EDUCATION

kennesaw state university

Master of Science in Computer Science

Marietta, GA

jan 2023 - May 2024

Relevant Coursework: Computer networks, Advanced algorithms, Machine learning, Artificial Intelligence, Database Systems,

MS Ramaiah university of applied sciences

Bachelor of Technology in Computer Science & Engineering

bengaluru, India

Aug 2018 - May 2022

Relevant coursework: Computer networks, Operating systems, database systems, Machine learning

SKILLS

Languages: C/C++, Java, Python, PHP/PL/SQL, HTML5, CSS3, JavaScript, R

Database: SQL, MySQL, MongoDB

Version Control: SVN, Git, Bitbucket

Mobile Development: Android

Data/Analytics: Tableau, python(sklearn, NumPy, SciPy, pandas, Jupyter), Classification, Regression, Clustering

WORK EXPERIENCE & INTERNSHIP

CR technologies

Data Analyst Intern

Houston, TX

Jan 2024 - Present

- Generated dashboards, reports and conducted ad-hoc analysis with high attention to detail and fast turn-around deadlines.
- Evaluated reports statistics and monitored business KPI's to recommend the areas of improvement in the system.
- Extensively analyzed large data-sets to turn it into actionable insights and effectively communicated the metrics to key decision makers.
- Communicated outcomes effectively to a wide variety of audiences and determined best audience for data-driven insights.
- Supported ad-hoc business scenarios, by developing complex SQL queries and data visualization reports in Tableau

HCL

SDE Intern

Hyderabad, India

May 2021 - Dec 2022

- Perform data analysis manipulation to find trending investment locations, funding types, rising Confidential hubs and market categories.
- Enhance visualizations and analyze integrated data with exploratory data visualization techniques using sorting, grouping, filtering, calculated measures like ratios, small and using ratios - meanmedian-dot p
- Locate market clusters for Confidential by using functionality with R.
- Contributed to all phases of the software development life cycle.
- Create data visualizations using Tableau to provide key insights.

PROJECTS

• Feature Extraction using Classification for Sensor-less Drive Diagnosis:

- Utilized Python libraries NumPy and matplotlib and predicting possible failures in train functionalities.
- Implemented the models and understanding the performance based on the ROC Curve and F-1 Score.
- Identifying the features which are important and which can affect the failure (Feature Extraction).
- Extracting the records corresponding the top features affecting the final failure cases.
- Performing analysis of the extracted data to have a model which can outperform the previous model.

• Embedded SQL in C++:

- Extraction of data from files(CSV/BND/RTC) as per the requirement and transformed the data by writing script code in C++.
- Wrote utility programs to populate SQL tables in C++.
- Developed C++ application to access and manipulate data in the database MySQL in a UNIX environment.

• Concurrency and Animation(GUI based application):

- Organized JPanel to display the results of various sorting algorithms both ascending and descending order based on user preference.
- Worked on threads to start, pause and stop sorting. Implemented sorting speed by changing the speed time.

• Frequent flyer miles:

Developed a JAVA GUI application to book flight tickets where a travel agent could present options for travel destinations to a client who wants to redeem his or her accumulated frequent flyer miles.

ADDITIONAL EXPERIENCE & ACHIEVEMENTS

- Senior-Mentor for **Mozilla Hive Maker Party**. Organized and conducted workshops on Python & Java for numerous college students.
- Participated in various sports fest tournaments representing the university, enhancing the team work, strategic thinking, and competitive spirit skills .
