(928) 981-8045

[linkedin.com/in/ramidi-sharanya-206a67189](https://www.linkedin.com/in/ramidi-sharanya-206a67189)

SUMMARY:

- Skilled developer with extensive experience **around 5 years** in web development, designing, developing **User Interface, Software Applications** and testing of **Object-Oriented** and **Web based** Enterprise Applications.
- Extensive experience working with various **SDLC** methodologies like **Agile Scrum**.
- Experienced in **Java** Application Development, **Object-Oriented Concepts, Object-Oriented Analysis (OOA), Object-Oriented Programming (OOP)** and its implementation.
- Skilful hands-on capability in Core Java concepts such as: **OOPs, Collections, Exceptions Handling, (I/O) System, Annotations, Enums, Concurrency, Multi-Threading, Data Structures, Lambda** and **Generics**.
- Experience in developing front-end systems with **jQuery, HTML5, CSS3** and Client-side frameworks such as **AngularJS, ReactJS**.
- Expertise in using **AngularJS** Directives, Controllers, Filters, Services, Templates, Events and Injectors.
- Expertise in **ReactJS** framework to develop the **SPA** and working with React features such as **React Context API, React Hooks, Functional Components**.
- Experienced in Spring frameworks like **Spring, Spring Boot, Hibernate, Spring IOC, Spring Security, Spring Cloud** and **Spring MVC**.
- Implemented pre-authentication, **LDAP** authentication and database security using **Spring Security** utilizing **OAuth 2.X, JSON Web Token (JWT)** and **Spring Batch** for scheduling and maintenance of batch jobs.
- Extensive experience focusing on **AWS** Services like **EC2, Elastic Beanstalk, CloudWatch, CloudFront, Cloud Formation, IAM, S3, RDS, Elastic ache, SNS, SQS**.
- Hands-on experience in Azure Cloud Services (**PaaS & IaaS**), **SQL Azure**.
- Proficient with Docker and Kubernetes on multiple clouds, aiding the team in **CI/CD** pipeline optimization and deploying on public or private clouds.
- Utilized **XML** related configuration for wiring the dependency components together and to define bean classes and worked with artifacts deployment in **AWS**.
- Hands on experience in configuring and deploying the Applications on **Apache Tomcat**, and good experience on RedHat and **JBoss** Servers.
- Substantial experience in the implementation of **Service-Oriented Architecture (SOA)** and the creation of **Web Services**, utilizing both **SOAP** and **RESTFUL APIs**.
- Experienced in writing **SQL queries, Triggers**, and Stored Procedures in various databases such as **Oracle, DB2 MySQL, and DynamoDB**.
- Expertise in Java Message Service **MQ's** like Apache Kaea along with **Rabbit MQ** and **Active MQ**.
- Experience working with multiple databases like **Oracle 11g, 12c, SQL Server, MySQL, PL/SQL** and **Aurora**.
- Experienced in performing unit testing using **JUnit, Mockito** integration, and deployment of Applications using tools such as **Jenkins** and **Maven** and debugging through **Log4j**.
- Good experience in using different version controlling/tracking systems **GIT** and **Subversion**.
- Strong experience on various development environments like **Eclipse, NetBeans, IntelliJ** and **Spring Tool Suite**.

TECHNICAL SKILLS:

Languages	Java, SQL, PL/SQL, UML
Cloud Technologies	AWS, Azure Cloud
Framework	Spring MVC, Hibernate, Struts, Spring AOP, Spring Cloud, Spring DAO, Spring Core,
Web Technologies	HTML, XHTML, CSS, JavaScript, JSON, XML, XSL, XSLT, CSS, AngularJS Angular 12/8/4/2, ReactJS, NodeJS
Web/Application Servers	Tomcat, WebLogic, IBM WebSphere, JBOSS, RedHat
Build Tools	Maven, Jenkins
Containerization Tools	Docker, Kubernetes
Messaging Queues	Apache, Rabbit MQ, IBM MQ and Active MQ
Platforms	Windows, UNIX, LINUX, Mac OS
Methodologies	Agile Methodology (SCRUM), Waterfall

CERTIFICATIONS:

- Oracle Certified Professional: Java SE 11 Developer.

