDA), Data Storytelling, Metric Definition

Data Engineering & Cloud: Snowflake, AWS (S3, Lambda, Redshift), Microsoft Azure (SQL, Data Factory), ETL Pipeline Development, Dimensional Modeling, Data Normalization, Data Quality & Validation, REST APIs

Statistics & Modeling: Regression Analysis, Time Series Forecasting, Hypothesis Testing, A/B Testing, Clustering (K-means), Predictive Modeling, Segmentation, Forecasting, Statistical Analysis

Business & Domain Analytics: Fraud Analytics, Risk Analytics, Financial Analytics, Revenue Analysis, Enrollment & Eligibility Analytics (Healthcare), Compliance Analytics (HIPAA, PCI-DSS, SOX), Operational Analytics, Decision Support, Customer Experience Analytics

Collaboration & Frameworks: Agile (Scrum), SDLC, Jira, Confluence, Git/GitHub, BRD/FRD Documentation, Executive Storytelling & Presentation

Soft Skills: Stakeholder Management, Problem-Solving, Critical Thinking, Cross-functional Collaboration, Adaptability.

WORK EXPERIENCE

Capital One Financial Corporation, USA | Financial Data Analyst

Jan 2025 – Present

- Analyzed 200M+ monthly credit and debit card transactions using SQL and Snowflake to support fraud analytics, risk monitoring, and executive KPI reporting, including fraud loss rate, authorization rate, and customer decline rate.
- Performed ad-hoc analysis and exploratory data analysis (EDA) across transaction channels, merchant categories, geographies, and customer segments to identify fraud trends, anomalies, and root causes.
- Partnered with data science and risk teams to validate fraud detection models using AUC, precision-recall, KS, and false-positive analysis, contributing to a 6–8% improvement in model effectiveness while meeting regulatory thresholds.
- Designed and maintained Power BI dashboards (DAX, Power Query) delivering fraud performance metrics such as fraud capture rate, alert-to-fraud conversion, and customer friction, enabling data-driven policy decisions by senior leadership.
- Conducted A/B testing and controlled experiments on fraud decision thresholds and rule strategies, analyzing treatment vs. control groups to optimize authorization accuracy and improve customer experience with statistically significant results.
- Built and optimized reusable SQL and Python (Pandas, NumPy) data transformations to create analytics-ready datasets, improving data accuracy to greater than 99% and reducing recurring reporting effort by 30%.
- Supported Agile SDLC by documenting business requirements, KPI definitions, data logic, and dashboard calculations in JIRA and Confluence, ensuring audit readiness and stakeholder alignment.
- Delivered stakeholder-ready insights and data storytelling by translating analytical findings into actionable recommendations, achieving an 8–10% reduction in fraud losses during high-volume seasonal periods.

Accenture, India | Data Analyst

Aug 2022 – Dec 2023

- Analyzed 20M+ US healthcare enrollment and eligibility records from CMS feeds, insurers, and third-party sources to support regulatory reporting, enrollment accuracy, and operational analytics.
- Developed and optimized advanced SQL queries (CTEs, window functions, complex joins) to validate eligibility, premiums, and member data, reducing data discrepancies by 28%.
- Performed data cleansing, normalization, and validation using Python (Pandas, NumPy), improving data quality while ensuring HIPAA-compliant data handling.
- Built interactive Power BI dashboards tracking enrollment trends, churn rate, coverage gaps, and demographic insights, enabling business and policy teams to make data-driven decisions.

- Designed data reconciliation frameworks to cross-verify records across marketplace, insurer, and tax systems, increasing reporting accuracy by 30%.
- Collaborated with data engineering teams to validate source-to-target mappings, monitor pipelines, and support production data loads using Azure SQL, Azure Data Factory, and Azure Blob Storage.
- Conducted ad-hoc SQL analysis using Azure Synapse Analytics on datasets stored in Azure Data Lake, reducing insight turnaround time by 35% compared to legacy reporting processes.
- Performed EDA and anomaly detection to identify enrollment drop-offs and duplicates, contributing to corrective actions that improved enrollment completion rates by 15%.
- Executed A/B testing analysis on enrollment user journeys, defining metrics such as conversion rate, abandonment rate, and time-to-complete, driving a 12% increase in completion rates.
- Supported Agile delivery, including requirement translation, UAT validation, production support, and documentation (data dictionaries, SQL logic, SOPs), reducing analyst onboarding time by 25%.

SoftAge Group, India | Data Analyst

Aug 2020 – Jul 2022

- Translated AML and PCI-DSS compliance requirements into data rules, KPIs, and reporting specifications used across fraud analytics and audit workflows.
- Validated and reconciled 1M+ daily payment transactions using advanced Excel (Pivot Tables, lookups, complex formulas), maintaining greater than 99.5% data accuracy prior to downstream processing.
- Supported ETL validation and post-load checks for Snowflake ingestion pipelines, ensuring data completeness, consistency, and reconciliation.
- Developed and optimized Snowflake SQL queries for fraud and compliance analysis, reducing query execution time by 40% and improving analyst productivity.
- Built analytics-ready datasets and star-schema data marts, enabling transaction-level analysis by merchant, geography, and risk category, reducing investigation time by 35%.
- Implemented automated data quality checks to detect missing, duplicate, and anomalous transactions, lowering false-positive compliance alerts by 20%.
- Conducted exploratory and trend analysis to identify high-risk merchants and geographic fraud clusters, contributing to a 12% reduction in fraud losses.
- Designed Power BI dashboards to monitor compliance KPIs, suspicious activity trends, and investigator workload, reducing manual review effort by 30%.
- Collaborated with data science teams to validate risk scoring and AML model outputs, improving high-risk transaction identification accuracy by 15%.
- Automated recurring regulatory and internal reports using SQL and scheduled scripts, saving 20+ hours per week and supporting audit readiness.

EDUCATION

Master's in Data Analytics Engineering - George Mason University at Fairfax, USA

B.tech in Computer Science and Engineering - Sangai International University, Manipur, India

CERTIFICATION

- AWS Academy Cloud Foundations
