SUMMARY

Seasoned Data Analyst with proficiency in Python, SQL, cloud platforms, and data visualization tools to unlock valuable insights from data. Adept at automating tasks, improving data quality, and generating actionable recommendations that drive business results. Strong analytical and problem-solving skills, with a passion for clear and compelling data communication.

EDUCATION

New York Institute of Technology, MS in Computer and Information Science | **GPA: 3.73** **Sep 2021 - May 2023**
Vellore Institute of Technology, B Tech in Electronics and Computer Engineering | **GPA: 3.75** **Jul 2017 – May 2021**

SKILLS

Programming Languages: Python (Pandas, NumPy, Matplotlib, Scikit-learn, Spark), R, SQL, PyTorch
Databases and BI: MySQL, PostgreSQL, MS SQL Server, Oracle, Tableau, Power BI, MS Excel, Snowflake, MS Access
Cloud & Technologies: MS Azure, Google Cloud Platform (GCP)
Data Analysis: Exploratory Data Analysis, Data Visualization, Data Wrangling, Data Mining, Data Modelling
Machine Learning: Sentiment Analysis, Tensor Flow, Logistic Regression, Naive Bayes, K-Nearest Neighbors, Random Forest

PROFESSIONAL EXPERIENCE

- Data Analyst Intern** | Microsoft Inc **Apr 2024 – Jun 2024**
- Automated report creation by constructing ETL pipeline for data collection from **Kusto clusters** for **Geneva logs** and **matrix** using **python** increasing data visibility of incidents and latency by 15% thus improving on-call engineers' efficiency by 5%
 - Streamlined data visualization processes by leveraging Kusto queries to extract and clean data from Kusto clusters increasing data quality, reducing 3% errors
 - Developed synthetic data for **Azure Resource Manager** and **Role Based Access Control** services using their **APIs**, enabling proactive health monitoring and early issue detection, reducing customer data access issue
 - Deployed applications for 4 regions using **EV2 Artifacts**, enabling regional scalability and improving application accessibility for global users
- Data Analyst** | Mangalya Advisors **Jul 2023 – Mar 2024**
- Created dashboard using **Power BI** and **Tableau** for providing real-time insights and facilitating data-driven analysis of customer service data, improving decision-making time by 12%, leading to faster responses to market trends
 - Utilized **SQL** to identify and resolve data inconsistencies across 5 databases, reducing the data cleaning time by 26% and ensuring data integrity and preventing reporting errors
 - Identified the key pricing adjustment by analysing 20Gb sales data and presented the findings, increasing revenue by 5%
- Graduate Teaching Assistant** | New York Institute of Technology **Sep 2022 – Dec 2022**
- Curated the class material encompassing **Python, R, and SQL** for **data analysis** and **data visualization**, and mentored a cohort of 30+ students on core concepts
 - Generated reports for 40 students by monitoring student progress and grading assignments, providing constructive feedback for student's improvement
- Data Analyst** | TPS Industries **Jul 2019 – Jun 2020**
- Streamlined data synchronization by constructing **VBA macros** to integrate sales data from 10 clients, reducing errors by 60% and saving 4 hours of data analysis team, increasing efficiency by 20%
 - Automated 5 data cleaning tasks in **MS Access** using VBA macros, resulting in a 30% reduction in processing time and improving overall workflow efficiency for the finance team
 - Reduced the processing time by optimizing **SQL queries** for efficient data extraction from large and growing datasets (starting at 20k+ rows) in Oracle Database, ensuring scalability for future data volume increases.
- Data Analyst Intern** | Mira Inform **May 2019 – Jun 2019**
- Trained a **machine learning classifier** for **sentiment analysis** of over 10K restaurant reviews by leveraging **Apache Spark SQL's** distributed processing capabilities, enabling faster turnaround for actionable insights
 - Developed interactive data visualizations using **Matplotlib, Seaborn, and Plotly** in **Python**, allowing stakeholders to explore relationships between popular dishes and customer review sentiment in real-time, facilitating data-driven decision making
 - Enhanced model accuracy by utilizing **feature scaling, dimensionality reduction, and data imputation** methods, improving model performance and accuracy by 7%

CERTIFICATIONS AND AWARDS

Certifications: Google Cloud Participation, Deep Learning Specialization, Natural Language Processing
Awards: 1st place in Zebra-NYIT Hackathon and New York Metro ACM College Data Science Challenge