PROFESSIONAL EXPERIENCE:

Client: VR Networks Inc – NY | May 2023 – Present

Role: Java Full Stack Developer

Roles & Responsibilities:

- Involved in an **Agile/TDD** for the software development process to produce high quality Application.
- Developed asynchronous **RESTful** Microservices utilizing Spring Boot, designed to be utilized by other **Microservices** with an average response **BME** of 50 milliseconds.
- Actively involved in Analysis, Design, Development, System and **User Acceptance Testing**.
- Utilized all **Java8/11** predefined functional interfaces like Predicate, By Predicate, Function, By Function, Consumer, By Consumer, Supplier, used primitive type predefined Functions and **Java8** Method Reference.
- Maintained Interface compatibility and concurrency in the project using **Java8** new features like default, static methods and Concurrency **API**.
- Effectively used features of **Java8** (stream, lambda, date and BME), Concurrency framework, Java Executors, **JCF** and multi-threading.
- Worked with spring modules like **Spring MVC**, **Spring ORM**, **Spring JDBC**, **Spring Web Services**, and **Spring Boot**.
- Design and implementation of Spring-Security for the Application for authentication process against **LDAP**, **J2EE** pre-authentication, and database.
- Created and maintained **APIs** utilizing the **Swagger** framework backed by **Hibernate** data access layer.
- Utilized **Amazon Web Services (AWS)** to host Java web Applications, enabling seamless deployment and continuous integration for agile development.

- Implemented **AWS** services, such as Amazon EC2, Amazon ECS, Amazon Elastic cache to store and retrieve data. Also, utilized **AWS lambda** to execute the code in response to some events.
- Managed configuration of Kaa Cluster, Brokers, Topics, used Kaa Consumer, Producer, **Streams API**.
- Used **Docker** Container to address every Application across the hybrid cloud and **Docker** for baler collaboration and innovation.
- Analysed current Mainframe system and designed new GUI screens using **HTML5**, **CSS3**, **JSP** and **jQuery**.
- Involved in using **ReactJS** components, Forms, Events, Keys, Router and Flux concept to create Histogram View Component and Product View Component.
- Used **React-Routers** for connecting the **APIs** and to turn Application into **Single Page Application (SPA)**.
- Worked with configuration management tools like **GIT**.
- Responsible for continuous integration and continuous delivery with the **Jenkins** Looper build tool.
- Performed **Unit** testing using **JUnit** and **Mockito**.
- Deployed on JBoss and RedHat server with JBoss Native and Metro stack using document-style web services.
- Developed **SQL**, **PL/SQL** with Stored Procedures to interact with Persistent database using **Oracle**.

Environment: AWS, Java JDK 1.8, Java 11, Restful Services, Spring Boot, OAuth, Hibernate, Web services, Microservices, Spring Tool Suite, Maven, ReactJS, NodeJS, JUnit, SoapUI, Postman, Apache Kaa, Log4j, GitLab, JPA, HTML, CSS, XML, JSON, Jenkins, Docker, SQL, PL/ SQL, Mockito, DBeaver UI, JBoss, Jenkins Looper, Swagger

Client: Centene – St. Louis, MO | June 2022 – Apr 2023

Role: Full Stack Java Developer

Roles & Responsibilities:

