

Wen Ge

(628) 502-3681 | San Diego, CA | wenge0794@gmail.com | linkedin.com/in/wenge0794

EDUCATION

Columbia University

New York, NY

Applied Statistics M.S.

2023 - 2024

- Course Emphases: data science programming, statistical inference, probability theory, multivariate and multilevel regression analysis, clustering methods.

University of California, San Diego

San Diego, CA

Mathematics B.S.

2018 - 2023

- Four-time UCSD Provost Honor, Major GPA: 3.8

PROFESSIONAL EXPERIENCE

Microsoft

Remote

Data Analyst Intern

July 2022 - Aug 2022

- Analyzed 1.8 million e-commerce user interaction records using NumPy and Pandas in Python to identify bottlenecks in the transaction process; recommended user-level and user-item-level optimizations that improved checkout rates.
- Designed visualizations of daily and hourly user behaviors segmented by age groups, uncovering peak activity times; proposed targeted advertising during these periods and advised strategies to retain active users with fresh inventory.
- Discovered that user retention was more impactful than new customer acquisition for this store and presented actionable strategies to maintain engagement with active users.

Bank of China

Nanjing, China

Financial Management Intern

Sept 2021 - Nov 2021

- Conducted text mining and sentiment analysis on 30,000+ customer reviews using NLTK to uncover dissatisfaction trends; combined insights with historical operational data to identify key drivers of customer attrition.
- Proposed strategies to improve user retention and service quality based on customer feedback analysis, reducing the risk of losing active clients.
- Learned institutional merger practices and customer defection prevention strategies through hands-on exposure to classic banking operations.

CITIC Bank

Nanjing, China

Department Intern

July 2021 - Sept 2021

- Researched financial product mechanisms and conducted fundamental analysis to design tailored investment recommendations, enhancing client portfolio performance.
- Developed high-frequency trading strategies using machine learning models such as recurrent neural networks and random forest algorithms in Python, constructing a predictive framework for futures trading.
- Predicted market states and implemented sub-strategies for specific conditions, optimizing trading performance and achieving higher accuracy in volatile market scenarios.

LEADERSHIP & VOLUNTEER WORK

Volunteer Teaching in Sichuan

Summer 2019 & 2020

- Led a team of 20 members to paint classrooms, teach English and Mathematics, and improve learning conditions at a local school as part of the Young Volunteers Association.
- Organized and established a mini library with over 1,000 books donated by team members, enhancing educational resources for students.
- Designed interactive activities and invited guest speakers to engage students with classic Chinese literature, fostering a love for reading.

SKILLS

- **Programming Languages:** Python, SQL, R, Java, Matlab
- **Software & Tools:** Jupyter Notebook, Excel, Git
- **Data Analysis Tools & Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK
- **Statistical & Machine Learning Techniques:** Regression Analysis, Clustering, Sentiment Analysis, Latent Structure Analysis, Multi-level Modeling
