Pfafftown, NC • +1 336-817-1665 • tayloradamsalderman@gmail.com

MPH | Clinical Data Analyst Candidate

MPH with 7+ years of experience spanning public health operations, patient-facing healthcare (Mother/Baby Unit + NICU), and data-driven program management. Led a 200-member remote team supporting contact tracing, case investigation, and vaccine operations, and strengthened data quality and reporting processes with NCDHHS. Built scalable policies, procedures, and evaluation workflows for a nonprofit expanding across North Carolina and supported executive leadership as needed. Currently building clinical research skills and eager to support research geared towards improving our healthcare systems.

Good Clinical Practice | Novartis • 01/2026

Master Of Public Health

Walden University • Minneapolis, MN, USA • 08/2022

Bachelor Of Science

University of North Carolina at Greensboro • Greensboro, USA • 05/2019

Associate Of Arts

Community College • Winston-Salem, NC, USA • 05/2017

WORK EXPERIENCE

Outlier AI • Remote • 01/2024 – Present

Public Health Expert and Reviewer

- Train AI models to regulate the safety of AI search engine responses and provide feedback on complex projects
- Create and answer complex public health/epidemiology prompts; assess outputs using critical thinking and strong attention to detail
- Evaluate public health content generated by AI systems for factual accuracy, safety, and clarity; document feedback to improve model performance
- Create complex and thought-provoking Public Health prompts to strengthen AI's weaknesses in topics such as epidemiology, disease surveillance, and public health intervention

Entryway (formerly Shelters to Shutters) • North Carolina • 08/2022 – 01/2024

North Carolina Program Coordinator

- Designed and implemented a program that eliminates socioeconomic barriers to employment and housing for program participants who are situationally homeless or at risk of homelessness
- Developed processes and procedures for program monitoring and evaluation; maintained all program-related data collection and ensured reporting, and tracking requirements were met, and created reports to present findings
- Completed and supervised all program candidate screenings, placements, mentoring, and case management for an at-risk population via phone calls, in-person support, and video calls (Teams/Zoom)
- Recruit and cultivate relationships with industry partners, identify job openings for program participants, advocate for participants, and negotiate living arrangement agreements
- Planned three large fundraising events in 2023, raising approximately \$200,000 for Entryway NC as a new nonprofit
- Researched grant opportunities and drafted grant proposals
- Developed and managed all marketing and communications for Entryway NC, including events, newsletters, social media, and Mailchimp emails
- Utilized Salesforce to track and manage grants, volunteers, and industry partner recruitment
- Recruited, trained, and managed all interns and volunteers, and coached them to help with professional development
- Assisted the Executive Director with event planning and community outreach by taking all inbound and outbound communication, resolving issues, addressing all program inquiries, and handling business management duties

Novant Health Forsyth Medical Center • Winston Salem, NC, USA • 04/2019 – 11/2022

Audiology Associate

- Administered Auditory Brainstem Response (ABR) testing for newborns in the mother/baby unit and NICU
- Documented all data in the Electronic Medical Records System (EPIC) and NC Hearing Link database to ensure real-time reporting
- Utilized the NC Hearing Link database to track patients' initial screening, re-screening, and diagnosis
- Re-tested and scheduled follow-up appointments as needed with our audiology and pediatrics offices
- Complete referral for further diagnostic testing as quickly as possible, as needed
- Counseled family members regarding testing procedure, results, and next steps if needed
- Monitored and managed patient cases from the initial hearing screen through to final test and diagnosis

Entryway (formerly Shelters to Shutters) • North Carolina • 02/2022 – 08/2022

Graduate-Level Intern

- Liaised with local nonprofits to build partnerships for referrals to the program
- Conducted research to find grants that matched our mission
- Assisted the Executive Director with recruiting placements for the program and conducting interviews to determine program eligibility
- Developed marketing materials to educate the public on our program and raise awareness of situational homelessness
- Piloted, managed, and developed materials for social media business pages and stakeholder newsletters
- Created and managed Excel documents to track and analyze the performance of all in-progress and upcoming projects and improve efficiency

Carolina Contact Tracing Collaborative Via Accentuate Staffing • 07/2020 – 05/2022

Team Lead For Case Investigation And Vaccine Support

- Supervised, monitored, and trained a remote team of 200 clinical and non-clinical vaccine support staff and case investigators on contact tracing procedures
- Developed plans to provide health education and increase program engagement; tracked outreach metrics; monitored follow-up completion
- Developed policies and procedures, and facilitated region-wide training using Microsoft PowerPoint to ensure proper handling of confidential and sensitive information, including PHI, and extensive research-related data for NCDHHS
- Developed and implemented region-wide workflows to ensure staff understanding of company policies and compliance requirements
- Coordinated and led weekly staff and leadership meetings
- Assisted human resources in recruiting and training staff for vaccine support positions
- Collaborated with local health departments to coordinate staff schedules for vaccine support for onsite clinics and vaccine events
- Evaluated regional data for quality assurance purposes and provided staff training for improvement

Case Investigator/Data Manager

- Utilized NC Electronic Disease Surveillance System to transfer data to the COVID-19 Community Team Outreach Tool
- Managed data for confirmed COVID-19 cases for multiple counties in various databases
- Completed administrative duties to support COVID-19 research and disease prevention efforts
- Analyzed data for quality assurance purposes; provided data entry training for Case Investigators
- Conducted one-on-one meetings with direct reports (case managers) to review their performance data and improve their strategy for targeting at-risk populations in our community, and guide them to the correct services

Contact Tracer

- Acted as the first point of contact and conducted interviews with community members who came into close contact with confirmed COVID-19 cases
- Conducted community outreach for diverse populations in need of testing information and community resource referrals
- Utilized a web-based client resource management platform to manage caseload and document collected data
- Sustained working knowledge of the most recent quarantine guidelines recommended by the local health department and trained new employees
- Provided training and shadowing for new employees within the North Carolina call center

Children's Hope Alliance • Statesville, NC, USA • 05/2018 – 01/2019

Teaching Parent

- Assumed full responsibility for at-risk youth in my care in a residential setting and implemented crisis management skills when necessary
- Provided counseling to youth who were receiving trauma treatment and/or were struggling with mental illness
- Supported and suggested changes to the mental health treatment plan for each youth and provided advocacy services for clients
- Participated in Child and Family Teams (CFT) meetings for each client
- Completed all administrative duties to keep the home running smoothly, including adequate staffing
- Scheduled employees and guaranteed that all shifts were adequately staffed
