

SATVIK AITHARAJU

Data Analyst / Data Engineer / Business Analyst

+1 513-400-1583 / satvikaitharaju42@gmail.com

Professional Summary

Data Analyst with 3+ years of experience transforming complex healthcare, finance, and enterprise data into actionable business insights using SQL, Python, Power BI, Tableau, and Excel. Experienced in building ETL/ELT pipelines, developing interactive dashboards, optimizing SQL queries, and performing data validation to support reporting and strategic decision-making. Skilled in Snowflake, AWS, data modeling, and cross-functional collaboration, with a proven ability to improve reporting accuracy, automate manual processes, and enhance operational efficiency by up to 35%. Passionate about delivering reliable, data-driven solutions that enable business growth and informed decision-making.

Education

University of North Texas

Aug 2024 – May 2026

Master of Science in Information Systems and Technology

GPA: 3.7 / 4.0

Licenses & Certifications

FINRA Securities Industry Essentials (SIE) Examination

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Professional Experience

Data Engineer

May 2023 – Apr 2024

Dell Technologies

- Designed and maintained scalable ETL/ELT pipelines using Python, Scala, and SQL to ingest, transform, and integrate structured and unstructured data from enterprise systems.
- Developed and optimized Snowflake data models and advanced SQL queries to support analytics, business intelligence, and enterprise reporting.
- Built automated ETL workflows to move data between AWS S3 and enterprise data warehouses, ensuring reliable, secure, and efficient data processing.
- Processed large-scale datasets using PySpark on AWS EMR, integrating multiple data sources to enable advanced analytics and reporting.
- Integrated AI capabilities into data workflows using Python and AWS services to analyze large-scale datasets, automate data processing, and support intelligent business insights.
- Implemented scalable data transformation pipelines using Scala, converting raw data into optimized Parquet format for efficient querying with Apache Hive.
- Automated data integration pipelines to deliver governed, high-quality datasets for Tableau and other BI platforms.
- Enhanced Snowflake query performance by 30% through SQL optimization, clustering strategies, and efficient warehouse resource utilization.
- Reduced manual data reconciliation efforts by 35% by implementing automated validation, exception handling, and pipeline monitoring processes.

Data Analyst

May 2021 – Apr 2023

Astellas Pharma

- Analyzed clinical and operational data to support business decision-making.
- Developed and optimized SQL queries across Teradata, SQL Server, and Google Cloud Platform (GCP) to extract, integrate, and analyze data.
- Performed data cleaning, transformation, and validation to ensure high-quality datasets for reporting and analytics.
- Automated recurring reporting processes using Python, reducing manual effort and improving operational efficiency.

- Built interactive dashboards and reports using Power BI, Tableau, and Excel to deliver actionable business insights.
- Presented analytical findings to executive stakeholders, translating complex data into clear business recommendations.
- Collaborated with clinical, business, and IT teams to resolve data quality issues and improve data completeness.
- Led analytics initiatives from data acquisition through dashboard deployment, ensuring alignment with objectives.
- Analyzed over 70K clinical and operational records weekly, improving reporting accuracy by 20% through validation and standardized transformation.
- Optimized SQL queries and data models, reducing dashboard refresh times and query execution by 30% while improving decision-making efficiency by 25%.

Data Analyst Intern

Jan 2021 – April 2021

L&T Finance, India

- Analyzed over 30K loan and customer financial records using SQL and Excel (VLOOKUP, XLOOKUP, and Pivot Tables), improving reporting accuracy by 20%.
- Developed interactive Tableau dashboards to monitor key performance indicators (KPIs), loan portfolio performance, and financial metrics.
- Cleaned, transformed, and validated over 50kK data records while performing A/B testing and performance analysis, improving overall data quality by 25%.

Projects

Clinical Operations Analytics & Executive Dashboard

- Analyzed 50K+ clinical and operational records using SQL and Python to identify utilization trends, reporting gaps, and operational performance metrics.
- Developed interactive Power BI dashboards with executive KPIs, reducing reporting effort by 25% and improving data-driven decision-making.

Cloud Data Pipeline & Snowflake Analytics

- Built an end-to-end ETL pipeline using Python, AWS S3, PySpark, and Snowflake to process structured and unstructured enterprise data.
- Optimized SQL transformations and Snowflake warehouse performance, reducing query execution time by 35% while delivering analytics-ready datasets for BI reporting.

Loan Portfolio Analytics & Risk Insights

- Analyzed over 100K loan and customer records using SQL, Excel, and Power BI to evaluate portfolio performance, repayment trends, and financial KPIs.
- Automated reporting and KPI dashboards, improving reporting accuracy by 20% and enabling faster identification of high-risk customer segments.

Technical Skills

Programming & Query Languages: Python, SQL, R, Scala, C

Data Visualization & BI: Power BI, Tableau, Excel, Qlik, SSRS, DAX, Power Query (M Language), Pivot Tables

Data Analysis & Analytics: Data Modeling, KPI Tracking, Statistical Analysis, Forecasting, Executive Reporting, Business Intelligence, Business Strategy, Productivity Analysis, Resource Allocation, A/B Testing

Data Engineering & ETL: ETL/ELT Pipelines, Data Integration, Data Transformation, API Integration, PySpark, Apache Hive, Parquet, AWS EMR

Cloud & Big Data: AWS (S3, Glue, Lambda, EMR), Microsoft Azure, Google Cloud Platform (GCP)

Databases & Warehousing: Snowflake, SQL Server, Teradata, PostgreSQL, MySQL, MongoDB

Data Quality & Governance: Data Validation, Data Quality Checks, Data Governance, Data Documentation, Data Cleansing, Data Reconciliation, Exception Handling

Tools & Technologies: Git, REST APIs, .NET
