Florida, USA

EDUCATION

- **Trine University** - Masters in Information Technology

Florida, USA | 2023 – 2024

PROFILE SUMMARY

- 5+ years of progressive experience in **DevOps, Cloud Infrastructure, and Automation**, delivering scalable, secure, and enterprise-grade solutions across diverse industries. Proven expertise in **multi-cloud environments (AWS, Azure, GCP)** with deep knowledge of compute, storage, networking, and cost-optimization strategies. Strong background in designing and implementing **CI/CD pipelines** using **Jenkins, GitLab CI/CD, GitHub Actions**, and **Azure DevOps** for faster, reliable software delivery.
- Extensive hands-on experience with **Infrastructure as Code (IaC)** tools such as Terraform, AWS CloudFormation, and Pulumi to ensure consistent, automated provisioning.
- Skilled in **containerization and orchestration** with Docker, Kubernetes, EKS, and AKS; experienced in managing microservices and serverless solutions (AWS Lambda, Azure Functions, Fargate). Proficient in **configuration management tools** (Ansible, Chef, Puppet) to streamline infrastructure automation and enforce consistency across environments.
- Expertise in **cloud security, governance, and compliance** including IAM, VPC, Security Groups, HIPAA, GDPR, and SOC frameworks. Strong command over **monitoring and logging solutions** such as Prometheus, Grafana, ELK Stack, AWS CloudWatch, and Azure Monitor to ensure high availability and performance.
- Advanced knowledge of **networking concepts** (DNS, VPN, Load Balancers, CDNs) and **data services** (S3, EBS, Azure Blob Storage, RDS). Adept at leading **large-scale DevOps initiatives**, implementing zero-downtime deployment strategies (blue-green, canary, rolling updates), and fostering collaboration in **agile environments**.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS: EC2, S3, Lambda, RDS, Microsoft Fabric, CloudFormation, CloudWatch, ECS, EKS, API Gateway, IAM, Route 53, AWS Backup, Azure: Virtual Machines, Blob Storage, Azure Functions, AKS, Azure DevOps, Cosmos DB, Logic Apps, Azure Monitor, Application Gateway, Azure Policy, Google Cloud Platform (GCP): Compute Engine, GKE, Cloud Storage, Big Query, Cloud Pub/Sub, Dataflow
- **IaC & Automation:** Terraform, AWS CloudFormation, Azure Resource Manager (ARM), Pulumi, Ansible, Chef
- **CI/CD & Build Tools:** Jenkins, GitLab CI/CD, Azure devops pipelines, Github Actions, Bamboo, CircleCI, ArgoCD, Maven, Gradle, Nexus, Artifactory, npm, Docker Registry.
- **Monitoring & Logging Tools :** Prometheus Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), AWS CloudWatch, Azure Monitor, Splunk, Datadog, New Relic
- **Networking & Security Tools:** VPC, Subnets, Security Groups, Load Balancers, DNS, CDN (CloudFront, Akamai), Firewalls, VPNs, IAM, KMS, Secrets Manager, WAF, SSL/TLS
- **Languages & Scripting:** Python (automation), Bash (deployment), Java, Go, Powershell, Ruby
- **Containerization & Orchestration :** Docker, Kubernetes (EKS, AKS, GKE), Helm, Openshift, Docker Swarm
- **Databases & Storage:** MySQL, PostgreSQL, SQL server, DynamoDB, CosmosDB, MongoDB, Redshift, BigQuery, Aurora, Redis, Memcached
- **DevSecops & Serverless :** SonarQube, Checkmarx, Aqua Security, Synk, Trivy, Clair, AWS Lambda, Azure Functions, Logic Apps, Step Functions, EventBridge, S3 Events
- **Workflow & Messaging :** Apache Airflow, AWS Step Functions, Azure Data Factory, Prefect, Kafka, RabbitMQ, Nginx, Apache HTTP Server, HAProxy
- **Development Frameworks :** Node.js, Java, .NET, Spring Boot (where applicable to DevOps automation)
- **Others:** JFrog Artifactory, Postman, Jira, Apache Airflow, Packer, Vagrant, Vault (Secrets Management), Istio, Linkerd, Service Mesh.

