

Leela Surendar Reddy Munnangi

Java Developer

Location: USA | Email: mlsreddy9966@gmail.com | Phone: +1 (508) 986-8341 | [LinkedIn](#)

Summary

- Java Developer with 5+ years of experience in backend development, microservices architecture, and cloud technologies.
- Proficient in Java (Core Java, Java 8+), Spring Boot, Hibernate, and Spring MVC.
- Skilled in designing and developing scalable and secure RESTful APIs for efficient communication between microservices and external systems.
- Extensive experience with cloud platforms including AWS (Lambda, S3, EC2) for serverless applications and AWS RDS for database management.
- Strong knowledge of containerization with Docker and Kubernetes, enabling efficient scaling and deployment of applications.
- Expertise in CI/CD pipeline implementation using Jenkins, ensuring automated testing and streamlined deployments.
- Proficient in PostgreSQL, MySQL, MongoDB, and Oracle for data storage and optimization of database interactions.
- Experienced in Agile methodologies (Scrum), with a collaborative approach to team projects and continuous delivery.
- Strong focus on Test-Driven Development (TDD), using JUnit, Mockito, and Postman for automated testing.
- Proven ability to troubleshoot and optimize applications, ensuring high performance and minimal downtime.

TECHNICAL SKILLS

- **Languages:** Java (Core Java, Java 8+), JavaScript, SQL, Python
- **Methodologies:** Agile, Scrum, TDD (Test-Driven Development), CI/CD
- **Frameworks:** Spring Boot, Hibernate, Spring MVC, ReactJS, Angular, Django
- **Tools:** Jenkins, Git, JIRA, Maven, Gradle, JUnit, Mockito, Postman, Swagger
- **Cloud:** AWS (EC2, S3, Lambda), Docker, Kubernetes, Google Cloud Platform (GCP)
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB, DynamoDB
- **Web Technologies:** HTML5, CSS3, RESTful APIs, SOAP, AJAX
- **Version Control:** Git, GitHub, GitLab
- **Other:** Microservices, Kafka, RabbitMQ, Redis, Redis Pub/Sub

PROFESSIONAL EXPERIENCE

CVS Health

February 2024 – Present

Java Developer

- Developed backend services using Spring Boot to support banking functionalities like account management, transactions, and balance checks.
- Designed and exposed scalable RESTful APIs for secure banking operations, enabling seamless user interactions with the system.
- Optimized database operations with Hibernate ORM, ensuring efficient data persistence and retrieval using PostgreSQL.
- Integrated Spring Security with JWT token-based authentication, safeguarding sensitive financial data and ensuring secure transactions.
- Collaborated in an Agile team, implementing CI/CD pipelines with Jenkins for automated testing, deployment, and continuous improvement.

Infosys

June 2018 – July 2021

Java Developer

- Developed and deployed serverless functions using AWS Lambda in Java, enabling efficient file upload, sharing, and retrieval in a scalable, cloud-based environment.
- Integrated AWS S3 for secure file storage, providing robust solutions for managing and organizing user-generated content across multiple platforms.

- Implemented authentication and authorization features using AWS IAM and Lambda Authorizers, ensuring secure access to file storage and sharing functionalities.
- Utilized PostgreSQL for metadata storage, storing critical user information and file attributes, ensuring high availability and consistency.
- Optimized serverless architecture by minimizing execution time and cost through efficient code design and resource allocation using AWS Lambda and API Gateway.
- Automated deployment and scaling of serverless functions with AWS CloudFormation and Jenkins, implementing CI/CD pipelines for streamlined code delivery.
- Wrote unit and integration tests using JUnit and Mockito, ensuring system reliability and performance under high traffic conditions.

Trigent

January 2017 – May 2018

Java Developer

- Developed a microservices-based backend using Spring Boot to streamline product management, order processing, and payment gateway integration for an e-commerce platform.
- Designed and implemented scalable RESTful APIs for managing user accounts, inventory, and orders, ensuring smooth communication between microservices.
- Optimized database interactions with Hibernate and MySQL, improving performance and reducing latency in transactional processes.
- Integrated Kafka for asynchronous message processing, enabling real-time updates across the system.
- Built and maintained CI/CD pipelines using Jenkins, automating deployment to AWS EC2 and ensuring continuous integration and testing.
- Deployed containerized applications using Docker and Kubernetes, enabling efficient scaling and management of services.
- Collaborated with cross-functional teams in an Agile environment, ensuring timely delivery of features and smooth sprint execution.

EDUCATION

- **Clark University – Worcester, MA** **Aug 2021 - Dec 2022**
Master of Science in Information Technology
- **Gitam University – Vishakhapatnam, India** **Aug 2014 - May 2018**
Bachelor of Technology in Electronic & Electrical Engineering
