

VARSHA CHANDRAHASAREDDY MULANGI

Location: USA | Phone: +1(469)248-7906 | Email: varshamulangi21@gmail.com | LinkedIn | Portfolio

Professional Summary

Software Engineer with **3+ years of experience** building **scalable backend** and **full-stack** systems across healthcare, enterprise, logistics, and academic environments. Strong background in **microservices**, **cloud-native architectures**, and **API** platforms with measurable impact on **performance**, **reliability**, and **developer** productivity. Experienced working in regulated and high-scale **production** systems.

Experience

Molina Healthcare - Software Engineer | USA

September 2025 – Present

- Implemented **HIPAA-compliant microservices** using **Python (FastAPI)** and **Java (Spring Boot)**, processing **22K+ daily healthcare transactions** with **full audit trails** for claims systems.
- Architected analytics pipelines using **AWS Lambda**, **EKS**, and **Docker**, integrating **FHIR/HL7 APIs** to process **100K+ healthcare events/day**, improving real-time data availability and reducing manual reconciliation efforts by **35%**.
- Configured **Jenkins** and **GitHub Actions CI/CD pipelines** with **Prometheus monitoring**, improving healthcare **deployment reliability and system observability**.
- Integrated **JWT/OAuth 2.0 authentication** across FastAPI and Spring Boot services, securing **scalable access** to patient and claims data.
- Refactored **PostgreSQL queries** and **indexes** for healthcare payer networks, reducing **reconciliation latency by 40%** under **production** loads.
- Engineered **GraphQL** schema layered over **REST** endpoints, decreasing data retrieval time by **25%** for clinical applications and streamlining **FHIR integrations** for 10+ clinical frontend applications.

Oregon State University - Software Developer | USA

April 2024 – June 2025

- Coded **Java** and **Node.js** simulators handling **100–500 concurrent users** for **HCI prototype testing**, contributing to **academic platform funding approval**.
- Pipelined **10K+ weekly LMS logs** through **Apache Kafka streams**, achieving **sub-second analytics latency** for real-time engagement insights.
- Tuned **Next.js dashboards** using **SSR/SSG techniques** and profiling tools, cutting page load times across academic research platforms.
- Containerized legacy academic tools using **Docker** and **AWS EKS**, reducing deployment cycles from **2–3 days to under 3 hours** and enabling faster experimentation and release iterations.
- Migrated multiple legacy academic applications to **Docker-based Kubernetes clusters on AWS**, cutting deployment time by **80%+** and improving environment consistency across research teams.

Accenture - Associate Software Engineer | India

October 2021 – August 2023

- Built **Django**, **Spring Boot**, and **React** platforms scaling to **600K+ daily transactions**, maintaining **99.9% uptime** across **finance** domains.
- Designed and published **REST** and **GraphQL APIs** to support payment processing and workflow orchestration, ensuring smooth integration with **enterprise transaction platforms**.
- Linked **C#** and **Python service stacks** via **REST protocols**, synchronizing financial analytics with customer management databases.
- Provisioned **Docker containers**, **Terraform IaC**, and **AKS clusters** for **pipelines**, **minimizing CI/CD** incident recovery times.
- Served **AWS Lambda-backed APIs** behind **API Gateway** and **CloudFront CDN**, reducing global request latency to under 1s.
- Authored **JUnit-based API validation tests** and comprehensive **Swagger/OpenAPI documentation**, accelerating sprint reviews and reducing downstream integration effort.

TATA Group - Software Developer | India

July 2020 – August 2021

- Developed a **full-stack solution** using **Angular**, **Flask APIs**, and **PostgreSQL dashboards**, enabling real-time visibility into **logistics operations** and **payment flows**.
- Automated **shipment tracking** via **Python schedulers** and **backend workflows**, eliminating all **manual data handling** processes.
- Cached API responses with **Redis** alongside **query tuning** techniques, dropping latency from **2.1s to 800ms** under load.
- Orchestrated **AWS ECS deployments** using **CloudFormation templates**, achieving **99.9% uptime** for distributed logistics systems.

Technical Skills

- Programming Languages:** Java, C#, Python, JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend Frameworks & Libraries:** React.js, Angular, Redux, Next.js, Bootstrap, GraphQL
- Backend Frameworks & Libraries:** Node.js, Express.js, Spring Boot, Django, ASP.NET Core Web API, Apache Kafka, JUnit, RESTful APIs, SOAP, Postman, Swagger UI
- Database & Cloud Storage:** MySQL, PostgreSQL, MongoDB, Oracle, Redis, Firebase, Azure SQL Database, AWS RDS
- Cloud & DevOps:** AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, CI/CD Pipelines, Terraform
- Version Control:** Git, GitHub, Bitbucket, Azure DevOps
- Additional:** Agile/Scrum methodologies, WebSockets, JWT/OAuth 2.0, unit testing, and performance optimization

Education

Oregon State University, Corvallis, OR | Master of Science (MS) in Computer Science | August 2023 – May 2025
