

UTHRA SAHANA KRISHNAN

Data Analyst • Alpharetta, Georgia • 847-848-3238 • sahanasriya47@gmail.com • [LinkedIn](#)

Healthcare Data Analyst with nearly 3 years of experience delivering operational insights through reporting, time-series analysis, and data-driven decision-making. Proficient in SQL for querying complex relational databases and Python for data extraction, ETL, and statistical analysis. Experienced in building dashboards using Tableau and handling sensitive healthcare data with accuracy and confidentiality. Strong collaborator with a foundation in applying analytical methods in clinical and business contexts.

SKILLS

- **Programming:** Python (pandas, NumPy), SQL (PostgreSQL), GitHub
- **Data Analysis & Reporting:** Excel (VLOOKUP, IF statements, Pivot Tables), KPI Tracking, Stakeholder Reporting
- **Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Plotly
- **Data Handling:** Time-Series Analysis, Data Cleaning, Feature Engineering, Workflow Automation
- **Tools:** MS Excel, Jupyter Notebook, Jira, GitHub, MS PowerPoint
- **Business Skills:** Trend Identification, Operational Insights, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Numpy Ninja Data Analyst

03/2024 – Present

- Led a team of 5 analysts to develop AI-powered machine learning models for early detection of sepsis and kidney dysfunction, achieving 86% accuracy up to 6 hours in advance.
- Engineered features and processed large-scale clinical time-series data using Python and PostgreSQL; optimized XGBoost models with Bayesian tuning, improving performance by 70%.
- Automated repeatable analyses and built reusable ETL/ELT pipelines to streamline reporting and model deployment workflows, reducing manual effort by 40%.
- Extracted and analyzed sensitive healthcare data using SQL and Python, applying statistical methods to uncover trends that supported early risk stratification.
- Designed interactive Tableau dashboards to visualize ICU trends, patient deterioration, and KPIs-enhancing clinician decision-making and reducing response time by 30%.
- Mentored junior analysts and fostered a collaborative, data-driven culture through coaching, documentation, and best practice sharing.
- Leveraged JIRA and Git for agile sprint planning, task tracking, and version control across cross-functional clinical analytics projects.

Cognizant Technology Solutions Healthcare Analyst

08/2012– 02/2014

- Automated HIPAA-compliant insurance claims reporting using **SQL** and **Excel**, cutting manual effort by 50%.
- Worked with TriZetto HIPAA Gateway to resolve EDI issues and supported onboarding with Cigna IT.
- Created scheduled SQL automation scripts to improve accuracy and delivery of analytics reports.
- Supported SLA-driven ticket resolution and collaborated across global teams for healthcare data management.

EDUCATION

Bachelor of Technology - Information Technology | Anna University | Chennai, India | 2008 - 2012

CERTIFICATIONS

Python Hackathon – 1st Runner-Up | Numpy Ninja (Aug 2024)
