

Sean Noh

346-500-3439 | nohsean6@gmail.com | [LinkedIn](#) | [Portfolio](#) |

Technical Skills

Languages: JavaScript, Python, HTML/CSS

Frameworks/Libraries: React, Node.js, Express.js, Django, RESTful API, Tailwind

Developer Tools: Git, GitHub, VS Code, Postman,

Database: PostgreSQL, MongoDB, SQL

Experience

Software QA Analyst

06/2024 - Present

Outliers Ai

- Developed and **optimized AI-driven coding hints**, enhancing the **accuracy and efficiency** of code generation for complex **programming questions** across various domains.
- Designed and implemented robust **unit tests in Python** to validate AI-generated code, ensuring **100% functional accuracy** and adherence to **performance standards**.
- Developed an efficient **hint-to-code pipeline**, reducing **debugging time** and improving task **completion rates by 20%**, while upholding **high-quality coding practices**.

Full Stack Developer

04/2023 - 06/2024

Freelance

- Developed a **robust restaurant application backend** using **Node.js**, **Express.js**, and **MongoDB** to efficiently manage and maintain the **restaurant's menu data** and implement **API calls** for accurate URL routing.
- Designed and implemented a **user-friendly, interactive front-end** with **React**, **JavaScript**, and **Tailwind CSS**, integrating the **Google Maps API** to showcase the restaurant's **location**.
- Engineered a **secure, protected admin login portal** with **role-based access control**, enabling **seamless updates** and **efficient management of the restaurant menu**.

Projects

Banking Web App | [GitHub](#) | [Live](#) | *Python, Django, React, PostgreSQL, Tailwind, JavaScript, Git*

- Developed a **banking application backend** using **Python**, **Django**, and **PostgreSQL** to manage secure **transaction data** and ensure efficient data processing through **migration**.
- Designed a **responsive front-end interface** with **React**, and **JavaScript**, enabling users to seamlessly **view account balances**, **track transactions**, and manage their **financial activities**.
- Implemented **robust authentication** and **data encryption protocols** to enhance security, safeguarding sensitive **user financial information**.
- Optimized **API performance** for real-time transaction updates, ensuring **fast data retrieval** and improving overall user experience.

Restaurant Web App | [GitHub](#) | [Live](#) | *React, MongoDB, Node.js, Express.js, Git, Tailwind, API*

- Developed a dynamic menu system using **JavaScript**, **React**, **Node.js**, and **Express.js**, with **MongoDB** for real-time updates, ensuring a seamless user experience.
- Implemented** an intuitive **administrator dashboard** with **Tailwind CSS**, enabling staff to **securely add, edit, and organize menu items** on the public page via **secure API requests**, backed by **MongoDB**.
- Streamlined development and collaboration through **Git version control**, ensuring efficient **integration** and minimal conflicts within the team.

Wordle | [GitHub](#) | [Live](#) | *JavaScript, CSS, HTML*

- Developed a **Wordle game replica**, an interactive **5-letter word guessing game**, using **JavaScript**, providing real-time feedback on guess accuracy and letter positioning.
- Leveraged **Git** for efficient **version control** and seamless collaboration, ensuring smooth code integration with minimal conflicts.
- Implemented **dynamic word validation** with randomized word selection using **HTML** and **CSS**, enhancing **re-playability** and **user engagement**.
