Education

University of Memphis

Aug 2023 - May 2025

Master of Science in Computer Science (GPA: 3.30 / 4.00)

Memphis, Tennessee

- **Relevant Coursework:** Advanced Data Structures and Algorithms (Java), Database Management Systems, Distributed Operating Systems, Software Engineering, Computer Networks, Digital Forensics

Technical Skills

Languages: Java, JavaScript, HTML5, CSS3, SQL, Bash, Python

Cloud & Technologies: AWS, Spring, Spring Boot, Servlets, React.js, Angular, MySQL

Platform and Tools: Docker, Kubernetes, Postman, Git, Ansible, Jenkins, SonarQube

Security: Application Security, Secure Code Review, OWASP Top 10

Certifications: Certified AppSec Practitioner (CAP)

Experience

Development Bank of Singapore Tech India

November 2022 – July 2023

Software Engineer II

Hyderabad, India

- Contributed to the development of **Spring Boot** services for Taiwan credit-card and loan systems-optimized for under 200 ms response times under high traffic.
- Contributed to DBS's largest cross-border initiative, Citi Taiwan consumer banking migration (Project Damsselfly), by building **Spring Batch** pipelines and participating in high-volume data migration and validation.
- Implemented **Kafka**-driven bulk SMS notification pipelines, scaling throughput by 40% and improving delivery consistency across Taiwan operations.
- Optimized database performance on **MySQL**, reducing average query execution time by 10% and enhancing overall application performance.
- Partnered with SRE teams to integrate monitoring and alerting (**AppDynamics**), improving issue detection SLAs by 35% and reducing mean time to resolution.
- Optimized **Jenkins** + **SonarQube** pipelines, reducing **CI/CD** failures by 15% and accelerating deployment cycles across multiple regional teams.
- Led a team of 2 junior developers in a fast-paced **Agile** environment, achieving 98% on-time sprint deliveries.

Development Bank of Singapore Tech India

October 2021 – November 2022

Software Engineer I

Hyderabad, India

- Rebuilt 20+ legacy **TIBCO** services as high-throughput **Spring Boot microservices** for Indonesia credit-card operations, cutting average latency by 25% and improving reliability across millions of mobile-banking users.
- Delivered core credit-card services consumed by DigiBank Indonesia, contributing to a region-wide **API** modernization effort.
- Designed backend flows for India credit-card onboarding, e-KYC, and profile management (Project Orion), supporting the launch of DBS India's first credit-card product with Bajaj Finserv.
- Developed an **Angular**-based telesales portal for loan operations, automating manual workflows and reducing processing effort by 20%.
- Increased code coverage from 40% to 80% by authoring 300+ unit and integration tests, reducing UAT defects by 25% and improving release predictability.

Projects and Security Research

Stocks Trading Application | *HTML5, CSS3, JavaScript, React.js, Spring Boot, MySQL, AWS*

- Developed a full-stack stock-trading web application on AWS EC2 with Spring Boot and React.js, enabling seamless user transactions. Integrated S3 for reliable storage of transactional data and Spring Security for authentication.

Application Security Research

- Awarded \$8,250+ by Facebook Bug Bounty Program for critical vulnerabilities (2016-2017). Served on Synack Red Team (2019-2021) and invited by Wishpond's CTO for paid security assessments. Recognized by Google and multiple platforms for ongoing contributions to security research.
