BARTLETT, IL • (630) 207-5376 • REACHALIS@GMAIL.COM

DATA SCIENTIST

MACHINE LEARNING • DATA SCIENCE • SOLUTIONS OPTIMIZATION

Conducting data analysis and implementing statistical models to extract insights from large datasets, resulting in actionable recommendations for business improvement.

Innovative and Forward-thinking Data Scientist with a strong background in statistical analysis, machine learning, and data visualization. Proficient in leveraging SAS and Databricks for data manipulation, modeling, and analysis. Skilled in developing predictive models using SAS to optimize business processes and drive strategic decision-making. Demonstrated ability to extract insights from complex datasets and communicate findings to technical and non-technical stakeholders. Proven track record of successfully delivering data-driven solutions that improve operational efficiency and enhance customer satisfaction. Strong problem-solving skills and a passion for turning data into actionable insights. Excellent collaboration and communication abilities, working effectively in cross-functional teams. Dedicated to staying up-to-date with the latest advancements in data science and implementing best practices.

PROFESSIONAL EXPERIENCE

INSIGHT GLOBAL – UNITED HEALTH GROUP | MINNEAPOLIS, MN

JUL 2023– PRESENT

Senior Data Analyst

Overview: Worked with Group Retiree Marketing team to conduct comprehensive campaign effectiveness studies in Databricks utilizing Python, Pyspark, and SQL. Cooperated closely with upper-level management to deliver highly effective insights and recommendations on optimizing campaign response rates. Providing precious insights and actionable recommendations, to help improve outcomes for future campaigns

Selected Career Benchmarks:

- Worked closely with upper management to present results and recommendations of campaigns.
- Utilized Databricks to complete analysis of campaigns and present findings to the marketing team
- Selected based on leading attributes and reputation to be a pivotal participant in conducting a deep dive into various campaigns for various outreach metrics and evaluating the influence of each campaign in meeting their specific needs and objectives.

TCS – HYUNDAI CAPITAL AMERICA | IRVINE, CA

JAN 2023 – JUL 2023

SAS Developer

Overview: Conducted comprehensive research and analysis to gather valuable intelligence on SAS implementation across various departments in HCA. Collaborated closely with upper-level management to deliver impactful insights and recommendations on optimizing SAS usage. Paved the way for company-wide advancement by providing valuable insights and actionable recommendations, ultimately driving enhanced efficiency and effectiveness in data analytics operations.

Selected Career Benchmarks:

- Laid groundwork to improve data analytics operations by conducting extensive departmental and one-on-one interviews with fellow teammates, gathering crucial information to present a comprehensive SAS usage summary to upper management.
- Handpicked based on stellar qualities and reputation to be a pivotal participant in conducting a deep dive into the SAS code inventory for each department, effectively assessing the efficacy of SAS in meeting their specific needs and objectives.
- Ignited company growth and catalyzed immediate positive change by leveraging the findings from the SAS usage summary and deep dive analysis to identify potential areas of improvement, thereby fueling business development opportunities.

TCS -CITI BANK | ELK GROVE VILLAGE, IL

JUN 2022 – DEC 2022

SAS Developer

Overview: Strategized and executed a comprehensive analysis of invalid data in CITIKYC, presenting discernment to upper management and fellow teammates, resulting in informed decision-making and enhanced data quality. Championed using ad hoc requests for comparison and reporting, convalescing and implementing data-driven solutions that improved efficiency and accuracy.

Selected Career Benchmarks:

- Turned around culture, creating an employee-friendly and high-performing department by developing, maintaining,

and executing SAS codes for multiple clients within the CITIKYC team.

- Mounted strategies and pioneered transformational initiatives to perform deep dive analysis on CITIKYC data, uncovering insights and providing valuable recommendations to upper-level management.
- Played an instrumental role in updating and improving standing code and processes, implementing innovative techniques to make them more operative, ultimately streamlining operations and driving productivity.

AMSIVE MARKETING | BOLINGBROOK, IL

AUG 2018 – JUN 2022

Marketing Analyst I /SAS Developer

Overview: Orchestrated daily operations encompassing data pulls, research assignments, file transfers, data processing, and data quality management, ensuring seamless workflow and optimal outcomes. Collaborated closely with website developers and account managers to optimize online marketing performance, boosting revenue, ROI, and key performance indicators (KPIs) through data-driven model scoring recommendations.

Selected Career Benchmarks:

- Spearheaded the development and execution of SAS codes for a diverse clientele, amplifying efficiency and accuracy in generating quarterly customer reports.
- Led the way in implementing logistic regression models leveraging data from multiple sources, including the National Consumer File [Epsilon Data], BCC Mail Manager, and Melissa data, resulting in a remarkable 30% increase in client flyer mailing response.
- Played a pivotal role in modernizing existing code for process automation, yielding substantial time savings of 30 hours per week in execution.

PRESS GANEY | CHICAGO, IL

NOV 2017 – AUG 2018

Business Intelligence Analyst

Overview: Empowered stakeholders with custom analysis and reports that informed key decision-making processes, leveraging expert-level skills in complex data analysis and reporting. Improved marketing strategies through the design and execution of monthly incentive performance analyses, expertly adjusting marketing incentive offers based on data-driven insights.

Selected Career Benchmarks:

- Utilized Press Ganey Hospital Survey Application data to provide detailed custom reports, expertly analyzing and consolidating request requirements to streamline decision-making and meet project deadlines.
- Pioneered innovative approaches to data analysis by formulating and applying mathematical modeling and other optimized methods, providing critical insights to management that informed key decision-making processes and policy formulation.
- Demonstrated expert-level proficiency in data management, expertly extracting data from various sources and aggregating and implementing various calculation measures to create insightful financial data analyses.

EDUCATION

Benedictine University
Masters in Public Health

Roosevelt University
Bachelor of Science, Biology

CERTIFICATIONS

Northwestern University
Data Science and Visualization Boot Camp

Wesleyan University
Data Management and Visualization

STATISTICAL METHODS UTILIZED

◆ Linear Regression ◆ Logistic Regression (Proc Logit) ◆ Descriptive Statistics (Proc Univariate) ◆ CHI Square Analysis ◆ T-table Tests ◆ Z-Table Tests ◆ WOE/IV

TECHNICAL ACUMEN

◆ Databricks ◆ SQL (MySQL, Postgres, MS SQL Server) ◆ R ◆ Python (NumPy, Pandas, Scikit-learn, Keras, Flask) ◆ SAS ◆ Git ◆ SPSS
