SAP MDG/MM Techno Functional Consultant || SAP Master Data Governance Analyst

Professional Summary

Highly accomplished **SAP MDG Techno-Functional Consultant** with 6 years of experience delivering end-to-end implementations, enhancements, and steady-state support across ECC and **S/4HANA** environments. Specializes in designing and optimizing scalable MDG solutions for healthcare and food & beverages domains, with deep expertise in mastering Business Partner (**MDG-BP**) and Material (**MDG-M**) domains. Adept at implementing robust **change governance** through multi-step CR workflows, developing complex derivations and validations in **BRF+**, and ensuring data quality via duplicate prevention and key mapping. Designs modern MDG architectures utilizing **data-model extensions, SMT mappings, and Fiori/FPM UIs**, supported by strong integration patterns leveraging **DRF, SOA, ALE, IDoc, and SAP CPI**. Skilled in **BP/CVI** harmonization, initial loads, and **mass processing**, along with performance tuning and monitoring. Ensures compliant and auditable master data aligned to industry standards such as GTIN, GDSN, allergen/nutrition, and HACCP needs through targeted user training and clear stewardship models.

Technical Skills

- **SAP MDG & ERP:** S/4HANA, ECC, MDG-BP, MDG-M, Supplier, Customer, CVI, Consolidation, Mass Processing
- **Business Rules & Workflow:** BRF+, Workflows, SLAs, CR Enhancements, Process Modelling
- **UI/UX:** Fiori, Floorplan Manager (FPM), Web Dynpro ABAP, UIBBs, Feeder Classes, UI Modelling
- **Integration & Interfaces:** DRF, SOA, ALE/IDoc, OData services, REST API, RFC, BAPI, SAP Gateway, CPI, PI/PO, SAP Data Services (BODS)
- **Data Management:** Data Modelling, Data Model Extension, SMT Mappings, ABAP OO, BAdIs, Enhancements, CDS Views, HANA SQLScript, fuzzy, Enterprise Search
- **Operations & Compliance:** AIF Monitoring, DRF, Job Scheduling, Audit, GxP Compliance
- **Tools & Platforms:** HP ALM, SOMAN, Postman, Ready API, Jira, ServiceNow, Excel, SharePoint, Confluence

Professional Experience

ADM, Chicago, IL - SAP MDG/MM TECHNO FUNCTIONAL CONSULTANT
DEC 2023 – PRESENT

- Spearheaded the design, configuration, and implementation of SAP MDG solutions specifically for **Business Partner** (Customer, Vendor, Supplier) and **Material** master data models, critical for ADM's global procurement, supply chain, production, and sales operations.
- Collaborated extensively with ADM's business stakeholders across various functions (e.g., Supply Chain, Finance, Procurement, Sales, R&D) to gather and analyze complex master data requirements. Translating them into detailed functional specifications and technical designs.
- Developed and optimized complex **BRFplus** decision tables, functions, and expressions to implement critical business rules for both Business Partner and Material domains. This included derivation, data validation and workflow routing based on specific product lines.

- Implemented and utilized **Mass Processing** capabilities within MDG to efficiently update, validate, or enrich large volumes of Business Partner and Material master data, ensuring data integrity.
- Oversaw **Data Migration** activities for Business Partner and Material master data, from legacy systems into SAP MDG and S/4HANA including data extraction, cleansing, transformation, and loading, ensuring data quality and consistency crucial for ADM's operations.
- Led real-time troubleshooting for **BRF+ rule failures, workflow routing issues, and data synchronization errors**, ensuring timely resolution before global rollout milestones.
- Ensured that all **MDG configurations** and processes for Business Partner and Material master data comply with the industry regulations, GxP guidelines, and internal audit requirements.
- Validated and tested API endpoints using **Postman, Ready API** ensuring consistent response formats and robust error handling for live system integration.
- Proactively monitored AIF logs, DRF replication queues, and workflow backlogs, performing **ABAP debugging** to trace and resolve complex data inconsistencies.
- Created and maintained comprehensive test cases, test results, and defect logs using **HP ALM** for end-to-end traceability across releases in a regulated environment.
- Authored detailed **FS documentation** and technical design documents for all MDG configurations and enhancements pertaining to Business Partner and Material master data processes.