- Responsible for analysis, design, and development of Application based on **J2EE** using Spring and Hibernate.
- Used Spring framework to achieve loose coupling between the layers thus moving towards Service Oriented Architecture (**SOA**) exposed through Restful Services.
- Created **DAO** interface, abstract class and concrete classes to interact with persistence entities. Worked on Proof of Concept for developing Applications using **MongoDB**.
- Used **Java8** features in developing the code like Lambda, resource classes, fetching documents from database.
- Used concepts of Directives, Databinding, and Dependency Injection in React.
- Designed, developed, and tested **HTML5**, **CSS3**, **ES6**, and **jQuery**, **Bootstrap**, **ReactJS** and **Redux** that meets accessibility of web browser.
- Implemented **ReactJS** Controllers to maintain each view data where the client implemented the **UI**.
- Worked on **React Virtual DOM** and React views, rendering using components that contain custom **HTML** tags.
- Integrated the Application with **Azure** services and **APIs**, such as **Azure App** Service, Azure Functions, Azure Storage, and **Azure SQL** Database.
- Implemented **Azure** Application Insights to store user activities and error logging.
- Developed **Azure** Function App to drive events and compute the code triggered and capture the events.
- Conducted regular backups and disaster recovery planning using **Azure Backup** and Azure Site Recovery.
- Integrated Spring **DAO** for data access with Hibernate to implemented **CRUD** operations.
- Used **SQL**, **HQL**, and **Hibernate** Criteria queries, depending on the complexity of the Object.
- Involved in working with **NoSQL** Database like **MongoDB** to manage extremely large data sets.
- Implemented the second level of caching using **Redis Cache**, **Memcached**.
- Implemented or exposed the **Microservices** to base on **RESTful API** utilizing **Spring Boot**.
- Used **Spring Batch** to design a comprehensive solution to enable the development of batch Applications.
- Implemented multi-threading for improving performance of the batch processes.

- Implemented **REST** client using JERSY to consume data from the legacy Applications.
- Used Apache Kaea confluent distribution both as a traditional messaging message and stream platform. Maintained Kaea Cluster by created Topics. Partitions for point-to-point messaging.
- Implemented a metrics Collection for the server by utilising **Apache** Kaea to stream server-side events.
- Configured and used **Maven** scripts to deploy Applications on the server.
- Configured the **Docker** Containers and created **Docker** files for different environments.
- Configured and administered **Jenkins** for **CI/CD** into **JBoss** Application Server.
- Prepared the test cases using **JUnit** and Easy Mock test case and in the testing phase.

Environment: Java JDK 1.8, Restful, Spring Boot, Spring DAO, OAuth, Hibernate, IntelliJ, HTML, CSS, ES6, jQuery, Bootstrap, ReactJS, Redux, MS Azure, Azure App Service, Azure Functions, Azure Storage, Azure SQL, JNDI, Docker, SQL, HQL, JUnit, Easy Mock, Postman, Apache Kaea, MongoDB, JBoss, XML, JSON, Jenkins, Maven.

Client: Norms Technology – India | Sep 2020 – Dec 2021

Role: Java Developer

Roles & Responsibilities:

- Worked on **Agile Development**, story grooming, estimations, retrospectives, and sprint planning.
- Worked on design and development of Single Page Application using **Angular 9, Node, CSS, Angular Material, Bootstrap and HTML5**.
- Enhanced application performance by **Angular 9 Component** based development in view of future Angular framework transitions.
- Developed several **API's** as per the business cases and analyses the current API with **Spring Boot**.
- Created components that are used to access databases, message queues and APIs using **Apache Camel**.
- Developed Spring Boot application with microservice and deployed it into **AWS**.
- Handled operations and maintenance support for **AWS cloud resources** which includes launching, maintaining, and troubleshooting **EC2** instances, S3 buckets, Auto Scaling. Also created snapshots for data to store in AWS S3.
- Worked with **Docker** to deploy Microservices in modern containers to increase isolation.
- Deployed and maintained a production environment using **AWS EC2** instances and ECS with Docker.
- Built and deployed **Docker containers** to break up monolithic apps into microservices, improving developer workflow, increasing scalability, and optimizing speed.
- Used **Streams and Lambda expressions** available as part of **Java 11** to store and process the data.
- Used **Microservice architecture** with **Spring Boot** based services interacting through REST.
- Worked on various components in Spring, which includes Spring IOC, AOP, Spring MVC, Spring JPA, Spring Batch, Spring Security and Spring Boot driven Microservice architecture.
- Utilized **Spring Data Rest** for dynamically filter collection resources that allows to hook into the handling of REST requests by handling Spring Application Events.
- Used **Spring JPA** and **Hibernate** with entity beans for interacting persistence layer for CRUD operations.
- Used Core Spring, Spring MVC, and Spring JDBC in **backend server layer**.
- Migrated existing **monolithic application** into microservices architecture using Rest APIs, Spring Boot, Java 11, Spring 5, Spring Cloud Configuration.
- Developed **RESTful services** endpoints for consuming data from the various external services by using spring boot Framework in Microservice architecture.
- Designed database table structure and Write **SQL** queries for managing applications transaction data in **Oracle database**.
- Developed and deployed applications using build tools like **Jenkins, Udeploy, Gradle, Splunk and Node** for building the applications.

