[tejaswinirao@gmail.com](mailto:tejaswinirao@gmail.com) | [linkedin.com/in/atejaswinirao/](https://www.linkedin.com/in/atejaswinirao/) | 862.658.1166 | Harrison, NJ

## Summary

A curiosity-driven Data Analyst (2+ YoE | MS in Data Science) leveraging data and decision sciences in Organizational and Research Analysis, Dashboard Development and Presentation, and Digital Presence Optimization. Proficient in Business Intelligence tools (Power BI, Tableau, Looker), SQL, Python, and Excel to investigate data patterns, surface actionable insights and enhance decision-making processes. Adept at bridging analytical depth with business acumen to drive impact in fast-paced teams.

## Work Experience

**JerseySTEM** | *Looker, MySQL, WordPress, Salesforce, Jira, Google Suite, Figma*

**Data Analyst** | Jun 2024 – Present, Newark, NJ

- Built interactive **Looker reports** from Salesforce data, uncovering **50+** high-potential leads for partnership expansion
- Conducted **A/B tests** and **revamped website** with WordPress widgets, supporting marketing team initiatives
- Analyzed **traffic patterns** in Google Analytics to **enhance user retention** by identifying critical drop-off points

**Program Instructor** | Jun 2024 – Present, Newark, NJ

- Designed and documented **12-week** Coding & Robotics curriculum for **100+** students, increasing STEM program enrollment
- Led **20+** interactive workshops leading to **75%** surge in student participation and **85%** satisfaction rate in post-session surveys

**New Jersey Institute of Technology** | Power BI, Tableau, Excel, Python, Machine Learning, NLP, Drupal

**Research Assistant (Office of Institutional Effectiveness)** | Dec 2023 – May 2024, Newark, NJ

- Engineered python scripts to clean and merge **15+** large datasets for **survey data analysis** minimizing preprocessing errors
- Deployed **10+ BI dashboards** to interpret survey response patterns for stakeholders, driving program effectiveness
- Automated monthly reporting cycles using **Power Query** and **pivot tables**, updating real-time website metrics using Drupal

**Research Assistant (NJIT's Intelligible Information Visualization Lab)** | Sep 2023 – May 2024, Newark, NJ

- Processed **600+ tweets** (Pandemic) to expedite **5** key public intent categories to support research on crisis management
- Applied NLP to classify **900+** raw topics into **25** distinct topic categories, improving data usability and integrity
- Designed **Tableau dashboards** to visualize sentiment polarity and topic prevalence across demographics

**Research Assistant (NJIT's Intelligible Information Visualization Lab)** | Dec 2023 – May 2024, Newark, NJ

**Project: Design Space for Course Evaluation Data**

- Analyzed **6000+** records creating a course ranking system to prioritize data-informed teaching adjustments
- Developed **Tableau dashboards**, pinpointing **12** underperforming courses and allocate targeted curriculum revisions
- Presented **research findings** to stakeholders at weekly lab meetings, influencing course design improvements

**Mu Sigma Business Solutions Pvt. Ltd** | Python, SQL, Machine Learning, Microsoft Office Suite, Slack

**Decision Scientist** | Aug 2020 – Jan 2021, Bangalore, India

- Collaborated with cross-functional teams to develop and translate insights that strengthened decision-making for stake
- Deployed **predictive models** to address churn gaps, improving **retention rate** across client customer base
- Streamlined processes using proprietary '**Mu**' **solution tools** (MuUniverse, MuPDNA, MuDSC) and establish internal standards

## Projects

**Predict Student Performance from Student Play** | Python, Deep Learning, Neural Networks

- Implemented **6** deep learning models, analyzing student performance outcomes on gameplay behavior
- Regulated **model performance optimization** focusing on **Data imbalance mitigation** for more reliable predictions

**Employee Attrition in Healthcare** | Python, Machine Learning, Classification & Regression Models

- Built a predictive model with **93% accuracy** analyzing factors affecting attrition, addressing misclassification using SMOTE
- Benchmarked **7** training models and conducted comparative analysis to synthesize the best-fit model

## Skills

**Programming Languages:** Python, SQL (MySQL, PostgreSQL, SQL Server), R | **Methodologies:** Agile/ Scrum (Jira)

**Tools & Technologies:** Power BI (DAX), Tableau, Looker, Excel (Pivot Tables, VLOOKUPS), Azure, Google BigQuery, Salesforce

**Expertise:** Data Analytics (EDA, Gap Analysis, Root-Cause, KPIs, A/B Testing, Hypothesis testing), Machine Learning (Classification, Regression, Clustering, Neural Networks, Time Series Forecasting), Data Modeling, Natural Language Processing

**Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow, Keras, NLTK, spaCy, Gensim

## Education

**M.S. Data Science - New Jersey Institute of Technology, US** | Sep 2022 - May 2024

**B.Tech Computer Science - GITAM Deemed to be University, India** | Jun 2016 - Jun 2020