BOEHRINGER INGELHEIM, India - SAP MDG TECHNICAL CONSULTANT

NOV 2020 – JUL 2023

- Collaborated closely with onshore and offshore teams to gather requirements and implemented MDG solutions considering specific data quality and audit trail requirements.
- Successfully delivered one full-cycle SAP MDG implementation project (design, development, testing, data migration, go-live, and post-deployment support) for Business Partner, Supplier, and Customer domains.
- Provided critical onsite support at **Boehringer Ingelheim's headquarters (Germany)** during a key deployment phase, stabilizing MDG replication, resolving high-priority defects, and ensuring production readiness.
- Operated within an **Agile** delivery model, actively participating in sprint planning, daily standups, and backlog refinement sessions, fostering collaboration across cross-functional teams.
- Spearheaded **UI Modelling**, Designed and configured **FPM (Floorplan Manager)** components, **web dynpro ABAP** and **UIBBs (User Interface Building Blocks)**.
- Worked on **Data Modelling**, added **custom entities** and relationships in the **MDG custom data model** to capture additional business attributes required for regulatory, finance, and supply-chain integration.
- Configured and optimized the **workflow process** in MDG using Rule-Based Workflows (RBW) and ABAP-based workflows, ensuring efficient routing, approvals and managing the change requests through different CR types.
- Designed and implemented **ABAP enhancements** utilizing **BAdIs** to tailor MDG functionalities, including custom validations, derivations, and integrations, meeting business needs.
- Enhanced **UI** to display third-party provider data (address validation, tax number verification, duplicate checking) fetched in real time through **REST API integrations** via **SAP Gateway service**.
- Developed service logic to consume external **Inbound APIs**, dynamically populating UI fields in MDG applications based on user input and country-specific business logic.

- Performed **ABAP debugging and BAdI analysis** to identify root causes in replication, derivation, and UI enhancement defects, ensuring stable post-go-live operations.
- Contributed to system performance optimization efforts for MDG applications, potentially leveraging **HANA database** capabilities and **CDS views** for reporting and analytics on master data.
- Implemented robust **data replication logic** for **outbound** master data distribution from MDG to S/4HANA and other systems using **IDocs** and **RFCs**, ensuring data consistency across BI's landscape.
- Managed **Data Migration** activities, leveraging MDG capabilities and custom programs to ensure accurate and complete transfer of master data during project cutovers and system consolidation.
- Conducted rigorous unit testing and peer code reviews for **ABAP enhancements** and MDG components to ensure high quality, performance adherence, and alignment with BI's technical standards.
- Authored detailed **technical documents (SRS)**, functional specifications, and test evidence to support internal audits and validation signoffs, crucial for a GxP compliant environment.
- Proactively implemented relevant **OSS notes** to address known issues and enhance MDG system stability and functionality.
- Contributed to **knowledge transfer sessions** for global and offshore MDG teams, standardizing best practices for Boehringer's ongoing data governance evolution.

BAYER, Bangalore, India - SAP MDG/ABAP ASSOCIATE CONSULTANT DEC 2019 – OCT 2020

- Built **ABAP reports** to filter and extract **Business Partner (BP), Vendor (SUP), Customer (C)** data using selection screens (partner role, region, status, dates), ALV output, and download to Excel.
- Maintained and optimized **Key Mapping and Value Mapping** across ERP systems to ensure consistent master data replication, standardize code lists (e.g., country, titles, partner functions), and prevent duplicates and change request errors.
- Set up **Mass Processing** in MDG for BP, Supplier, Customer changes (address updates, contact info, roles), including selection criteria, simulation runs, and audit logs.
- Configured **SMT mappings** to transform and route BP fields from staging to active area; added simple derivations for defaults (e.g., country, account group).
- Extended **MDG custom data models (BP)** by adding custom attributes and value helps, adjusted UI visibility via FPM field controls for user-friendly screens.
- Built **BRF+** rules for auto defaulting, to enforce mandatory fields and data integrity for MDG objects, with context-based messages and severity levels to block activation when critical errors occur.
- Configured **Financial master data objects** (GL Account, Cost Center, Profit Center) and maintained associated hierarchies for reporting alignment with corporate finance structures.

Certifications

- **C_MDG_1909** - SAP Certified Application Associate—Master Data Governance
- **Generative AI at SAP** (2023 Edition)

Education

- **Master's in computer science, IUPUI, Indiana** – Graduated in MAY 2025
