

Teja Kammineni

Java Developer

teja@mycareermail.com | (816) 780-1985 | USA | [LinkedIn](#)

Summary

Results-driven Java Developer with 4+ years of expertise in designing and implementing secure, scalable backend systems and cloud-native applications. Proven track record of delivering high-performance microservices architectures, reducing system latency by up to 40%, and improving deployment efficiency by 50%. Specialized in Spring Boot ecosystem, event-driven architectures, and modern cloud platforms with strong experience in full-stack development using React.js. Demonstrated success in financial services and e-commerce domains, consistently delivering solutions that enhance user experience while maintaining enterprise-grade security and compliance standards.

Technical Skills

- **Backend Development & Architecture:** Java 8/11/17, Spring Boot 2.x/3.x, Spring Framework, Spring Security, Spring Data JPA, Hibernate ORM, Maven, Gradle, RESTful APIs, GraphQL, Microservices Architecture, WebSocket, gRPC, Event-Driven Architecture
- **Frontend Development:** React.js 16/17/18, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap 4/5, Thymeleaf, Chart.js, D3.js, Material-UI, Responsive Web Design
- **Cloud Platforms & DevOps:** AWS (EC2, RDS, S3, Lambda, CloudWatch, ELB, VPC, IAM, CloudFormation), Azure (App Services, Azure SQL Database, Azure DevOps, Container Instances), Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, Terraform, CI/CD Pipelines
- **Database Management:** PostgreSQL, MySQL, Oracle Database, Azure SQL Database, MongoDB, Redis (Caching), Hibernate, Spring Data JPA
- **Messaging & Event-driven Systems:** Apache Kafka, RabbitMQ, ActiveMQ, WebSocket, Server-Sent Events (SSE)
- **Testing & CI/CD:** JUnit 4/5, Mockito, TestNG, Selenium WebDriver, Postman, Integration Testing, SonarQube, Code Coverage Analysis
- **Security & Authentication:** OAuth2, JWT, Spring Security, RBAC, PCI DSS Compliance, SSL/TLS
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, SVN
- **Project Management:** Jira, Trello, Asana, Azure Boards, Agile/Scrum Methodologies
- **Collaboration & Communication:** Slack, Microsoft Teams, Confluence, Zoom, Google Workspace, MS Office Suite

Professional Experience

Senior Java Developer, Synchrony Bank

01/2024 – Present | Remote, USA

- **Architected microservices ecosystem** using Spring Boot 3.x and Kafka, processing 10,000+ real-time banking transactions daily with 99.9% uptime and sub-200ms response times. **Spearheaded secure banking platform development** implementing OAuth2, JWT, and Spring Security with PCI DSS compliance, reducing security vulnerabilities by 85% and ensuring regulatory adherence.
- **Optimized RESTful API performance** achieving 50% faster response times through database query optimization and caching strategies, enhancing customer experience for 500,000+ active users.
- **Integrated payment gateway solutions** increasing transaction processing speed by 30% and reducing failed transactions by 25% through robust error handling and retry mechanisms. **Implemented event-driven architecture** using RabbitMQ and Kafka for asynchronous messaging, reducing system lag by 40% and enabling real-time banking notifications.
- **Established automated testing framework** with JUnit 5 and Mockito achieving 95% code coverage, and implemented Jenkins CI/CD pipelines reducing deployment time by 40%.
- **Collaborated cross-functionally** with product managers and UX teams in Agile sprints, delivering features 20% ahead of schedule while maintaining high code quality standards. **Developed responsive front-end interfaces** using React.js, Redux, and modern JavaScript (ES6+) for customer banking portals, improving user engagement by 45% and reducing customer support tickets by 30% through intuitive UI/UX design.
- **Deployed scalable cloud infrastructure** on AWS (EC2, RDS, CloudWatch) Linux based OS with auto-scaling capabilities, maintaining 99.9% system availability during peak transaction periods.

Java Developer, TCS

01/2021 – 07/2022 | Remote, India

- **Engineered high-performance stock portfolio management system** using Spring Boot and Java 11, processing 50,000+ daily transactions with real-time WebSocket updates improving user engagement by 35%. **Integrated multiple financial APIs** (Alpha Vantage, Yahoo Finance) implementing efficient data aggregation and caching mechanisms, reducing external API calls by 60% and data retrieval time by 25%.
- **Implemented enterprise-grade security framework** using Spring Security, OAuth2, and JWT for financial data protection, achieving 99.9% uptime and zero security incidents.
- **Optimized database performance** using MongoDB for portfolio data and Azure SQL Database for transactional integrity, implementing efficient indexing strategies that reduced query response time by 45%.
- **Developed scalable microservices architecture** with Spring Boot and Kafka for real-time stock trading, handling 100,000+ concurrent users with sub-300ms response latency.
- **Streamlined deployment processes** using Azure App Services, Docker containerization, and Jenkins CI/CD, reducing deployment time by 50% and eliminating production rollback incidents. **Enhanced system monitoring** implementing comprehensive logging and Azure monitoring solutions, proactively identifying and resolving performance bottlenecks before user impact.

Intern Java Developer, Genpact

05/2019 – 12/2020 | Remote, India

- **Developed and implemented** a full-stack e-commerce inventory management system, utilizing Spring Boot for backend services, handling product management and user authentication with secure login mechanisms, using Spring Security for RBAC.
- **Designed and optimized RESTful APIs** for efficient product CRUD operations, integrated Hibernate ORM for seamless database interactions, and implemented MySQL for reliable data storage, for high performance and scalability for handling product data.
- **Implemented real-time stock updates and sales tracking features**, utilizing Web Sockets for instantaneous updates between the front end and back end, providing users with accurate and real-time data on inventory levels and sales performance.
- **Built front end with Thymeleaf and Bootstrap**, creating responsive UI sections and improving user interaction with product lists, shopping carts, and checkout functionality. United the front end with the back end using REST APIs for dynamic data updates.
- **Applied unit and integration testing with JUnit and Mockito** to ensure the system's functionality and robustness, achieving 90% test coverage, and conducted performance testing for optimizing database queries and improving response times by 30%.

Education

Master of Science, University of Missouri Kansas City
Computer Science and Engineering

08/2022 - 12/2023 | Missouri, USA

Bachelor of Engineering, Sri Venkateswara University
Electronics and Communication

08/2017 - 07/2021 | Tirupati, India
