

SRAVANI DEVARAKONDA

Full Stack Developer

sravani.d@mycvscout.com | 816 529 6412 | [LinkedIn](#) | [GitHub](#)

SUMMARY

- **Full Stack Developer** with **4 years** of expertise in **Java (Spring Boot, Spring MVC)**, **microservices**, **RESTful APIs**, and **cloud-based architectures**, delivering scalable and high-performance solutions.
- Proficient in designing, developing, and deploying full-stack web applications using the **MERN (MongoDB, Express.JS, React.JS, Node.JS)** stack, improving system performance and scalability by 30%.
- Basic experience with **.NET** and **C#**, contributing to backend service development and API integrations. Skilled in implementing **CI/CD pipelines** with Jenkins, optimizing deployments on **AWS**, and leveraging **Docker** for streamlined containerization.
- Strong database expertise in **MySQL, SQL Server**, and **MongoDB**, optimizing queries to enhance efficiency by 35%.

WORK EXPERIENCE

Charles Schwab, MO | Full Stack Developer

Jan 2024 – Current

- Engineered a scalable, modular **React UI** framework with reusable components, reducing code redundancy by 40%.
- Developed and optimized enterprise-level full-stack solutions, enhancing performance and scalability while accelerating user response times by 35%.
- Designed and implemented microservices with **Spring Boot** and **Kafka**, ensuring efficient, real-time data processing and reducing system latency by 40%.
- Utilized **GraphQL** to enhance API efficiency, reducing data transfer overhead and improving query execution by 30%.
- Deployed **AWS-based cloud solutions** via CodeDeploy and CodePipeline, streamlining release cycles and cutting deployment errors by 25%.
- Strengthened automated testing strategies using **JUnit** and **Mockito**, increasing test coverage and ensuring 45% faster bug resolution.

Accenture, India | Application Development Associate

Oct 2021 – Mar 2023

- Developed robust **RESTful APIs** with **Java Spring Boot**, optimizing system performance and decreasing response times by 20%.
- Enhanced **React.js** front-end applications, refining component architecture and decreasing load times by 30%.
- Composed high-availability microservices with **RabbitMQ** messaging queues, improving inter-service communication efficiency.
- Refactored **MySQL** database queries, improving query execution speed by 25% and optimizing data retrieval processes.
- Introduced automated testing suites with **Mockito** and **JUnit**, **boosting** test coverage by 35% and ensuring stability in production.
- Increased team productivity by leveraging **Agile** methodologies for task management and prioritization.
- Created **CI/CD automation** scripts using **Jenkins** and **Docker**, reducing manual deployment efforts by 50%.

Zensar Technologies, India | Full Stack Developer

Jan 2020 – Sep 2021

- Created responsive, interactive UI components using **React.js**, enhancing user engagement and site performance by 45%.
- Crafted and maximized RESTful APIs using **Java Spring Boot** and **.NET**, reducing system response times by 30%.
- Managed **Docker** and **Kubernetes-based** containerized deployments, minimizing downtime by 30% and increasing system resilience.
- Implemented **Elasticsearch** for real-time search indexing, cutting query execution time by 30% and improving search accuracy.
- Led **Agile-based** development initiatives, increasing sprint efficiency and productivity by 25%.
- Optimized system observability with **Grafana** and **Prometheus**, boosting troubleshooting efficiency by 40%.

SKILLS

- **Methodologies:** SDLC, Agile/Scrum, Waterfall
- **Languages & Frameworks:** Java (Spring Boot, Spring MVC, Spring Cloud, Hibernate), JavaScript (React.JS, Node.JS, Express.JS, Next.JS, Angular, Angular.js), TypeScript, C++, Python, C# (.NET - Basic)
- **Web & API Technologies:** HTML5, CSS3, JavaScript, jQuery, Ajax, XML, Redux, REST API, GraphQL
- **Cloud & DevOps:** AWS (S3, SQS, SES, EC2, Lambda, ECS, EKS, CodeDeploy, CloudWatch), Docker, Kubernetes, Jenkins, Ansible
- **Database:** MySQL, PostgreSQL, DynamoDB, Oracle, MongoDB
- **Testing & Tools:** Postman, Mockito, JUnit, Git, GitHub, Maven, RabbitMQ, Kafka, Grafana, Docker, Ansible
- **Operating System:** Windows, MacOS, Linux, Unix

EDUCATION

Master of Science in CIS & IT | University of Central Missouri, MO

Bachelor of Technology in Computer Science Engineering | Vignan's Lara Institute of Technology & Science, India

CERTIFICATES

- JavaScript Advanced Concepts Udemy
- React.js Frontend Developer Certification Unacademy
