

SRI SAI AKHIL GODAVARI

Marketing Data Analyst

srisaiakhilgodavari@gmail.com | +1 216-301-4611 | CLEVELAND, OHIO, 44114 [LinkedIn](#)

SUMMARY

Marketing Data Analyst with 4 years of experience transforming marketing, customer, and campaign data into actionable business insights that improve acquisition, engagement, retention, and revenue performance. Experienced in analyzing multi-channel marketing performance across paid media, SEO, email, CRM, social, web analytics, and customer lifecycle funnels, with a strong focus on converting raw data into strategic recommendations for business growth. Proven ability to work across marketing, product, sales, and leadership teams to build dashboards, optimize campaign performance, evaluate channel ROI, perform attribution analysis, and improve customer segmentation strategies. Strong expertise in SQL, Python, Excel, Tableau, Power BI, Google Analytics, Looker Studio, A/B testing, marketing attribution, forecasting, and KPI reporting in fast-paced, data-driven environments. Hands-on experience with marketing analytics, campaign reporting, audience behavior analysis, customer journey mapping, funnel diagnostics, and performance measurement across both B2B and B2C business models.

EXPERIENCE

Marketing Data Analyst | McKinsey & Company, USA

May 2025 - Present

- Developed interactive dashboards and reports in Power BI, translating complex data into clear and actionable insights for stakeholders, leading to a 20% increase in data-driven decision-making across the organization.
- Lead end-to-end marketing analytics initiatives by analyzing campaign, CRM, website, and customer engagement data to improve acquisition, retention, and overall growth performance across digital channels.
- Built executive dashboards in Tableau, Power BI, and Looker Studio to track CAC, CPL, ROAS, conversion rate, MQLs, and pipeline contribution, reducing manual reporting effort by 65%.
- Performed campaign and funnel analysis using SQL, Python, and GA4 to identify drop-off points, channel inefficiencies, and audience trends, improving lead conversion efficiency by 28%.
- Designed attribution reporting frameworks to measure channel contribution across customer touchpoints, helping optimize media spend and reduce budget inefficiencies by 22%.
- Analyzed landing page behavior, form performance, and traffic quality to improve conversion paths and user engagement, resulting in a 31% increase in landing page conversion rates.
- Automated recurring reporting workflows using SQL, Excel automation, Python, and BI tools, saving over 15 hours per week and improving reporting consistency.

Data Analyst | Tech Mahindra, India

Jun 2020 - Jul 2023

- Analyzed digital marketing and lead generation performance across Google Ads, LinkedIn Ads, email campaigns, CRM, and website traffic, helping improve targeting and campaign efficiency.
- Created dashboards and scorecards using Excel, SQL, Power BI, and Google Analytics to monitor CTR, CPC, CPL, ROI, lead quality, and conversion trends across active campaigns.
- Performed lead funnel analysis to identify drop-offs between marketing engagement and downstream sales stages, helping improve lead progression rates by 24%.
- Conducted attribution analysis and funnel diagnostics to understand traffic source contribution and user behavior, helping improve conversion efficiency by 20%.
- Evaluated website and landing page performance through traffic source analysis, engagement trends, and form completion behavior, improving conversion rates by 27%.
- Worked with CRM and operations teams to clean and structure campaign data, reducing duplicate lead records and improving reporting accuracy for business reviews.
- Supported A/B testing across ad creatives, email subject lines, CTAs, and landing pages, helping marketing teams improve campaign engagement through data-backed decisions.
