SUMMARY

Results-driven Data Scientist with 3 years of experience in machine learning, AI, and predictive modeling. Skilled in Python, R, SQL, and cloud platforms (AWS, Azure, GCP) with expertise in NLP, Generative AI, and advanced ML algorithms like Random Forests, XGBoost, and Transformers. Proficient in Tableau and Power BI for data visualization. Adept at delivering scalable, data-driven solutions to solve complex business challenges.

SKILLS

Methodologies: SDLC, Agile, Waterfall	Artificial Intelligence & Machine Learning: Generative AI, Fine-Tuning Large Language Models, Reinforcement Learning, BERT, Transformers, Retrieval-Augmented Generation (RAG)
Language: Python, R, SQL, SAS	Visualization Tools: Tableau, Power BI,
Machine Learning Algorithms: Linear Regression, Logistic Regression, Decision Trees, Random Forests, Support Vector Machines (SVM), Naive Bayes, K-Nearest Neighbors (KNN), K-Means Clustering, Gradient Boosting, CNN, Ensemble Methods, MLFlow	Packages and Libraries: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Keras, Seaborn, PyTorch, SpaCy, NLTK
Cloud Technologies: AWS, Azure, GCP,	Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow, Ggplot2, Keras
Other Tools: Git, GitHub, MS Excel	Database: SQL Server, MySQL, PostgreSQL, MongoDB
Operating System: Windows, Linux, Mac	Data Engineering & Tools: BigQuery, Knowledge Graphs

EXPERIENCE

Hoosier Community Network, Bloomington, IN. (Remote) Data Scientist	Dec 2023 – Present
- Designed and deployed predictive models utilizing machine learning algorithms, including Linear Regression, Random Forest, Gradient Boosting (XGBoost, LightGBM), and CNN, achieving a 20% increase in customer retention rates. - Developed scalable data-driven solutions for real-time analysis and insights generation by leveraging Python and advanced libraries such as Scikit-learn, TensorFlow, and Keras. - Developed advanced NLP models leveraging BERT, Transformers, and SpaCy to extract insights from unstructured customer feedback, improving sentiment analysis accuracy by 25%. - Designed and fine-tuned large language models for Retrieval-Augmented Generation (RAG), enabling enhanced document search and retrieval functionalities for internal knowledge management. - Implemented Generative AI techniques to create personalized email content, boosting customer engagement rates by 15%. - Utilized BigQuery to handle and query multi-terabyte datasets, ensuring efficient data processing and analytics for real-time decision-making. - Optimized and maintained relational databases with PostgreSQL and SQL Server, ensuring high availability and reliable performance for critical business operations.	
Ericsson Inc., Santa Clara, CA. (On-Site) Data Scientist	May 2023 - Aug 2023
- Developed high-accuracy classification models leveraging Logistic Regression, Naive Bayes, and Support Vector Machines (SVM), achieving a 92% accuracy rate in predicting customer churn. - Implemented recommendation systems utilizing K-Nearest Neighbors (KNN) and Decision Trees, enhancing product recommendation efficiency by 25%. - Utilized MLFlow for tracking experiments and deploying scalable machine learning workflows, reducing model iteration time by 30%. - Built and managed Knowledge Graphs to link and analyze complex datasets, enhancing data discovery and relationship mapping. - Designed recommendation systems powered by Generative AI to enhance product offerings, resulting in a 25% increase in customer satisfaction scores. - Collaborated on deploying NLP models with SpaCy for text classification and sentiment analysis, enabling actionable insights from unstructured data.	
Tata Consultancy Services, Pune, India Data Analyst	Nov 2020 - Jun 2022
- Conducted in-depth data analysis using SQL, Python, and advanced Excel functions to extract, clean, and analyze large datasets, providing actionable insights to improve business performance and decision-making. - Developed and maintained interactive dashboards and reports in Tableau, transforming complex data into visually compelling and easily interpretable insights for stakeholders across departments. - Created and optimized ETL/ELT processes for data extraction, transformation, and loading, improving data pipeline efficiency and ensuring timely availability of critical business data. - Maintained and optimized relational databases such as MySQL, PostgreSQL, and SQL Server, ensuring data integrity, scalability, and high performance across analytical and operational processes. - Monitored key performance indicators (KPIs) and business metrics, delivering regular reports and presenting findings to executive leadership, leading to a 20% improvement in operational KPIs.	

PROJECT

Sentilyzer (Open Source Contribution: Hugging Face)	Jan 2023 – May 2023
- Crafted and optimized a bespoke Sentiment Analysis model for Amazon reviews, driving 45,000+ Hugging Face downloads and a thriving open-source community. - Utilized advanced NLP techniques, implementing BERT transformer models on a large dataset of 2 million reviews to achieve high accuracy in sentiment classification.	

EDUCATION

Master of Science in Computer Science:- Indiana University Bloomington (GPA: 3.94/4.0)	May 2024
Bachelor of Engineering in Computer Engineering:- University of Pune (GPA: 8.98/10)	Jun 2020
