

Thiviya G UI UX & Product Designer

I'm a detail-oriented designer with **over six years of experience in UX and product design** and **ten years in visual design**. I specialize in creating user-friendly designs that solve real problems, whether it's improving complex workflows, simplifying navigation, or enhancing overall usability. My focus is on helping products succeed, enhancing user experiences, and driving growth for companies.

EXPERIENCE

UI/UX Designer [Brook + Whittle](#) Washington 10.2023 - 10.2024

- Designed and maintained user interfaces and experiences (UI/UX) for various brands within the company's label solutions.
- Ensure consistent brand identity across different products and services.
- Collaborate with cross-functional teams to understand and translate brand requirements into practical designs.
- Incorporate user feedback and stay updated on industry trends for innovative design solutions.
- Develop design systems and guidelines for efficient UI/UX processes.
- Work closely with the development team to ensure seamless implementation of design elements.
- Create prototypes and wireframes to communicate design concepts.
- Conduct usability testing to validate design decisions.
- Manage multiple projects, meeting deadlines for different brands and products.

Product Designer Freelance Washington 03.2023 - 10.2023

- Create design requirements based on input from internal teams and user research.
- Improve the design of existing products.
- Transform client visions into effective digital products through research, concept development, prototyping, and design.
- Design and deliver wireframes, user flows, and visual designs that are optimized for a wide range of devices and interfaces.

UI/UX Designer [All Star Directories](#) Washington 10.2020 - 01.2023

- Created designs for responsive websites and mobile apps that help people connect with higher education institutions
- Managed the creation of concepts, wireframes, high-fidelity mockups, and prototypes.
- Collaborated with brand owners and development teams to build consistent experiences based on usability principles and human-centered design methodologies.
- Designed with a focus on user needs, built on data and research, and supported by testing and iteration.
- Helped align strategy with early research, planning, and stakeholder meetings. Facilitated strategy alignment through early research, meticulous planning, and productive stakeholder meetings.
