

Tanay Reddy Ande

Data Analyst

+1(571) 530-7521 | tanayreddy0@gmail.com | MD 21227

SUMMARY

Data Analyst with 3 years of experience in turning complex datasets into meaningful insights that drive informed decision-making. Skilled in applying Agile methodologies to collaborate with teams and deliver results efficiently. Proficient in Python, using libraries like NumPy, Pandas, Matplotlib, and Seaborn for data analysis and visualization. Experienced in creating clear and impactful dashboards and reports with tools such as Tableau, Power BI, and MS Excel. Strong background in SQL optimization and advanced data modeling, with hands-on experience managing MySQL, SQL Server, and NoSQL databases.

SKILLS

Methodologies: SDLC, Agile, Waterfall, Scrum

Programming Languages: SQL, Python, R, Java

Packages & Libraries: NumPy, Pandas, Matplotlib, Scipy, ggplot2, Seaborn, Plotly, scikit-learn, TensorFlow, PySpark

Visualization Tools: Tableau, Power BI, MS Excel

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB, Amazon Redshift

ETL & Data Integration Tools: Hadoop, SSIS, Talend, Apache NiFi, Informatica, Alteryx

CRM & Analytics Platforms: Salesforce, SAP, SAS, Google Analytics, HubSpot

EDUCATION

Masters in Management Information Systems, UMBC, Maryland, Baltimore

August 2022 – May 2024

B.com Computer Applications, University, India

July 2018 – August 2021

CERTIFICATIONS

Python (Udemy), AWS (Udemy)

EXPERIENCE

Data Analyst | United Healthcare Group | USA

January 2024 – Present

- Collaborated with cross-functional teams using Agile methodology, resulting in an increase in project efficiency and on-time delivery of data analytics solutions.
- Designed and maintained complex SQL queries for data extraction and exploratory data analysis to identify trends such as patient admission rates and retention.
- Incorporated AWS services like S3 bucket & Redshift to manage and analyze healthcare data securely, resulting in an improvement in data processing speed.
- Designed interactive dashboards using Tableau, providing actionable insights to healthcare teams, leading to a 20% increase in patient satisfaction scores.
- Developed and maintained ETL pipelines using Python and SQL to streamline EDI download and financial data analysis processes, supporting production and material planning.
- Conducted graphical analysis of healthcare datasets using Python to obtain insights into patient demographics and treatment outcomes.
- Evaluated and enhanced the current data model to meet healthcare industry standards and requirements.

Data Analyst | Hellinex Cloud | INDIA

July 2020 – August 2022

- Applied DAX functions to create interactive and insightful dashboards in Power BI, which enhanced data visualization capabilities and improved stakeholder engagement by 20%.
- Designed and maintained ETL pipelines with AWS Glue and Apache Airflow, enhancing data integration processes and achieving an increase in ETL performance.
- Experience in working with NoSQL databases and big data tools including Hadoop, Hive and Spark.
- Used SAS for advanced statistical analysis, data cleaning, and predictive modeling to identify trends and drive data-driven strategies.
- Developed SQL scripts, views, triggers, and stored procedures to update and maintain databases, for supporting operations.
- Leveraged Salesforce for data analysis, creating custom reports, dashboards, and extracting actionable insights to support business decisions.
- Utilized SSIS and Talend Open Studio for ETL tasks, delivering technical solutions to business stakeholders.
- Executed SQL queries to access and analyse data from the relational database for data modeling and reporting.
- Achieved an increase in operational efficiency and a reduction in delivery time by spearheading an end-to-end supply chain project using SQL, Spark, and GCP.
- Designed database schemas, tables, and views, and migrated financial data from multiple sources to the SQL Server database, ensuring data integrity and accessibility.
