

Yashwanth Vangala

yashwanthvangala20@gmail.com | 737-418-0348 | Austin, Texas

PROFESSIONAL SUMMARY

- Data Analyst with 5+ years of experience in enterprise analytics, business intelligence, ETL development, KPI reporting, and data-driven solutions across insurance, telecom, manufacturing, and enterprise IT environments.
- Strong expertise in Advanced SQL, Teradata SQL, Python, and Snowflake for large-scale data extraction, transformation, validation, and performance optimization across multi-million record datasets.
- Hands-on experience designing and maintaining scalable ETL pipelines, data warehouses, and automated reporting infrastructures connecting business, finance, and operational teams with reliable data.
- Proficient in building interactive dashboards, KPI scorecards, and data visualization solutions using Power BI, Tableau, Excel, and PowerPoint to support executive and operational decision-making.
- Experienced in data cleaning, root cause analysis, anomaly detection, trend analysis, and predictive analytics to improve data quality, reporting accuracy, and business performance.
- Strong knowledge of relational and cloud databases including Teradata, SQL Server, Oracle, Snowflake, BigQuery, and PostgreSQL with focus on query tuning, indexing, partitioning, and optimization.
- Skilled in Python (Pandas, NumPy, Jupyter, PySpark) for workflow automation, large-scale data transformation, validation, and analytical reporting.
- Experience managing Git/GitHub repositories, version control, and analytical assets, supporting collaborative development and deployment workflows.
- Hands-on exposure to AI-enabled workflows and generative AI tools (ChatGPT/LLMs) for automating reporting, insights generation, documentation, and repetitive analytical tasks.
- Proven ability to collaborate with stakeholders, gather business requirements, document processes, and deliver scalable analytics solutions in Agile and fast-paced enterprise environments.

TECHNICAL SKILLS

- SQL, Teradata, PL/SQL, Python, R, Data Modeling
- Power BI, Tableau, Advanced Excel, PowerPoint, Think-Cell
- Oracle, SQL Server, Snowflake, BigQuery, PostgreSQL
- Informatica, SSIS, ETL, Data Warehousing, Data Validation
- Azure, AWS, Databricks, Azure DevOps, Jira, Git
- APIs, Salesforce, Power Automate, Business Intelligence

PROFESSIONAL EXPERIENCE

Data Analyst | QSC, USA | Jan 2025 – Present

- Conducted advanced data analysis on large enterprise datasets using SQL, Power BI, Tableau, and Python to identify KPI trends, business drivers, and operational improvement opportunities.
- Built executive dashboards, scorecards, KPI reports, and interactive visualizations to support strategic decision-making and business optimization.
- Performed statistical analysis, trend analysis, root cause analysis, and validation checks to identify anomalies, data inconsistencies, and process gaps.
- Collaborated with business stakeholders, architects, and technical teams to gather requirements, define methodologies, and deliver scalable analytics solutions.
- Partnered with data quality and architecture teams to improve data ingestion, automation, data integrity, and reporting reliability.
- Developed ETL workflows and automated reporting pipelines using Informatica, SSIS, and Power Automate.
- Conducted business analysis sessions, created functional specifications, source-to-target mappings, and process documentation for enterprise transformation projects.
- Presented analytical findings and business insights through executive-level presentations, dashboards, and data storytelling techniques.
- Utilized Jira and Azure DevOps for project tracking, sprint planning, issue management, and Agile collaboration.
- Supported production support activities by troubleshooting reporting and data integration issues and identifying corrective actions.
- Mentored junior analysts and collaborated with cross-functional teams to improve reporting standards and analytics best practices.

Environment: Power BI, SQL Server, Oracle, Informatica, SSIS, Tableau, Azure, Databricks, Snowflake, Python, Power Automate, DataStage

Data Analyst | Lexis Nexis, USA | Dec 2023 – Jan 2025

- Developed and optimized complex **Advanced SQL and Teradata SQL queries**, stored procedures, views, macros, CTEs, and analytical functions to process and analyze multi-million record insurance and customer datasets.
- Performed advanced **SQL/Teradata query optimization**, indexing, partitioning, execution plan analysis, and performance tuning techniques to improve reporting efficiency and reduce query runtime.
- Built scalable ETL pipelines to integrate and transform data from Snowflake, Azure, SQL Server, APIs, Oracle, and Teradata systems into centralized reporting environments.
- Designed and developed executive dashboards, KPI scorecards, analytical summaries, and business storytelling presentations using **Power BI, Tableau, Excel, and Advanced PowerPoint/Think-Cell** for leadership reporting.
- Created advanced PowerPoint presentations with data visualizations, trend analysis, forecasting insights, and executive summaries to support stakeholder decision-making.
- Utilized Databricks, PySpark, Pandas, and NumPy for large-scale data transformation, automation, and advanced analytics workflows.