WORK EXPERIENCE

Electronic Arts – Senior Azure Devops Engineer

Orlando, Florida | July 2024 – PRESENT

- Designed, implemented, and optimized **scalable data pipelines and ETL workflows** using **Azure Data Factory (ADF)**, integrating data from multiple sources into **Azure Data Lake** and **Azure Synapse Analytics** for enterprise analytics solutions.
- Automated **Azure infrastructure provisioning** using **Terraform** and **ARM templates**, deploying **Virtual Networks, Subnets, Load Balancers, VM Scale Sets, Azure VMs, AKS, and Web Apps** to ensure scalable and secure cloud environments. Built and maintained **CI/CD pipelines** with **Azure DevOps**, enabling seamless, zero-downtime deployments of data processing, analytics, and microservices-based applications.
- Ensured **cloud security and compliance** (HIPAA, RBAC, TLS/SSL, Key Vault, disk encryption) by implementing strict access controls, encryption strategies, and secure authentication via **Azure AD, ADFS, and Azure AD Connect**.
- Migrated on-premises databases and applications to **Azure Blob Storage, Azure SQL Database, and Cosmos DB**, ensuring data integrity, high availability, and minimal downtime during cloud transitions.
- Leveraged **Azure Databricks, HDInsight, Azure Functions, and Logic Apps** for large-scale data processing, serverless automation, and event-driven workflows to enhance analytics, reporting, and operational efficiency.
- Developed and maintained **CI/CD pipelines** using **Azure DevOps**, integrating automated testing, code quality checks (**SonarQube**), and artifact management with Azure Artifacts to streamline application delivery and ensure consistent release management.
- Implemented monitoring, alerting, and logging solutions using **Azure Monitor**, Log Analytics, and Application Insights to proactively identify issues, improve system reliability, and optimize resource utilization.
- Configured and managed containerized workloads using **Docker and Azure Kubernetes Service (AKS)**, optimizing cluster scaling, resource allocation, and rolling updates for high availability and performance.
- Implemented Infrastructure as **Code (IaC)** best practices using Terraform, ensuring version-controlled, reusable, and modular deployment templates across multiple environments (**Dev, QA, UAT, and Prod**).
- Collaborated with cross-functional teams to design automated build and deployment pipelines for .NET, Python, and Java-based microservices, improving deployment frequency and reducing manual interventions.
- Integrated **Azure DevOps** with third-party tools such as **Jira, ServiceNow, and GitHub** for improved visibility, incident tracking, and agile project management, enhancing overall **DevOps collaboration and productivity**.

Millennium Management – Senior AWS Devops Engineer

Miami, USA | Feb 2023 – June 2024

- Designed, implemented, and maintained **CI/CD pipelines** using **Jenkins, GitHub, Docker, and AWS**, enabling automated application deployment, testing, and version control across multi-environment infrastructures.
- Configured and optimized **AWS infrastructure** including **EC2, ELB, S3, RDS, Redshift, and Lambda**, ensuring high availability, performance tuning, automated backups, and event-driven serverless workflows.
- Automated **cloud provisioning, configuration management, and deployments** using **Ansible, Chef, CloudFormation, AWS CLI, and Python scripts**, ensuring consistency, efficiency, and scalable infrastructure management. Managed **data migration and large-scale data operations** using **AWS DMS, SMS, Snowball**, and automated ETL workflows into **S3, RDS, and Redshift**, while performing data validation, profiling, and integration.
- Implemented **cost optimization and operational automation** through Ansible Playbooks, auto-start/stop of AWS resources, containerization with **Docker**, and environment orchestration to maximize efficiency and reduce overhead.
- Developed and maintained **automated CI/CD pipelines using AWS CodePipeline, CodeBuild, and CodeDeploy**, integrating with Jenkins and GitHub for seamless continuous integration and zero-downtime deployments across environments.
- Designed and implemented **ECS and EKS clusters** for container orchestration, deploying microservices-based applications with autoscaling, service discovery, and secure networking **via AWS VPC and IAM roles**.