- Monitored the Splunk alerts and creating the dashboards in **Splunk** for search metrics.
- Used **GIT** for version control and **Log4J 2** to log both user interface and domain level messages.
- Used **Junit framework** for writing Unit Test cases and used **Postman** for testing REST based web services.
- Worked with **MongoDB** to store non-relational data into collection and retrieve them whenever required.

Environment: Java 11, Spring Boot, Spring Security, Spring JPA, Hibernate, AWS, IAM, EBS, EC2, S3, Docker, Kubernetes, Angular 9, Oracle 12c, SQL, PLSQL, Log4J 2, Maven, HTML5, CSS4, Git, Junit, JIRA, Postman, MongoDB, Jenkins, deploy, Splunk, Apache Camel

Client: SAT Solutions – India | May 2019 – Aug 2020

Role: Java Developer

Roles & Responsibilities:

- I worked on Core Java to implement validations for different layers of the request file, such as physical, logical, and transfer requests.
- Developed and implemented the **MVC Architectural Pattern** using **Spring Framework**.
- Worked on the integration of the Front-End web interface with the **Spring MVC, Angular JS, JSP, HTML, and CSS**.
- Worked on **Spring Web Flow** using **Spring MVC** to build an application from scratch using Spring XML configurations, annotations.
- Worked with platform and application stakeholders to define and steer designing, developing **REST APIs** and platform services following **MVC** architecture for Web/Mobile applications using Spring in agile environment.
- Developed DAO implementation using Hibernate Template from **Spring with Hibernate API**.
- Implemented **Hibernate Object Relational Mapping (ORM)** for mapping java classes and database tables.
- Used **Java Persistence API (JPA)** along with **Hibernate** framework to implement test classes.
- Used **Spring DI** to inject beans using both constructor and setter Dependency Injection.
- Worked on **Spring JDBC** to interact with the Oracle database for all the CRUD operations.
- Developed the **Microservices** using **Spring Boot** that create, update, delete and get the information from backend.
- Developed the presentation layer using **JSP, AJAX, HTML, XHTML, CSS** and client validations using **JavaScript**.
- Developed **REST** based services using Spring MVC architecture and used JSON for the data transfer.
- Designed and developed user interactive screens using **HTML5, CSS3, JavaScript, jQuery, Bootstrap, and ReactJS**.
- Used **Git** as the central repository of all the modules.
- Implemented **OAuth2** framework at the backend using **NodeJS**.
- Actively used the defect tracking tool **JIRA** to create and track the defects during the **QA** phase of the project.
- Developed test cases using **JUnit** and Test-Driven Development.
- Tested the web services using SOAPUI and wrote a web service client in Java to transmit the offender's information in **XML** data using the **WSDL**.
- Involved in testing, fixing bugs, and troubleshooting technical problems.

Environment: Core Java, J2EE, Hibernate, Spring MVC, Hibernate, HTML5, CSS3, JSP, JavaScript, JSF, jQuery, Bootstrap, AngularJS, NodeJS, DOM, AJAX, XML, OAuth2, SOAP UI, Git, Jenkins, Maven, REST, Jira, Junit

EDUCATION:

- Bachelor of Technology in Computer Science and Engineering from Malla Reddy Engineering College – 2021.
- Masters in Computer Science from University of Missouri – Kansas City – 2023.
