

VINEETH REDDY SINGIREDDY

Boston, MA | (267)-718-4318 | singireddy.v@northeastern.edu | [LinkedIn](#) | [GitHub](#)

EDUCATION

Northeastern University, Boston, MA

Expected May 2025

Master of Science, Information Systems

GPA: 3.9/4.0

Relevant Courses: Application Development, Web Design and User Experience, Network Structures and Cloud Computing, Database Management and Database Design, Program Structure and Algorithms, Data Science Methods

Manipal Institute of Technology, India

Aug 2018 - May 2022

Bachelor of Technology in Computer Science & Engineering

Relevant Courses: Programming in C, OOP through C++, Operating Systems, Computer Organization, Data Communication, Data Structures and Algorithms, Data Mining and Data Warehousing, Python, Cloud Computing, Computer Networks, JAVA, Web Technologies, Cryptography and Network Security, Software Engineering, DBMS

WORK EXPERIENCE

ORACLE, India

Jan 2022 - Aug 2023

Software Engineer

- Collaborated on the development of a robust **Electronic Health Records (EHR)** system using JavaScript, React, and Express, creating an intuitive and responsive front-end for seamless user interactions
- Implemented an **automation** system with Java, Spring Boot, REST APIs, and Cypress to streamline EHR verification, reducing manual effort by 15%
- Delivered electronic health record solutions for 10+ clients while ensuring compliance with **HL7** and **HIPAA** standards related to opioid-related adverse effects and cesarean births
- Transitioned components from **DC/OS** container platform to **Kubernetes**, leveraging **Helm** charts and **CI/CD** pipelines to streamline deployments and increase reliability
- Developed and executed unit tests for application components, utilizing **Maven** for build automation and **Jenkins** for continuous integration to ensure code quality and reliability
- Conducted comprehensive onboarding guidance for both onsite and offshore teams, delivering **knowledge transfer** trainings to enhance team capabilities
- Collaborated with **cross-functional teams** in **Agile** environments to design, develop, and deliver new features, fostering innovation and continuous improvement
- Designed an **auditing** tool using **Java** and **Spring Boot** for real-time Oracle EHR project monitoring, integrating automated compliance checks to meet **HIPAA** and **CMS** standards
- Implemented **metrics-based analysis** and tuning for **OCI** and **Kubernetes** environments, reducing infrastructure costs and improving system efficiency

SKILLS

Operating Systems: Windows, Unix, Shell Scripting, Linux

Languages: C, C++, Java, Python C#, JavaScript

Database: SQL, MySQL, PostgreSQL, MongoDB, Oracle, Hadoop, Hive, DynamoDB, Redis, RDS, Postgres

Designing Languages: HTML, CSS, TypeScript, JavaScript, Node.js, Redux, React, Angular, Vue.js

DevOps & Cloud Technologies: AWS, GCP, Docker, Kubernetes, Helm, Terraform, Packer, CI/CD, Jenkins, Kafka, Prometheus

ACADEMIC PROJECTS

Travel Website with Cloud Native Backend Web Application (JavaScript, React, Rest API, DevOps, AWS, Packer, Terraform, VPC, CI/CD, RDS, Lambda, Docker, Kubernetes) | [GitHub](#)

- Developed a **scalable full-stack application** end-to-end using Node.js and React, providing a responsive and high-performance user interface
- Streamlined cloud configuration to achieve 40% faster deployment by automating **Terraform** validation and **Packer** builds in **CI/CD**, enhancing the **software development lifecycle** with reliable unit testing
- Engineered **RESTful APIs** with token-based authentication, adhering to cloud-native architecture principles and **Swagger** documentation standards for robust and secure communication
- Reduced application **startup time** by **20%** by initializing and optimizing the database setup using **Sequelize ORM**, enhancing system performance and responsiveness
- Improved email verification process, enhancing tracking accuracy by **50%**, by integrating **Lambda** functions with Amazon **RDS** for efficient user verification and **email delivery** tracking
- Improved asset management by **30%** using Amazon **S3** for storing user profile images, with secure access ensured via **IAM** roles, enabling faster retrieval and scalability
- Increased deployment consistency by **40%** by **containerizing** the application using **Docker**, ensuring smooth, portable, and efficient execution across environments
- Deployed the application using **Kubernetes** for **automated scaling**, service discovery, and **load balancing**, improving system resilience and operational efficiency
