👤 Profile

Flutter Developer with experience in building scalable, high-performance cross-platform applications for iOS and Android using Flutter and Dart. Proficient in integrating RESTful APIs, backend communications, and state management frameworks such as Bloc and Provider. Experienced in working with Agile methodologies, CI/CD pipelines, and cloud technologies like AWS and Firebase. Strong problem-solving skills with expertise in debugging, optimizing app performance, and collaborating with cross-functional teams to deliver seamless mobile applications.

🎓 Education

Masters in information technology, Lawrence Technological University 05/2023 – 12/2024

B.E in Mechanical Engineering, RMK College of Engg and Technology 2016 – 2020

🧠 Skills

- Programming: Python, Dart, Kotlin
- Database's: Sqflite, Firebase Firestore(No SQL Database), Sqlite, Room
- Integrated Development Environments (IDE): Android Studio, Android SDK, Visual Studio Code
- Project Management: Agile, Scrum, Jira
- Version Controls: Google Cloud Platform, Git
- State Management: Bloc, Provider, Riverpod

👛 Professional Experience

Flutter Developer, Infosys Pvt Ltd

- Designed and developed Flutter applications with robust UI components and efficient state management (Bloc, Provider).
- Integrated REST APIs to enable real-time data synchronization and enhance backend communications.
- Led CI/CD implementation using GitHub Actions to automate testing and deployments.
- Participated in Agile processes, including sprint planning, task estimation, and daily stand-ups.
- Debugged and optimized applications for performance, scalability, and smooth user experience across Android and iOS.
- Worked collaboratively with backend teams to ensure seamless API integration and data flow.

📁 Projects

BHP e-assessment

- Designed and developed Flutter applications with robust UI components and efficient state management (Bloc, Provider).
- Integrated REST APIs to enable real-time data synchronization and enhance backend communications.
- Led CI/CD implementation using GitHub Actions to automate testing and deployments.
- Participated in Agile processes, including sprint planning, task estimation, and daily stand-ups.
- Debugged and optimized applications for performance, scalability, and smooth user experience across Android and iOS.
- Worked collaboratively with backend teams to ensure seamless API integration and data flow.

MT Ecosystem for Schlumberger

- Developed critical application features to streamline work order creation and real-time tracking of repair progress.
- Integrated dynamic REST API functionality, allowing seamless data retrieval and synchronization.
- Worked in an Agile environment, contributing to task estimation, sprint planning, and retrospective meetings.
- Implemented CI/CD pipelines, automating build, test, and deployment cycles.
- Ensured scalability and maintainability by following Clean Architecture principles in development.

📜 Certificates

- Udemy - Flutter & Dart Certification Course
- Coursera - Introduction to Front-End Development 📄
