

SIDRATU ISSA

Houston, TX | (346) 329-9946 | sidratuissa85@gmail.com | www.linkedin.com/in/sidratu-issa

PROFESSIONAL SUMMARY

Results-driven Security Engineer and Cybersecurity Specialist with expertise in SIEM implementation, threat intelligence, incident response, network defense, and GRC compliance frameworks. Experienced in building, managing, and optimizing Splunk Enterprise environments and integrating SOAR solutions for automated detection and response. Adept at collaborating cross-functionally to protect data integrity, enhance visibility, and strengthen overall enterprise security posture. Certified in CompTIA Security+, Splunk Enterprise Administration, and Google Cloud Architecture.

CORE COMPETENCIES

Splunk Enterprise & Administration • Security Information & Event Management (SIEM) • Threat Detection & Incident Response • AWS Security & Cloud Operations • NIST 800-53 & RMF Compliance • Governance, Risk & Compliance (GRC) • Network & System Security • IDS/IPS • SOAR Automation • Linux Administration • Bash Scripting • Data Normalization (CIM) • Nessus, Tenable, Rapid7 • MITRE ATT&CK Framework • TCP/IP, VLANs, Routing • ISO, SOX, FIPS, SAP, CISCO

PROFESSIONAL EXPERIENCE

Security Engineer / Cybersecurity | Accenture Palliative Care — Houston, TX

September 2023 – Present

- Architected and developed Splunk dashboards, notable events, and correlation searches to enhance real-time threat visibility across enterprise systems.
- Integrated SOAR platforms with APIs for automated workflow execution, reducing incident response time by 30%.
- Performed threat analysis, vulnerability assessment, and penetration testing using Tenable, Rapid7, and SolarWinds tools.
- Applied MITRE ATT&CK framework to emulate advanced threat actors using Red Team automation and Invoke-Adversary tools.
- Monitored and secured AWS cloud environments using Splunk Enterprise Security, New Relic, and Cisco Stealth Watch.
- Implemented RASP (Runtime Application Self-Protection) and SOAR integrations for adaptive defense automation.

Splunk Administrator | Allied Medical Hospice — Texas

August 2015 – August 2022

- Managed full Splunk deployment lifecycle—data onboarding, clustering, and forwarder configurations across AWS environments.
- Created interactive dashboards, reports, and alerts using SPL to support proactive monitoring and compliance audits.

- Configured and maintained Splunk components: indexers, search heads, and deployment servers in clustered setups.
- Automated log analysis and correlation using regular expressions to improve event normalization and threat detection accuracy.
- Led AWS integration with CloudTrail monitoring to enhance visibility into API calls and user activities.

EDUCATION

University of Phoenix — Cybersecurity Certificate

CERTIFICATIONS

- CompTIA Security+ (Pearson VUE Certified)
- Splunk Certified Power User
- Splunk Enterprise Certified Admin
- Google Cloud Professional Cloud Architect