- Designed, implemented, and maintained **CI/CD pipelines** using **Jenkins, GitLab CI/CD, Travis CI, and CircleCI**, automating application deployment, testing, and version control while integrating security best practices.
- Managed and automated **cloud infrastructure provisioning** using **Terraform, CloudFormation, Ansible, Puppet, and Chef**, ensuring scalable, reliable, and optimized environments on **AWS**.
- Leveraged **Docker and Kubernetes** for containerization and orchestration of microservices, implementing **monitoring and alerting solutions** with **Prometheus, Grafana, ELK Stack, Splunk, and Datadog** to track performance and uptime.
- Automated operational and repetitive tasks using **Python, Bash, and PowerShell**, improved configuration management, system provisioning, and deployment efficiency while performing code quality and vulnerability checks using **SonarQube** and **Snyk**. Administered **cloud databases** (AWS RDS, Redshift, Cosmos DB), implemented backup and disaster recovery strategies with **AWS Backup, CloudFormation, and automation scripts**, ensuring high availability, data integrity, and business continuity.
- Developed and managed end-to-end **CI/CD pipelines integrating Jenkins, GitLab, and Docker registries**, enabling automated build, test, and deployment workflows across hybrid and multi-cloud environments.
- Implemented **Infrastructure as Code (IaC)** principles using Terraform modules and Ansible playbooks to ensure consistency, version control, and seamless provisioning of infrastructure across **Dev, QA, and Production** environments.
- Configured and optimized **Kubernetes clusters (EKS, AKS, GKE)** with Helm charts for deployment automation, autoscaling, and rolling updates, ensuring fault-tolerant and self-healing containerized workloads.
- Integrated **monitoring, logging, and alerting systems** using CloudWatch, Prometheus, Grafana, and ELK, reducing MTTR and improving incident visibility through proactive alert automation and anomaly detection.
- Implemented **DevSecOps best practices** by integrating security scanning tools like Trivy, Clair, and Aqua Security within CI/CD pipelines to identify vulnerabilities early and ensure compliance with security standards.
- Collaborated with cross-functional teams to **standardize CI/CD workflows, automate testing, and optimize cloud cost and performance**, improving overall release velocity and operational efficiency.

- Designed, implemented, and managed **AWS Cloud infrastructure** using **CloudFormation, Terraform, and AWS CodePipeline**, automating deployment, provisioning, and configuration of scalable cloud environments.
- Built and maintained **custom VPCs, subnets, NAT gateways, databases, and secure network configurations** using AWS services including **Lambda, Route 53, Security Groups, and Network ACLs** to ensure high availability and compliance. Leveraged **containerization and orchestration** with **Docker, ECS, and Kubernetes**, deploying microservices, managing container replicas, and ensuring scalable and resilient application environments.
- Developed and maintained **CI/CD pipelines** integrating **Jenkins, Bitbucket, Gradle, and Docker Registry**, enabling automated testing, builds, and deployment of cloud-native applications.
- Implemented **monitoring, metrics visualization, and performance optimization** using **Prometheus and Grafana**, while managing Docker images, Kubernetes clusters, and middleware configurations for efficient cloud operations.
- Implemented **cost optimization and resource management strategies** using AWS Cost Explorer, Trusted Advisor, and CloudWatch metrics to monitor utilization, enforce budgets, and reduce operational overhead.
- Designed and maintained **disaster recovery (DR) and backup strategies** leveraging AWS Backup, S3 lifecycle policies, and cross-region replication to ensure data durability and business continuity.
- Integrated **security and compliance controls** using AWS IAM, KMS, GuardDuty, and CloudTrail, establishing least-privilege access, encryption, and automated audit logging across all environments.

CERTIFICATIONS

- AWS Solutions Architect Associate
- Oracle Certified Java SE 8 developer
- Microsoft Azure Certified
