

SARVANI ALLA

Data Analyst | Marketing Analytics & Business Intelligence Reporting
sarvanialla13@gmail.com | 872-335-7698 | Chicago, IL | Available for Remote

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 5+ years of experience pulling marketing and customer data from internal tools and reporting systems, validating data accuracy, and preparing recurring reports and dashboards for weekly and monthly business reviews. Proficient in Microsoft Excel — including pivot tables, lookups, data validation, and reporting functions — with hands-on Power BI and Tableau dashboard development experience. Strong working knowledge of SQL for data extraction, validation, and analysis, and basic Python for reporting automation.

Experienced supporting senior analysts and cross-functional marketing and business stakeholders to understand reporting requirements, monitor campaign performance, identify reporting gaps and inconsistencies, and deliver actionable insights on customer behavior and marketing performance. Skilled at maintaining and updating reporting documentation, metric definitions, and report logic, and explaining findings clearly to non-technical stakeholders. Exposure to ETL workflows, data quality validation, CRM platforms, and digital analytics environments including Google Analytics.

CORE COMPETENCIES

Excel & Reporting	Advanced Excel (Pivot Tables, VLOOKUPS, Data Validation, Reporting Functions), Recurring Reports, Business Reviews
BI & Dashboards	Power BI (DAX, Power Query), Tableau, KPI Dashboards, Data Visualization, Weekly & Monthly Reporting
SQL & Data	SQL (Data Extraction, Validation, Analysis), Data Profiling, Data Accuracy Validation, ETL Workflows, Data Quality
Marketing Analytics	Campaign Performance Metrics, Customer Behavior Analysis, Marketing Performance Reporting, Digital Analytics
Analytics Tools	Google Analytics, Adobe Analytics, Salesforce, Google Ads, Meta Ads Manager, CRM Platforms
Programming	Python (Reporting Automation, Data Analysis), R, Statistical Analysis, Data Mining
Documentation	Metric Definitions, Report Logic, Reporting Documentation, Data Definitions, Business Logic
Collaboration	Stakeholder Engagement, Non-Technical Communication, Requirements Gathering, Cross-Functional Teamwork

WORK EXPERIENCE

Data Analyst | McKesson

Sep 2024 – Present | Columbus, OH

- Pulled marketing and customer data from internal tools and reporting systems using SQL and Power Query; validated data accuracy before distribution and monitored for reporting gaps, inconsistencies, and unexpected trends.
- Prepared recurring reports and dashboards using advanced Excel (pivot tables, VLOOKUPS, data validation) and Power BI for weekly and monthly business reviews; improved reporting efficiency and decision-making speed by 35–40%.
- Monitored campaign performance regularly across enterprise reporting systems; proactively identified inconsistencies and unexpected trends, escalating findings with clear actionable recommendations to senior analysts and leadership.
- Collaborated with marketing and business stakeholders to understand reporting requirements and delivery timelines; maintained and updated reporting documentation, metric definitions, and report logic for all dashboard and reporting assets.

- Supported senior analysts with ad-hoc analysis related to customer behavior, marketing performance, and business insights; explained analytical findings clearly to non-technical stakeholders through concise visualizations and summaries.
- Built and maintained ETL workflows using dbt and Apache Airflow with data quality validation checks; reduced manual data processing by 45% and improved data accuracy and reliability by 32%.
- Developed KPI dashboards tracking campaign performance metrics and customer data trends; integrated data from Snowflake, Redshift, and BigQuery, improving centralized analytics capabilities by 38%.

Data Analyst | Centene Corporation

Jan 2023 – Aug 2023 | Hyderabad, India

- Pulled and validated marketing and customer data from healthcare reporting systems; prepared recurring Power BI and Tableau dashboards and Excel reports for weekly and monthly business reviews, improving reporting efficiency by 33%.
- Monitored campaign performance and customer behavior metrics regularly; identified reporting gaps, data inconsistencies, and unexpected trends, reducing data inconsistencies by 29% through proactive data quality validation.
- Supported senior analysts with ad-hoc analysis on customer behavior, healthcare marketing performance, and operational insights; maintained reporting documentation, metric definitions, and report logic across all analytical assets.
- Collaborated with marketing and business stakeholders to gather reporting requirements and delivery timelines; explained complex findings clearly to non-technical audiences through clean dashboards and business-focused summaries.
- Developed Python automation scripts for recurring report generation and data transformation, reducing manual reporting by 36%; maintained ETL workflows with data accuracy validation improving pipeline efficiency by 37%.
- Supported digital analytics activities and campaign performance monitoring; performed customer data analysis and trend analysis to generate actionable insights aligned with business and marketing objectives.

Data Analyst | Cognizant Technology Solutions

Jun 2021 – Dec 2022 | Hyderabad, India

- Pulled data from internal reporting systems using SQL for data extraction, validation, and analysis; prepared recurring reports and dashboards using Excel and Power BI for business reviews and stakeholder reporting.
- Monitored reporting outputs for gaps, inconsistencies, and data accuracy issues; maintained and updated metric definitions, report logic, and reporting documentation to ensure consistency across all analytical deliverables.
- Supported senior analysts with ad-hoc analysis on customer behavior and business performance; explained insights and findings clearly to non-technical stakeholders, contributing to a measurable 25% performance improvement.
- Collaborated with cross-functional marketing and business stakeholders to understand reporting requirements; built interactive Tableau and Power BI dashboards translating complex data into clear, actionable business insights.
- Automated reporting workflows using Python and SQL to streamline recurring data pulls and report generation, improving pipeline efficiency by 30% and reducing manual effort across the reporting cycle.
- Maintained data governance frameworks and data quality validation processes; improved data reliability by 26% and supported ETL workflow documentation and data definition maintenance.

EDUCATION

Master of Science, Data Analytics / Information Systems | Lewis University

Chicago, IL
