Objective

A detail-oriented professional with over 5 years of experience in business analysis, quality assurance, and healthcare-related processes, including Medicare and Medicaid provider enrollment and data management. Seeking a challenging role as a Senior Assistant Processor (Provider Enrollment Analyst) to leverage my expertise in regulatory compliance, provider credentialing, and process improvement in a remote-first environment.

Professional Experience

Cognizant

User Acceptance Tester / Business Analyst

December 2020 – April 2024

- Facilitated Medicare and Medicaid provider enrollment processes by testing applications for compliance with HIPAA and other regulatory standards.
- Conducted functional, system, acceptance, and regression testing for healthcare insurance web applications.
- Analyzed and processed 834 EDI transactions to support enrollment workflows for Medicare and Medicaid programs, including adds, changes, and terminations.
- Utilized tools like JIRA and QTest to document user stories, test cases, and update results during the SDLC.
- Created and validated mockups of EDI files in alignment with Medicare and Medicaid business requirements.
- Performed SQL queries for data validation and executed end-to-end test cases to ensure accuracy and functionality.
- Supported API testing using Swagger and facilitated communication between technical teams and business stakeholders.

Smartnex

Business Analyst

December 2015 – December 2017

- Streamlined content updates and tested environmental health and wellness applications for quality assurance.
- Collaborated with cross-functional teams to maintain and optimize WordPress and PHP-based applications.

- Managed data integrity by updating MySQL databases and improving website performance through SEO testing.
- Leveraged Trello to document and manage user stories and project requirements.

Glynlyon Inc.

Quality Analyst

January 2014 – August 2014

- Performed manual testing for web and desktop applications, including functional, system, and regression testing.
- Transitioned Flash content to HTML5 for tablet compatibility.
- Documented defects and updates using JIRA and validated data with SQL queries.
- Actively participated in Agile sprint planning and provided accurate test estimates.
