SUMMARY

- Over 3+ years of professional experience as a Python developer with broad range of expertise in web-based applications.
- Extensively used full software development lifecycle, object-oriented programming, database design, Scrum and agile methodologies.
- Expertise in Backend Web Technology framework using Python, Django, and REST API. And worked with standard Python packages like Numpy, Matplotlib, Scipy, Pandas, and PyTables.
- Good Knowledge on big data technologies like Hadoop, Kafka and Spark.
- Expert in generating reports by using SQL Server Reporting Services(SSRS). And Experienced in writing Sub Queries, Stored Procedures, MVC model on MySQL, NoSQL and PostgreSQL.
- Strong Knowledge on HTML, CSS, JavaScript, Bootstrap, JSON to deliver cutting-edge user interfaces and components.

SKILLS

Languages: Python, Java, C++

Databases: MySQL, PostgreSQL, NoSQL, Oracle

Cloud Platforms: AWS,GCP and Azure

Reporting: Microsoft PowerBI, Tableau, SSIS, SSAS

Python Framework: Flask, Django

Methodologies: Agile, Scrum

Front End: HTML5, CSS

Scripting: SQL, Java Script

OS: Linux, Windows, MacOS, UNIX

EDUCATION

Master's

Minor in Computer Information and Science • Master's • Arkansas,USA • 2023

Bachelor's

Minor in Computer Science and Engineering • Vel Tech Dr. RR And Dr.SR University • Chennai,India • 2021

EXPERIENCE

Python Developer

Teknomite

June 2023 – Present, Dallas,TX

- Involved in building database Model, APIs and Views utilizing Python, to build an interactive web-based solution.
- Developed robust and scalable software solutions using Java and Python, leveraging object-oriented programming(OOP) principles and best practices to deliver high-quality code.
- Implemented RESTful APIs and web services using Java and Python frameworks like Spring Boot, Django, Flask facilitating seamless integration between various components of the system.
- Strong troubleshooting skills in Python for diagnosing and resolving data-related issues in data pipelines. And Expertise on several standard Python packages like Numpy, matplotlib, Scipy, Pandas, PyTables etc.
- Implemented optimized SQL queries, stored procedures, and triggers using Oracle, SQL, and PL/SQL to improve database performance and efficiency.
- Implemented Jenkins for CI/CD automation, resulting in a 30% reduction in deployment time and ensuring timely software releases.

Software Developer

Elite Solutions

January 2023 – May 2023, Atlanta, GA

- Built a GC analytic tool using Python, to help clients analyze data and profile risk against a wide spectrum of reinsurance options.
- Developed custom reports using HTML, Python and MySQL. And Developed monitoring and notification tools using Python.
- Created Data tables utilizing PyQt to display customer and policy information and add, delete, update customer records. And Created PyUnit test cases for unit testing.
- Implemented version control system using GitHub to track project progress and collaborate with team members, ensuring smooth workflow in an agile development environment.

Software Developer

CGI

June 2021 – December 2021, Chennai,India

- Developed and designed an API (RESTful Web Service) for the company's website. And Involved in impact analysis of Change requests and Bug fixes.
- Created and maintained business process diagrams using MS Visio, resulting in a 20% increase in process efficiency.
- Designed various tables required for the project in Oracle database and used Stored Procedures in the application.
- Designed and implemented SSIS Package to migrate data from multiple data sources for data analyzing, deploying and dynamic configuring of SSIS packages and Implemented visualized BI Reports with Tableau.
