EDUCATION

Southern Methodist University

Master of Science in Telecommunications and Network Engineering

Dallas, TX

Dec 2021

University of Mumbai

Mumbai, India

Bachelor of Engineering in Electronics and Telecommunication

June 2018

EXPERIENCE

DevOps Engineer | IptiQ Americas Inc (Swiss Re) | Boston, MA

Feb 2022-Present

- Provisioned new resources in Microsoft and maintained the existing Azure infrastructure using Terraform
- Developed and managed Azure DevOps pipelines to facilitate seamless deployments across environments, from dev to prod.
- Well versed working in SAFe and Scrum environment
- Manage and respond to alerts in Opsgenie, leveraging Azure Monitor and Azure Dashboard to identify and troubleshoot issues effectively and as per priority
- Configured Okta/AzureAD as an identity provider to provide SSO capabilities for various applications
- Achieved a 40% reduction in Microsoft Azure costs by reviewing cost analysis across multiple subscriptions and identifying and removing unnecessary resources
- Setup a new Cloud Operations team, leading a team of 4 and implementing new SOP's. Conducting daily standup and utilizing Azure Devops for tracking progress, managing tasks, and ensuring seamless integration of code changes using Azure pipelines
- Configured and integrated the SFTP application with existing infrastructure, including defining user permissions, setting up encryption protocols, and ensuring proper network access controls.
- Set up firewall policies and address groups on Palo Alto, applied IP whitelisting, ensured compliance with industry standards.

Teaching Assistant for Cloud Engineering | Southern Methodist University | Dallas, TX

Aug 2021-Dec 2021

- Design hands-on labs on AWS services such as VPC, EC2, S3, RDS, IAM, ELB-Load Balancing, CloudWatch, Lambda
- Facilitate interactive sessions with students, assisting them with troubleshooting issues encountered during lab activities

Information Technology Support Analyst | Office of Information Technology at SMU | Dallas, TX

Jan 2020-Aug 2021

- Set up virtualized environment in classrooms enabling instructors to seamlessly conduct remote zoom sessions
- Assisted patrons with computer related issues like software installations, troubleshooting on Windows, Linux and MacOS

TECHNICAL SKILLS

- **Network tools and Protocols:** IPv4/IPv6, OSI model, TCP/IP model, DNS, DHCP/NAT, Wireshark, Cisco packet tracer, GNS3
- **Tools:** Docker, Kubernetes, Git, GitHub, Ansible, Postman, Okta, Microsoft SQL Server Management Studio, Robo3T, PGAdmin, Opsgenie, Palo Alto Firewalls, WinSCP, Oracle VM virtual box, VMware Workstation, Putty
- **Operating System:** Linux, MacOS, Windows
- **Scripting Languages/IAC :** Powershell, Python, Terraform, ARM, Bicep
- **Cloud Technologies:** AWS, Google Cloud Platform, Azure (Virtual Machines, Kubernetes Service, Azure Active Directory (Entra ID), Storage Account, Azure Monitor, SQL Servers, Cost Management), Cloudflare
- **CI/CD:** Azure Devops, ArgoCD
- **Project Management Methodologies:** Agile/Scrum
- **Certifications:** AWS Certified Solutions Architect (Validation ID: FZN8XS5KHMR1QZKF), Cisco Certified Network Associate (Validation ID: 7PCEV74FP3E1QXST)

PROJECTS

Cloud Computing (AWS and GCP)

Jan 2022

- Created and hosted a static website using S3 Storage by enabling versioning, Lifecycle rules, Cross-Region Replication, Bucket policies for hosting a static website
- Built infrastructure on GCP for a website using services like VPC network, Instance groups with autoscaling, load-balancing and health-check, SQL instance and Cloud storage
- Provisioned a 3-tier serverless web application on AWS using AWS Lambda, API Gateway, S3 and DynamoDB

DevOps

Jan 2022- Nov 2024

- Developed and optimized infrastructure as a code solutions using Azure Bicep, ARM and Terraform to manage resources, and streamline configuration in Azure environments, enhancing scalability and efficiency
- Developed a CI/CD pipeline in Azure DevOps to deploy microservices for a voting app on Azure Kubernetes Service (AKS), leveraging ArgoCD for automated continuous deployment.
- Built Kubernetes cluster to join nodes, created and deployed pods using YAML, replicas, high availability, and auto-scaling
