SUMMARY

Data Analyst with 5+ years of experience transforming large and complex datasets into actionable insights and scalable analytics solutions. Skilled in Python, SQL, and Snowflake with proven expertise in building ETL pipelines on AWS (Glue, Lambda, Redshift) and applying machine learning techniques such as Logistic Regression, Random Forest, and clustering to support forecasting, risk modeling, and operational improvements. Experienced in healthcare, retail, and supply chain domains, with a strong track record of developing Tableau and Power BI dashboards that enhanced executive decision-making, reduced costs, and improved efficiency in Agile environments.

SKILLS

- Methodologies:** SDLC, Agile, Waterfall
- Languages:** Python, R, SQL, SAS, MS Excel (Advanced, VBA)
- Packages:** NumPy, Pandas, Matplotlib, SciPy, Seaborn, Ggplot2
- Machine Learning Skills:** Supervised Learning, Unsupervised Learning, Classification, Linear Regression, Logistic Regression, Decision Trees, Random Forests, Naive Bayes, KNN, K-means
- Visualization Tools:** Tableau, Power BI, Microsoft Excel, QlikView, Google Analytics
- Cloud Platforms:** AWS, Google Cloud Platform (GCP), Azure
- Big Data Technologies:** Hadoop, Hive, Apache Spark, Databricks
- ETL Tools:** Informatica, Talend, Alteryx
- Reporting Tools:** SAS BI, Cognos, Business Objects
- Database:** MySQL, SQL Server, MongoDB, Snowflake
- Other Skills:** Data Cleaning, Data Wrangling, Critical Thinking, Problem-Solving, Communication, Presentation

EXPERIENCE

- Cigna | Data Analyst

Dec 2024 - Current

 - Designed and automated ETL pipelines using AWS Glue and Lambda, streamlining healthcare claims and patient eligibility data ingestion from multiple sources and reducing processing time by 35%.
 - Conducted advanced data analysis with Python (Pandas, NumPy) and SQL on claims, policyholder, and provider datasets to identify cost drivers and enhance risk stratification models.
 - Built interactive Tableau and Power BI dashboards to track healthcare utilization, provider network performance, and member engagement, enabling leadership to make faster, data-driven decisions.
 - Implemented predictive modeling techniques (Logistic Regression, Random Forest, SVM) to forecast patient readmission risks, contributing to targeted care management programs.
 - Collaborated with actuarial and business teams under Agile methodology, translating complex insights into actionable recommendations that optimized care delivery and reduced costs.
 - Developed HIPAA-compliant data quality and compliance frameworks, ensuring the accuracy, integrity, and security of sensitive patient information across Cigna’s analytics ecosystem.
- University of South Florida, FL | Graduate Assistant

May 2024 - Nov 2024

 - Designed and delivered an applied analytics curriculum covering EDA, statistical hypothesis testing, and supervised ML models, boosting average course performance by 12%.
 - Curated real-world datasets from finance, healthcare, and retail domains for student labs, integrating Tableau, Python, and SQL into hands-on exercises that replicated business intelligence workflows.
 - Built a modular grading framework in Jupyter with automated unit tests, ensuring consistency across 300+ students.
- Infinite Infolab, Remote | Data Analyst

Aug 2020 - July 2023

 - Designed and deployed customer segmentation models (K-Means, hierarchical clustering) on 1M+ records, driving targeted campaigns that generated \$1.5M annual revenue uplift and improved marketing ROI.
 - Directed a zero-downtime AWS cloud migration using parallel replication and checksum validation, ensuring seamless transition of enterprise systems and finishing the project 3 months ahead of schedule.

- Built interactive Tableau dashboards for supply chain and inventory management, giving leadership real-time visibility that reduced overstock by 22%, cut order delays by 30%, and improved operational efficiency

Orion Technolab, Remote | Data Analyst

June 2019 - July 2020

- Built scalable data pipelines using Apache Spark on Databricks to process large retail transaction datasets, enabling real-time customer segmentation for 50+ clients, improving personalization and operational efficiency.
- Developed data visualizations using R and Seaborn to identify pricing trends, informing dynamic pricing strategies that boosted revenue by \$500K through optimized promotional campaigns.
- Created predictive models for customer churn analysis, improving retention rates by 15% and saving \$800K annually in customer acquisition costs through targeted engagement strategies.
- Designed Power BI reports with advanced DAX calculations for sales forecasting, achieving 98% accuracy across 100+ product lines, guiding \$10M in annual budgeting decisions.
- Optimized Snowflake data warehouse queries through indexing and partitioning, reducing query execution times by 35% for 200 daily reports, enhancing client-facing reporting efficiency.

Projects

Healthcare Claims Optimization Project

- Developed Python scripts using Pandas and NumPy to preprocess 10TB datasets, reducing processing time by 37.5% and saving significant operational costs monthly.
- Built predictive models with 92% accuracy to enhance medical imaging analysis, streamlining diagnosis workflows and reducing case backlogs by 500 monthly.
- Created interactive Tableau dashboards with dynamic filters, enabling real-time visualization of claims trends and identifying substantial cost-saving opportunities.

Real-Time Inventory Management System

- Optimized ETL pipelines to integrate 5M customer records daily, enabling real-time inventory visibility across multiple warehouses and improving supply chain efficiency.
- Enhanced database performance through query optimization and indexing, cutting report generation time by 40% and accelerating data-driven decisions.
- Developed automated Tableau dashboards to track inventory, reducing excess stock by 22% and cutting order delays by 30% through improved visibility.

Education

Master's in Business Analytics and Information Systems

May 2025

University of South Florida, Tampa