- Conducted trend analysis, statistical analysis, root cause analysis, and anomaly detection to identify operational inefficiencies and business improvement opportunities.
- Optimized BigQuery and Teradata reporting performance using clustering, partitioning, indexing, and advanced SQL tuning techniques.
- Designed enterprise data warehouse schemas, dimensional models, and reporting datasets using Star and Snowflake methodologies.
- Collaborated with business stakeholders, leadership teams, and technical teams to translate business requirements into scalable reporting and analytical solutions.
- Automated enterprise reporting processes using SQL, Power BI, and Teradata frameworks to reduce manual reporting efforts and improve data accuracy.
- Supported enterprise data governance, validation, compliance, and data quality initiatives while maintaining reporting consistency and integrity.

Environment: Teradata, Advanced SQL, Power BI, Tableau, Snowflake, Databricks, Python, Oracle, BigQuery, Azure, Excel, PowerPoint

Data Analyst | Cyient, India | Jul 2020 – Jul 2023

- Analyzed enterprise business and operational datasets using **Advanced SQL, PL/SQL, and Teradata** to support reporting, KPI tracking, and data-driven decision-making initiatives.
- Developed and optimized complex SQL/Teradata queries, joins, stored procedures, views, and analytical functions for large-scale business reporting and operational analytics.
- Performed SQL and Teradata query optimization, indexing, partitioning, and performance tuning to improve reporting efficiency and database performance.
- Built interactive dashboards, executive KPI reports, and analytical presentations using **Power BI, Tableau, Excel, and PowerPoint** for leadership and operational reporting.
- Developed ETL pipelines and automated workflows integrating Salesforce, SAP, AWS S3, Redshift, and enterprise relational databases.
- Conducted exploratory data analysis (EDA), statistical analysis, data transformation, and data validation using Python, Pandas, and NumPy.
- Monitored enterprise system and network performance metrics, analyzed logs, and performed root cause analysis to identify operational bottlenecks and service issues.
- Supported enterprise reporting and infrastructure initiatives by creating automated SQL-based reporting solutions and dashboard frameworks.
- Worked in high-availability environments and collaborated with technical and business teams to support enterprise operations and reporting modernization projects.
- Developed technical documentation, reporting specifications, and presentation materials for business and leadership stakeholders.

Environment: Teradata, SQL, Oracle, Power BI, Tableau, Python, AWS, Salesforce, SAP, Redshift, Excel, PowerPoint, Networking Technologies

Graduate Assistant | University of Bridgeport

Sep 2023 – Dec 2023

- Supported student information system (SIS) reporting, analytics, and dashboard development initiatives.
- Developed Power BI and Jasper reports for enrollment, attendance, and academic performance tracking.
- Conducted data quality analysis, validation, and reconciliation across integrated educational systems.
- Collaborated with IT and business teams to support Agile-based analytics and reporting projects.
- Documented data definitions, workflows, business rules, and reporting logic for compliance and audit readiness.

Environment: Power BI, SQL, Excel, Jira, SIS Reporting Tools

PROJECTS

Enterprise Data Warehouse & Reporting Solution

- Designed and implemented enterprise reporting solutions using Power BI, SQL Server, and Snowflake.
- Developed ETL workflows and source-to-target mappings for data integration and migration.
- Created dimensional models and optimized reporting performance for business users.

Telecom Service Migration & Reporting Project

- Supported service provisioning, migration, and decommissioning activities for telecom operations.
- Built operational dashboards and customer transition reports using Power BI and SQL.
- Conducted post-migration validation and issue resolution activities.

Food Delivery Application Using React.js, MongoDB & Node.js

- Developed a scalable food delivery platform with real-time order tracking and secure authentication.
- Designed backend APIs and integrated MongoDB for efficient data storage and retrieval.
- Built responsive user interfaces and dashboards for customers and restaurant management.

EDUCATION

Master of Science in Computer Science

University of Bridgeport, USA Aug 2023 – May 2025

Bachelor of Technology in Computer Science & Engineering

Geethanjali College of Engineering and Technology, India 2016 – 2020
