

Vamshidhar Reddy Anumandla

Full Stack Developer

vamshidhar.a@myjobmails.com | (401) 285-7371 | NJ | [LinkedIn](#)

SUMMARY

- 4+ years of full-stack development working experience in all stages of the life cycle, referring to Design, Development, Implementation, and testing of web-based applications.
- Proficient in using various SDLC methodologies including Agile and Waterfall, ensuring efficient project execution and delivery.
- Well-versed in developing applications using React.js, Node.js, and Express.js, leveraging their capabilities for interactive and responsive user interfaces.
- Good command of web technologies including HTML, CSS, JavaScript, jQuery, and Ajax to create dynamic and visually appealing web applications.
- Good working knowledge of Relational databases like SQL and MySQL and Non-Relational database MongoDB.
- Working Knowledge of Server-Side development by using Node.js, and Apache Tomcat.

EDUCATION

Master of Science in Computer Science

Rowan University, Glassboro, NJ

Bachelor of Technology in Information Technology

Jawaharlal Nehru Technological University Hyderabad

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages: Python, SQL, Java

Frameworks: React.JS, Node.JS, Express.JS, Spring MVC, Spring Boot, Flask, MyBatis

Technologies: HTML, CSS, JavaScript, jQuery, JSON, XML, Ajax, Bootstrap, React.JS

Software and Tools: IntelliJ, Eclipse, PyCharm, Jupyter Notebook, Visual Studio Code, Data Bricks, Snowflake, Spyder, WebStorm, Postman

Databases: MongoDB, MySQL, PostgreSQL

Web Server: Apache Tomcat, Redis

Version Control & Other Tools: Git, GitHub, Jira, Kafka, AWS, Jenkins, Apigee, Splunk

Operating Systems: Windows, Linux

EXPERIENCE

BlackRock, NJ | Jan 2023 – Current

Full Stack Developer

- Knowledge of the Software Development Life Cycle (SDLC), Agile, and Waterfall Methodologies.
- Develop interactive and dynamic user interfaces using **React.js**, ensuring efficient rendering of components and optimal user experience.
- Utilize **Node.js** for server-side **JavaScript** development, enabling seamless communication between **front-end** and **back-end**.
- Build **RESTful APIs** and services using **Express.js**, facilitating data exchange and interaction with **databases**.
- Configure **MyBatis** properly, including setting up data source connections, transaction management, and other settings in the **MyBatis** configuration file.
- Implement authentication and authorization using **Spring Security**, protecting endpoints and securing data.
- Develop and maintain responsive and visually appealing web pages using **HTML5**, **CSS3**, and **JavaScript**.
- Implement Asynchronous **JavaScript** and **XML (Ajax)** techniques to enable seamless data retrieval and updates without page refreshes.
- Collaborate with the back-end team to integrate **MySQL** databases for data storage and retrieval.
- Set up deployment pipelines that automatically deploy applications to various environments (**development**, staging, production) using **Jenkins**.

- Configure **API** proxies and routes in Apigee to manage **API** traffic, security, and routing.
- Setting up EC2 instances, managing security groups, and configuring load balancers.
- Configure and deploy web applications on **Apache Tomcat**, ensuring smooth deployment and proper functioning of the front-end components.
- Integrated applications, systems, and infrastructure with Splunk to collect and index logs and events.
- Use **Jira** to track issues, and participate in cross-functional collaboration, contributing to effective project planning and execution.

Kalp Technolab, India | April 2019 - Nov 2021

Full Stack Developer

- Implemented state management using **React's state and props**, utilizing hooks and context API for effective data handling.
- Designed and implemented web applications using the **Spring MVC** framework.
- Created RESTful **APIs** using Flask to expose application functionality to external clients.
- Developed and deployed serverless applications using **AWS Lambda** and other serverless services.
- Worked with **Node.js** to build the server and write middleware to handle HTTP requests.
- Optimized **SQL** queries for performance, making use of **MyBatis** features like caching, lazy loading, and batch processing.
- Set up and configured **Kafka** clusters for real-time data streaming and processing.
- Employed the **jQuery library** to enhance user interactions, perform dynamic DOM manipulation, and create animated effects.
- Integrated **React.js** front-end components with **Node.js** and **Express.js** back-end, ensuring a seamless and cohesive end-to-end application.
- Ensured data persistence and high availability for Redis instances.
- Configured and maintained **Jenkins pipelines** for automating build processes, including compiling code, running tests, and packaging artifacts.
- Configured and maintained **CI/CD pipelines** in **Jenkins** for automated building, testing, and deployment of applications.
- Utilized **Bootstrap** components like button groups, dropdowns, wells, and pagination to build a responsive layout.
- Operated with back-end developers to integrate **MongoDB** databases for storing and retrieving dynamic data.

Macro Software Solutions, India | April 2018 - March 2019

Full Stack Developer

- Involved in **SDLC** Requirements gathering, **Analysis**, Development, and Testing production of the application using the **Waterfall model**.
- Organized static assets within the Flask application's directory structure.
- Managed state and handling UI components efficiently using **React concepts**.
- Implement security measures to prevent **SQL** injection and other security vulnerabilities in the **SQL** queries used with **MyBatis**.
- Designed and implemented RESTful APIs using Spring **Web MVC** or Spring **WebFlux**.
- Built server-side applications and **APIs** using **Node.js** and **Express.js**.
- Monitored **API** usage, performance, and behavior using **Apigee analytics**, and optimized **APIs** based on the insights gained.
- Created efficient and scalable applications using **Spring Boot's** microservices architecture.
- Designed responsive and visually appealing user interfaces using **Bootstrap's** CSS framework.
- Worked on master data management tools like Informatica and implemented **HTTP**, **Java**, and **SQL** transformations.
- Utilized **AWS** services like S3 for storage, **RDS** for databases, and **Lambda** for serverless functions.
- Developed and integrated **Kafka** producers and consumers for event-driven architecture.
- Wrote **SQL** queries to manage and retrieve data from **MySQL** databases.
- Defined and managed stages, jobs, and triggers within **Jenkins pipelines** to ensure a smooth workflow.

CERTIFICATION

Member of Upsilon Pi Epsilon (UPE) Honor Society Committee.

Certified by Redis on RU101: Introduction to Redis Data Structures.

Certified by Redis on RU202: Redis Streams.
