EDUCATION

School: New Jersey Institute of Technology

2022 - 2024

Degree: Master of Science in Computer Science

Courses: Data Structures and Algorithms, Data Management, Data Mining, Machine Learning, Cloud Computing, Artificial Intelligence, Computer Architecture, Systems Programming, Software Methodology

School: Rutgers University - School of Arts and Sciences, New Brunswick

2019 - 2022

Degree: Bachelor of Science in Computer Science

WORK EXPERIENCE

Data Engineer Intern

April 2025 - July 2025

OpenQQuantify

- Designed and implemented an ETL pipeline using Azure Data Factory for data ingestion which is stored in Azure Data lake and Azure Databricks with Apache Spark for data transformation. Served the data using Azure Synapse Analytics. Connected with PowerBI for analysis.

Quantitative Researcher Intern

June 2024 - August 2024

VanEck

- Analyzed Large datasets using R and SQL with ETL best practices, extracting key insights for investment decision-making. Utilized Python libraries pandas, NumPy, and scikit-learn for data analysis.
- Created Audit Trails for investment data using Temporal Tables in Microsoft SQL Server, a Relational Database Management System (RDBMS), achieving 33% faster problem-solving
- Collaborated with portfolio managers to implement a Data visualization feature from JSON files using regex and R Shiny, resulting in a 92% reduction in support time.
- Presented tool development and research findings to senior stakeholders and management, facilitating data-driven investment decisions.

Full Stack Developer Intern

August 2023 - June 2024

Up Cancer

- Worked with the development team to troubleshoot and debug applications, resulting in a 23% reduction in production issues and improved overall code quality.
- Monitored system health, debugged performance issues, worked on web design utilizing Figma, and optimized applications using server-side and client-side techniques.
- Developed and optimized database schemas using SQL on the back end and integrated a RESTful API, resulting in improved database performance and an 11% reduction in query response time.
- Technologies: MySQL, JavaScript, React.js, Express, Node.js, MongoDB, HTML, CSS

PROJECTS

Hospital Database [Project Repository \(Github\)](#)

- Created a JavaFX User Interface (UI) that connects to a MySQL database that a hospital would use to track their patients and staff members.

Price Prediction

- Designed a PowerBI, Tableau, and AWS Quicksight Dashboard for analysis of insights into prices.
- Utilized a dataset from Kaggle to build a price prediction model using Jupyter Notebook with different regression methods, showing the accuracy of each learning model.

ETL Data Pipeline

- Configured Data Build Tool (DBT) to connect with Google BigQuery (GCP), Snowflake and a GitHub repository. Run SQL scripts in dbt. Orchestrate the dbt project using Apache Airflow.

CERTIFICATIONS

Amazon Web Services (AWS) - Certified Cloud Practitioner ([link](#))

03/2025

SKILLS

Languages: Python, R, SQL, Java, JavaScript, HTML, CSS

Technologies: MySQL, PostgreSQL, MS SQL Server, React, AWS, XAMPP, phpMyAdmin, Microsoft Excel
