

Tanuj Patil

Software Engineer | patiltanuj108@gmail.com | 501-291-2134 | NJ

SUMMARY

Software Engineer with 4 years of experience designing and delivering scalable, high-performance solutions. Proficient in Java, Python, JavaScript, and C++, with expertise in developing microservices using Spring Boot, Node.js, and Django. Skilled in building RESTful APIs, optimizing SQL and NoSQL databases like MySQL, MongoDB, and Cassandra, and implementing CI/CD pipelines with Jenkins and GitLab CI/CD. Adept at leveraging AWS, Docker, and Kubernetes for cloud-native deployments. Strong background in performance tuning, system reliability, and secure coding practices.

SKILLS

- **Agile Methodologies:** Scrum, Kanban
- **Programming Languages:** Java (OOP, Exception Handling, Multithreading), Python, C, C++, JavaScript
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, Express.js, React.js(HTML, CSS), Node.js, Django
- **Microservices Architecture:** Service Discovery, Circuit Breaker, Spring Cloud Config, API Gateway, Event-Driven Systems(Kafka, RabbitMQ basics)
- **API Development:** RESTful APIs (Design, Development, Documentation with Swagger/OpenAPI), Web services(REST, JSON), GraphQL(basic)
- **Database Management:** SQL (MySQL, PostgreSQL, Oracle), NoSQL (MongoDB, Cassandra)
- **Testing:** JUnit, Mockito, Selenium, Postman
- **Build Tools:** Maven, Gradle, npm
- **Containerization & Orchestration:** Docker, Kubernetes
- **CI/CD Pipelines:** Jenkins, GitLab CI/CD
- **Cloud Services:** AWS(EC2, RDS, Lambda, S3, Cloudwatch, IAM), Azure, Google Cloud
- **Monitoring & Logging:** AWS CloudWatch, Prometheus, Grafana, ELK Stack
- **Security Practices:** Secure Coding, OAuth 2.0, JWT, IAM

EDUCATION

Master of Science in Computer Science | Binghamton University, Binghamton, NY – Dec 2024

EXPERIENCE

BlackRock, NJ | May 2024 – Current | Software Engineer

- Developed scalable microservices using Spring Boot and Spring Cloud Config, implementing service discovery with Eureka to ensure seamless communication between distributed systems, improving system modularity by 30%.
- Designed and optimized RESTful APIs for portfolio management systems, leveraging Spring MVC to handle high-throughput requests, achieving a 25% reduction in API response time.
- Automated deployment workflows and CI/CD pipelines with Jenkins and GitLab, reducing release cycles by 35%.
- Implemented secure coding practices with OAuth 2.0 and JWT for authentication, ensuring robust identity and access management for client-facing applications.
- Led unit testing efforts using JUnit and Mockito, achieving 85% code coverage and reducing production bugs by 20% through rigorous integration testing.
- Orchestrated containerized applications using Docker and Kubernetes, optimizing resource allocation and enabling auto-scaling for high-traffic financial systems.
- Monitored application performance using AWS CloudWatch, setting up custom metrics to proactively identify and resolve bottlenecks, improving system uptime to 99.9%.

Neon IT Systems, India | June 2019 – July 2022 | Software Engineer

- Built dynamic web applications using React.js and Node.js with Express.js, delivering responsive user interfaces that improved user engagement by 35%.
- Designed and implemented database schemas for MySQL and MongoDB, optimizing data retrieval queries to support real-time analytics and reducing query latency by 15%.
- Streamlined CI/CD pipelines using Jenkins and GitLab CI/CD, automating build and deployment processes to reduce release cycles by 50%.
- Performed end-to-end testing with Selenium, ensuring cross-browser compatibility and reducing UI-related defects by 25% in production.
- Configured monitoring and logging with Prometheus and ELK Stack, enabling real-time insights into system performance and reducing incident resolution time by 30%.
- Implemented circuit breaker patterns in microservices using Spring Cloud, enhancing system resilience by mitigating cascading failures during peak loads.
