

SHANTHAN REDDY HANMANDLA

Cybersecurity Engineer

Location: CA, USA | Phone: (562) 881-3848 | Email: shanthanreddy233@gmail.com | [LinkedIn](#)

SUMMARY

- Cybersecurity Engineer with 3.5 years of experience in securing enterprise environments across cloud and on-premise infrastructures.
- Expertise in network security, application security, cloud security, and identity and access management, with a focus on Zero Trust Architecture, SIEM implementation, and API security.
- Skilled in implementing and managing security solutions across major cloud platforms, including AWS, Azure, and Google Cloud.
- Proficient in deploying advanced security tools such as Splunk, QRadar, Fortinet, Palo Alto, CrowdStrike, and Docker.
- Strong knowledge of regulatory compliance frameworks, including NIST, ISO 27001, GDPR, and HIPAA, ensuring audit readiness and data protection.
- Experienced in automating security processes using scripting languages such as Python, PowerShell, and Bash to enhance operational efficiency.
- Adept at integrating security into DevOps pipelines, ensuring compliance and risk mitigation in CI/CD environments.
- Effective problem solver with excellent analytical and communication skills, working cross-functionally to drive security initiatives and compliance improvements.
- Pursuing a Master's degree in Cybersecurity, complemented by industry-recognized certifications, demonstrating a commitment to continuous learning and industry best practices.

SKILLS

- **Network Security:** Firewalls (Palo Alto, Fortinet), IDS/IPS (Snort), VPNs, Zero Trust Architecture, Network Protocols (TCP/IP, DNS, HTTP)
- **Cloud Security:** AWS Security, Azure Security, Google Cloud Security, Identity & Access Management (IAM), Cloud Security Posture Management (CSPM)
- **Endpoint Security:** EDR/XDR (CrowdStrike, Microsoft Defender), Mobile Device Management (Intune, Jamf)
- **Application Security:** OWASP Top 10, Secure Coding (Python, Java), API Security (OAuth, JWT)
- **Data Security:** Encryption (AES, RSA), Data Loss Prevention (DLP), Public Key Infrastructure (PKI)
- **Identity & Access Management (IAM):** Multi-Factor Authentication (MFA), Single Sign-On (SSO), Privileged Access Management (PAM)
- **Threat Detection & Incident Response:** SIEM (Splunk, QRadar), Incident Response (NIST Framework), Threat Intelligence
- **Vulnerability Management:** Nessus, Qualys, Penetration Testing (Burp Suite, Nmap)
- **Compliance & Governance:** NIST, ISO 27001, GDPR, HIPAA
- **DevSecOps:** CI/CD Security (GitHub Actions, Jenkins), Container Security (Docker, Kubernetes)
- **Scripting & Automation:** Python, PowerShell, Bash
- **Other Tools:** Wireshark, ServiceNow, Jira, Microsoft Visio

WORK EXPERIENCE

IBM

Dec 2024 – Present

Cybersecurity Engineer Intern

- Collaborating on the Identity and Access Governance Program, implementing Privileged Access Management (PAM) solutions to enforce Zero Trust principles and ensure secure access control across cloud environments.
- Enhancing the Identity and Access Governance Program by deploying Multi-Factor Authentication (MFA) and Single Sign-On (SSO) strategies to strengthen authentication mechanisms within Google Cloud Security.
- Assisting in the development of automated workflows for the Identity and Access Governance Program, utilizing Jira and Microsoft Visio to streamline access review processes and improve compliance tracking.
- Conducting regular audits and access reviews as part of the Identity and Access Governance Program, ensuring adherence to NIST security frameworks and minimizing identity-related security risks.

VMware

July 2021 – July 2023

Cybersecurity Engineer

- Designed and implemented robust API security measures by integrating OAuth 2.0 and JWT authentication to ensure secure access control across cloud-based applications.
- Conducted security assessments and remediation of API vulnerabilities using OWASP API Security Top 10 guidelines, enhancing the overall security posture.
- Collaborated with development teams to embed secure coding practices in Python and Java, ensuring compliance with NIST and GDPR security standards.
- Integrated API threat protection tools within AWS and Azure environments, leveraging Cloud Security Posture Management (CSPM) solutions to monitor API security risks.
- Developed automated security testing pipelines in CI/CD workflows using Python to identify and mitigate API-related vulnerabilities before deployment.
- Implemented encryption protocols (AES, RSA) for secure API data transmission and storage, strengthening protection against data breaches.

- Utilized SIEM solutions like Splunk and QRadar to monitor API traffic patterns, detect anomalies, and facilitate rapid incident response following the NIST framework.
- Established access control policies and conducted periodic audits using IAM principles to enforce least privilege access for API endpoints.
- Provided security awareness training and documentation to cross-functional teams, promoting best practices for API security and threat mitigation.

Trigent Software

Jan 2020 – June 2021

Cybersecurity Engineer

- Implemented and configured Splunk SIEM to aggregate and analyze logs from firewalls, IDS/IPS, and VPNs, enhancing real-time threat visibility and incident response.
- Developed and fine-tuned correlation rules and alerting mechanisms to detect network anomalies, unauthorized access attempts, and potential security breaches.
- Integrated Fortinet firewalls and Snort IDS/IPS with the SIEM platform to centralize security event monitoring and ensure timely threat detection.
- Conducted regular log analysis and threat hunting activities using Wireshark and ServiceNow to proactively identify and mitigate potential vulnerabilities.
- Automated log ingestion and enrichment processes using PowerShell and Bash scripts to improve efficiency and accuracy of security event data.
- Collaborated with compliance teams to align SIEM implementation with ISO 27001 and HIPAA regulatory requirements, ensuring audit readiness.
- Performed penetration testing using Nessus and Burp Suite to validate SIEM rules and improve detection capabilities for known attack patterns.
- Provided training and documentation to internal teams on SIEM best practices, event correlation, and incident response workflows to improve security awareness.

PROJECTS

Cloud-Based Threat Detection and Response System

- Designed and implemented an automated threat detection system leveraging Google Cloud Security and Threat Intelligence to identify and mitigate cloud-based cyber threats.
- Developed and deployed CI/CD security pipelines using Jenkins and GitHub Actions to ensure secure application deployments across multi-cloud environments.
- Integrated Palo Alto firewalls and implemented Zero Trust Architecture to enhance network security and restrict unauthorized access.

Secure DevOps Pipeline Implementation

- Developed and enforced container security best practices using Docker and Kubernetes, ensuring compliance with security standards for microservices architecture.
- Implemented Identity and Access Management (IAM) policies across cloud environments to enforce least privilege access and prevent unauthorized data exposure.
- Conducted continuous security testing within DevOps pipelines using automated SAST/DAST tools to identify and remediate vulnerabilities before production releases.

Enterprise Data Protection and Compliance Initiative

- Deployed encryption solutions such as AES and RSA to secure sensitive enterprise data, ensuring compliance with GDPR and NIST standards.
- Implemented Data Loss Prevention (DLP) strategies to monitor and prevent unauthorized data transfers across cloud and on-premises environments.
- Utilized SIEM tools such as Splunk to monitor data access patterns and generate compliance reports for regulatory audits.

EDUCATION

California State University, Dominguez Hills

Master in Cybersecurity | Long Beach, CA | Expected May 2025

Sreenidhi Institute of Science and Technology

Bachelor of Science in Computer Science | Hyderabad, India | June 2021

CERTIFICATIONS

- **CompTIA Security+ Certification**
- **Google Cybersecurity Professional Certificate**

August 2024

June 2024
