Full-Stack Developer specializing in the TypeScript ecosystem. I have experience building scalable, maintainable features for high-traffic platforms serving tens of thousands of daily users. This work has included leading projects from concept to deployment, such as the development of a full-stack staff dashboard. I am eager to contribute my skills to a collaborative team or individually, where I can help solve complex challenges and deliver high-impact solutions.

Education

William Paterson University, Wayne, NJ | Dec 2024

Bachelor of Science in Information Technology

County College of Morris, Randolph, NJ | May 2021

Associate Degree in Information Technology

Skills

Proficient: JavaScript, TypeScript, HTML, CSS, React, Solid.js, Vue.js, Tailwind, Node.js, Express.js, Nest.js, PostgreSQL

Familiar With: Python, Redis, Socket.io, Figma, Bash Script, Prisma ORM, Drizzle ORM,

Experience

RollTwo, Remote, **Full-Stack Web Developer** | Oct 2023 - Current

Main Gaming Platforms (Hunt.gg & RustyLoot)

- Engineered and deployed core full-stack features—including new game modes, user profiles, events, and multilingual support—for high-traffic gaming platforms serving tens of thousands of daily users.
- Optimized JavaScript codebase and developed real-time interactive functionalities using Socket.io with Solid.js (RustyLoot) and React (Hunt.gg) to improve performance and reliability.

Payment Processing Platform (Blacktide)

- Collaborated on a new payment gateway platform (similar to Stripe) using React, Nest.js, PostgreSQL/Prisma, designing a secure transactional API and database schemas to reliably process tens of thousands of daily transactions worth hundreds of thousands of dollars.
- Developed the business-facing client portal and internal admin dashboard, providing comprehensive data and management tools for business partners.

Staff Dashboard(s)

- Developed internal staff dashboards that centralized moderation tools and support ticket management, streamlining administrative workflows for gaming platforms.
- Enhanced operational efficiency for admins and staff, enabling faster response times and improved platform oversight.

Rutgers Data Science Consulting, Newark, NJ, **Computer Science Project Lead** | Jun 2022 - Nov 2022

- Led a project in collaboration with Johnson & Johnson Innovation to automate the generation of personalized PDF reports for business innovators.
- Led the design and implementation of a fully automated system utilizing Python, HTML, and CSS to transform complex survey data into user-friendly PDF reports, starting with Figma mockups.
- Oversaw deployment of the report generation system to a production environment, achieving seamless integration and delivery to the client base.
