

Shiva Priya Pillamarri

Boston, United States of America | (203)-435-5974 | shivapriyapillamarri25@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Generative AI and Software Engineer with experience building AI-powered applications, backend services, automation workflows, and scalable cloud-based systems. Skilled in Python, FastAPI, React, LangChain, LangGraph, OpenAI APIs, AWS, and microservices architecture. Hands-on experience developing agentic AI workflows, intelligent automation platforms, REST APIs, and distributed systems that improve operational efficiency. Passionate about building production-grade GenAI solutions and scalable software platforms through cross-functional collaboration.

WORK EXPERIENCE

Kensho Technologies

Machine Learning / AI Engineer

Boston , USA

Feb 2025 – May 2026

- Researched and evaluated emerging AI and machine learning technologies to identify opportunities for improving financial analytics and operational workflows.
- Developed and deployed AI-powered NLP solutions using BERT, SpaCy, and Hugging Face models for sentiment analysis, entity recognition, and financial text intelligence.
- Built scalable ETL and ML inference pipelines using Python, SQL, AWS Lambda, and S3 for processing structured and unstructured financial datasets.
- Collaborated with cross-functional stakeholders to translate business requirements into production-ready AI solutions aligned with operational goals.
- Developed Python-based backend APIs and microservices supporting AI-driven analytics and automation workflows.
- Designed and implemented agentic AI workflows using LLMs, retrieval systems, and workflow orchestration techniques to automate multi-step operational tasks.
- Built RESTful services and cloud-native applications leveraging AWS services, improving scalability and system reliability.
- Collaborated with software engineers, platform teams to deploy production-ready AI services following software engineering best practices.
- Participated in code reviews, system design discussions, testing, debugging, and performance optimization of distributed applications.
- Supported deployment, testing, troubleshooting, and optimization of AI systems in production environments.
- Documented AI workflows, implementation processes, and technical findings to support knowledge sharing and future development initiatives.
- Stayed current with advancements in GenAI, LLMs, NLP, and AI tooling through continuous experimentation and applied research..

Accenture

AI Engineer

Hyderabad, INDIA

August 2022– December 2023

- Designed and implemented AI and machine learning solutions for enterprise business applications, including NLP pipelines, predictive analytics, and intelligent automation systems.
- Built end-to-end AI workflows using Python, TensorFlow, Scikit-learn, and cloud-based services to support scalable model deployment and inference.
- Developed AI-powered text classification and document intelligence systems to automate business processes and improve operational efficiency.
- Evaluated and integrated emerging AI tools and frameworks into existing workflows to improve scalability and model performance.
- Collaborated with engineering, analytics, and business teams to identify AI opportunities and deliver measurable business value through automation and data-driven insights.
- Participated in deployment support, debugging, monitoring, and continuous improvement of production AI systems.
- Created technical documentation, presentations, and implementation reports for stakeholders and internal teams.
- Assisted in educating cross-functional teams on AI capabilities, workflows, and best practices for enterprise AI adoption.
- Supported cloud deployment and monitoring of AI models, contributing to stable production releases and model lifecycle.
- Participated in model testing, debugging, and code reviews to ensure maintainable, high-quality machine learning solutions in enterprise environments.

Full stack Web Developer

Shopify

Hyderabad, INDIA

Jan 2021 – May 2022

- Designed and developed scalable eCommerce platforms using Magento, Shopify, and WordPress, supporting end-to-end business workflows.
- Built and integrated REST APIs and middleware systems for payments, inventory, and third-party services.
- Developed full-stack applications using PHP and React Native, ensuring responsive UI and efficient backend processing.
- Deployed and managed applications on AWS, GCP, and Azure, improving uptime, scalability, and security.
- Integrated AI/ML models into applications for recommendation systems, customer analytics, and automation workflows.
- Implemented data pipelines and API-based ML inference systems, enabling real-time predictions in production.
- Worked with Salesforce integrations to synchronize customer and transaction data across systems.
- Collaborated with cross-functional teams and AI engineers to document processes and support AI model training and deployment.
- Optimized performance through caching, database tuning, and API efficiency improvements.

ACADEMIC PROJECTS

University of New Haven

Research Assistant, Machine Learning

West Haven, CT, USA

Aug 2024– Dec 2024

GenAI Incident Management Agent Platform

- Developed an AI-powered incident management platform using FastAPI and LangGraph to automate operational support workflows.
- Built multi-agent workflows capable of incident classification, root-cause analysis, ticket summarization, and remediation recommendation.

SKILLS & INTERESTS

Generative AI & LLMs, Agentic AI & Workflow Automation:

OpenAI APIs, Hugging Face Transformers, LangChain, LangGraph, Prompt Engineering, RAG Applications, AI Agents, LLM Fine-Tuning Basics (LoRA/PEFT), NLP

Programming Tools-

Python (Pandas, NumPy, Scikit-learn, TensorFlow/PyTorch), SQL, R

Machine Learning & AI-

Supervised & Unsupervised Learning, Classification, Regression, Clustering Feature Engineering & Model Optimization, Model Evaluation (ROC-AUC, Precision/Recall)

Frameworks & Libraries:

Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, OpenCV, NLTK, Hugging Face Transformers.

Model Optimization :

Hyperparameter Tuning, Cross Validation, ROC-AUC, Precision/Recall, F1-Score, Confusion Matrix, Bias-Variance Analysis

Data Processing Automation-

Data Pipelines (basic level), Automation (Python-based), Data Validation Techniques

Statistical Methods-

A/B Testing, Hypothesis Testing, Statistical Modeling

Cloud & Tools-

AWS / Azure / GCP Basics, Jupyter Notebook, Google Colab, Git, GitHub, Docker (basic), MLflow (basic)

Data Visualization -

Data Storytelling, Dashboard Design, Business Intelligence Reporting

Databases-

MySQL, PostgreSQL, MongoDB (basic)

Soft Skills-

Problem Solving, Analytical Thinking, Cross-functional Collaboration, Communication, Stakeholder Management

EDUCATION

University of New Haven

Master of Science in Data Science, GPA: 3.79/4.0

Courses: Data Engineering, Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing, Power BI

SR Engineering college

Bachelor of Technology in Computer Science AI-ML, GPA: 3.9/4.0

Courses: Machine Learning, Deep Learning, NLP, DSA, DBMS, Operating Systems, Computer Networks, Cloud Computing.

West Haven, CT, USA

Jan 2024- Aug 2025

Hanamkonda, TG, India

Jan 2019- Aug 2023
