EDUCATION

Master of Science in Computer Science, Wichita State University, Wichita, KS
Bachelor of Science in Computer Science, Wichita State University, Wichita, KS

May 2024
May 2022

SKILLS

Programming and Database: Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL, MySQL

Data Visualization and Analytics: Power BI, Tableau, Power Query, Advanced Excel

Cloud Platforms: Microsoft Azure, Google Cloud Platform (GCP)

Project Management Tools: Figma, Trello, Jira, Confluence

VOLUNTEER EXPERIENCE

Volunteer Extern, Stanford Medicine Business Process Design Externship

Mar 2025 – Present

- Led comprehensive root cause analyses in Stanford's nephrology clinics, identifying critical inefficiencies and reducing patient wait times by 25% through optimized workflows and AI-driven research tools.
- Created interactive decision trees grounded in KDIGO, KDOQI, and CMS guidelines, improving triage accuracy by 30% and enhancing collaboration across MDs, RNs, APPs, and PCCs.
- Prototyped a decision-support dashboard using Kotter's Model, driving a 40% increase in adoption of evidence-based practices and streamlining interdepartmental decision-making at Stanford Medicine.

Data Analyst Apprentice, Clicked

Jul 2024 – Dec 2024

- Led a Delta Airlines case study by developing predictive models to forecast passenger demand and flight delays, integrating multiple data sources such as airline reservations and customer feedback, boosting operational efficiency by 20%.
- Collaborated with Delta Airlines' IT and operations teams to streamline data integration workflows, reducing manual processing time by 40% to enable real-time optimization of flight scheduling and resource allocation.

WORK EXPERIENCE

Data Analyst, Delta Bravo Artificial Intelligence, Rock Hill, SC

Jan 2024 – Jun 2024

- Achieved 95% data accuracy in homelessness population analysis by processing 3M+ rows of raw US Census data with Power Query, performing data type conversion and missing value imputation.
- Enhanced predictive modeling accuracy by 15% for regional trend analysis by leveraging statistical techniques like z-scores to detect anomalies, refining user segmentation for data-driven policymaking.
- Analyzed 10 years of housing trends for 330M residents by developing Power BI dashboards with KPIs like median rent-to-income ratio using slicers and custom DAX measures like YoY growth and moving averages.
- Optimized rental assistance programs and funding allocation by presenting insights to housing stakeholders using Power BI Map Visuals to geographically identify underserved communities.

Data Analyst, Ennovar Information Systems, Wichita, KS

Jun 2023 – Dec 2023

- Enhanced data cleaning efficiency by 30% by leveraging Excel's conditional formatting to flag inconsistencies on 1500+ rows of student employee data.
- Optimized data retrieval accuracy to 95% by designing a PostgreSQL data pipeline with 3NF normalization to eliminate redundancy and range partitioning by hire date.
- Improved HR onboarding efficiency by 40% by integrating cleaned data and automated pipeline outputs into workflows, saving up to 16 hours of manual processing per month.
- Guided hiring strategies by presenting HR team with key workforce metrics such as employee churn rates per department, leading to enhanced data-driven decision-making.

Graduate Assistant Data Analyst, School of Computing – Wichita State University

Aug 2022 – May 2024

- Identified at-risk students with 95% accuracy by analyzing performance data for 800+ students using Excel's time-series trend analysis, enabling tailored interventions and adaptive learning plans.
- Collaborated with 15+ faculty to address teaching challenges by leveraging early warning indicators like assessment scores and participation trends, increasing student retention by 25%.
- Developed Tableau dashboards to track academic progress across semesters, integrating KPIs like average grades and assignment completion rates for real-time monitoring.
- Led data-driven curriculum improvements by presenting insights to faculty, using key metrics such as pass/fail rates and grade distribution to refine teaching strategies.
